CURRENT TRADE CONDITIONS.

ONTARIO.

Building permits issued in the City of Toronto up to the end of May this year exceeded in value $5,000,000, and during last month alone their value was $1,500,000. Phenomenal activity is now existent in the building trade and this has naturally created a heavy demand for lumber. Manufacturers are showing the utmost confidence in the situation and it is not unusual to hear the prediction that prices will go still higher. This prediction, at practically the beginning of the sawing season, is based on the extent to which the old stock of pine and hemlock has been consumed. The mills have more orders than they can fill and are hoping that the usual midsummer dullness will give them an opportunity to reduce the number of unfilled orders on their books. A further advance in prices could no doubt be brought about, but this is being discouraged in conservative quarters. It is reported that birch lumber has been offered too freely and that prices are a little easier, but about all that can be said of the hardwood trade generally is that the demand seems to be improving.

EASTERN CANADA.

The outlook for the log drives in Eastern Canada is not as encouraging as one week ago. The St. John river has fallen and rains are badly needed. It is estimated, however, that more than one-half of this season's output of logs on that river are now in safe water. Lumber is moving in satisfactory volume. At a meeting of the Lumbermen's Association of Western Nova Scotia held last week, it was stated that a large proportion of this season's production of lumber had been sold at good prices. New Brunswick cedar shingles, while fairly active, are not as strong as a fortnight ago and Extras are said to be offering at $3.65, whereas the average quotation then ruling was $3.70. In view of the natural increase in production at this season of the year, it is probable that white cedar shingles may work a little lower.

UNITED STATES.

The lumber business continues to be exceedingly brisk. It is no trouble to sell stock and until conditions change materially, lower prices are not likely to be witnessed. A great deal depends, however, on the crops, and at this time it may be said that the outlook is encouraging. Our Boston quotations are now at the highest point which has ever been reached and show an appreciatiation during the spring months of several dollars per thousand feet in the better grades of white pine. Spruce has gained about $1. Hemlock sells very readily, with an exceptionally brisk demand for 12 and 14 foot stuff. The hardwood market is steady. In the Saginaw valley ash is selling at $27; elm, $22 to $26; basswood, $23 for No. 2 common and better and $15 for culls; birch $20 to $22.50, and maple $16 to $18.

Spruce lath is weaker, the best price that can be obtained at Boston for 1⅝ inch being $4.25, and for 1½ inch $4.

GREAT BRITAIN.

While the British lumber market continues firm, considerable dissatisfaction is expressed that more activity does not develop. Consumption is still at a low point and buyers are indifferent about closing contracts. The Timber Trades Journal, referring to spruce, says: "Neither importers nor dealers are inclined to contract at present, buoyed up by the hope that prices will break later on. The tone, however, is quite firm at £8 5s c.i.f. for ordinary specifications, that is, containing about 60 to 70 per cent. of narrows, 3 x 7 and 3 x 8, and balance wider. Laments are made by many of the wholesale spruce deal merchants that they have great difficulty in selling up the country at any profit upon the cost of importation." Birch logs are selling at the low prices recently quoted, but there has been considerable buying and it is believed that the present is a good time to acquire birch, which is almost certain to advance in price later in the year. Hemlock is meeting with some favor on account of its lower cost and all shipments have been readily disposed of.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

Vancouver, B.C., May 26th, 1906. —"Orders, but we can't fill them," was the remark to-day of a millman who deals in the manufacture of both lumber and shingles. "The shingle business is pretty good just now, but conditions are against us. If bolts were plentiful and the labor market easy things would be beyond complaint, but as it is the raw material is high in price and scarce in quantity, and there is difficulty in getting good men for the camps and mills. There is little change in prices, and general conditions remain about the same. The market for shingles just now is mostly in Canadian territory, though some are shipped across the line. As far as orders are concerned the business is good."

There is a steady prosperity in the lumber branch of the business. The prices of logs are very stiff, with a tendency to increase from the $6, $8, and $10 now quoted. As an indication of the demand for logs, an instance might be quoted. The other day a big boom came to the city, and loggers who had not been paid filed liens on it for wages. Generally in cases of this kind the mills decline to pay the cash, but notwithstanding the liens there was a number of applicants for the logs. The men got their money the same day as the documents were taken out, the cash being forthcoming immediately.

There has been nearly two weeks of wet weather, but it is not thought that it will interfere with the log production. Camps are operating fnll time, and mills are cutting all the lumber possible. There has been an increase, in the list by the Mountain Lumber Manufacturers' Association. This was done at a meeting in Calgary the other day, when an average raise of from 50 cents to $1 was made, the advances being perhaps nearer the dollar mark. "Papers have stated the demand for lumber is so great," said Mr. G. P. Wells, secretary of the Association, "that many of the firms which are members have had to refuse orders, and it is only natural that they should try and make up for the past bad season by exacting what they could. Now, this is not so, and it is not with the intention of taking advantage of the situation that the raise has been made. We have only graded our prices to allow a fair profit. Freight rates have increased, labor and supplies are dearer, in some cases the increase having been from 50 to 100 per cent. This being the case it is only

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

reasonable that as the cost of production was much increased that the price of the finished article should also go higher. The millmen do not get the benefit. The difference is diffused among the workmen, the manufacturers who supply machinery, etc., and in many other ways it is returned promptly and directly to general circulation among the people."

A feature of the industry these days is the continued activity of American lumbermen regarding British Columbia timber. Not a week goes past but some prominent operator from south of the line secures limits, and in the interior, too, a number of transfers of vaulable mill properties are taking place. The development of the future promises a good market, and lumbermen are getting in readiness to take advantage of it.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company, of Barbados, in their market report of May 12th, say: The only arrival during the fortnight is the schooner "Maple Leaf", from Bridgewater, N.S., with a deck load of 97,000 ft. white pine for this port, which was sold at $19.10 round. Market for both this description and spruce, while not heavily stocked, is somewhat easier, owing to the crop being very far advanced, and consequent slackening in demand, but we think a couple of cargoes of white pine and spruce would still sell readily at remunerative prices. Shingles—The schooner "Evolution", whose arrival we reported in our last, had 1,151,000 clear white cedar laying and 649,000 extra No. 1, which were sold at $2.25 per M. for former, and $1.60 per M. for latter. Market is well stocked with all descriptions and demand is very light, but should improve as soon as the approaching rainy season sets in. Shooks—Receipts consist of 397 bundles ex S. S. "Parima" from New York, which we understand were sold at $2 per bundle. Stocks are very light and are hardly sufficient for crop requirements. A lot of 440 empty return puncheons have been imported from New York, which we understand were sold to the trade at $3.15 each.

HOO-HOO CONCATENATION AT LONDON.

Vicegerent Snark James G. Cane has announced another concatenation, to be held at London June 29th. It need scarcely be stated that London is the home of Brother Donald Ferguson, the genial Supreme Arcanoper. He promises to make the meeting on June 29th the banner concatenation which has yet been held, and no member should miss the opportunity of being present. The railroad and hotel accommodation is first-class.

Each member is requested to bring one candidate for initiation into the Hoo-Hoo mysteries. This is important.

LUMBER PRICES AT CALGARY.

Retail prices for lumber at Calgary, Alberta, are as follows: Common 1 in. boards, 4 in. wide, $18; common 1 in. boards, 6 in. wide, $21; common 1 in. boards, 8 in. wide, $23; common 1 in. boards, 10 in. wide, $24; common 1 in. boards, 12 in. wide, $25; cedar boards, $1.00 per M less than above prices. 2 x 4, 12 ft. to 16 ft. D 1s & 1e spruce and fir, $24; 2 x 6, 12 ft. to 16 ft. D 1s & 1e spruce and fir, $24; spruce and fir, $21; 2 x 8, 12 ft. to 16 ft. D 1s & 1e spruce and fir, $24; 2 x 10, 12 ft. to 16 ft. D 1s & 1e spruce and fir, $24; $1.00 per thousand for every 2 in. over 10 in. wide; 50 cents per thousand for every 2 ft. over 16 ft.; 2 x 4, 10 ft. same price as 2 x 4 20 ft.; cedar dimension, $2.00 per thousand less than above. 3 x 4 to 3 x 12 up to 16 feet long, spruce and fir, $25; 4 x 4, 4 x 6, 6 x 6, up to 16 ft. long spruce and fir, $25; over 6 x 6 and including 12 x 12, 16 feet, $23; 50 cents per thousand for every 2 feet over 16 ft. No. 1 6 in. shiplap, $23; No. 1 8 inch shiplap, $25; No. 1 Mountain flooring, 4 in. and 6 inch wide, $38; No. 2 Mountain flooring, 4 in. and 6 in. wide, $34; No. 3 Mountain flooring, 4 in. and 6 inch wide, $27; No. 1 Mountain ceiling, 4 in. and 6 in. wide and 1 in. thick, $37; No. 2 Mountain ceiling, 4 in. and 6 in. wide and 1 inch thick, $33; No. 3 Mountain ceiling, 4 in. and 6 in. wide and 1 in. thick, $26; No. 1 Mountain ceiling, 5-8 in. thick, $26; No. 2 Mountain ceiling, 5-8 in. thick, $23; No. 1 Mountain siding, 6 in. wide, $38; No. 2 Mountain siding, 6 in. wide, $34; No. 3 Mountain siding, 6 in. wide, $27; No. 1 Mountain siding, ½ x 6 in., bevelled, $27; No. 2 Mountain siding, ½x6 in., bevelled, $23; cull cedar boards, $18; cull cedar shiplap, $19; No. 1 Coast cedar siding, ½x6 in., bevelled, $34; No. 2 coast cedar siding, 1/2 x 6 in., bevelled, $30; No. 1 Coast flooring, 1x4 in., edge grain, $46; No. 1 Coast ceiling, 1x4, $42; No. 1 Coast ceiling, ⅜x3, $30; cedar lath, $5.50; pine lath, $5.25; fir and spruce lath, $4.75; No. 1 cedar shingles, $3.50; No. 2 cedar shingles, $3.00.

The Saginaw Lumber & Salt Company, of Sandwich, Ont., recently sold 500,000 feet of low grade lumber to Detroit parties at $18.50 per thousand.

2" Beech,	2,000	"
1½" "	21,000	"
1" "	8,000	"
2" Birch,	18,000	"
1½" "	21,000	"

White pine, two cars 1 X 12 stocks, sound box, dry. W. B. BARTRAM & CO., Ottawa, Ont.

NEW TERMS OF SALE.

At a meeting of the Board of Management of the Ontario Lumbermen's Association held in Toronto on Tuesday, June 12th, new terms for the sale of lumber were agreed upon. It was unanimously decided to make it a rule of the trade that hereafter all sales should be made on the following basis as to terms:

1½ per cent. discount for payment in 15 days from date of shipment.

1 per cent. discount for payment in 30 days from date of shipment.

Net sale, 40 days.

No discount to be allowed after 30 days.

Freight and duty to be cash.

The action of the Ontario Lumbermen's Association should receive the hearty endorsement of the trade in general, as it has been realized for some time that lumber was being sold on too long credit considering the length of time which the manufacturers carry the raw material between the stump and the car. Shorter terms of credit have been adopted throughout the United States and there is no reason why Canadian lumbermen should not take steps in the same direction. The tendency in other commodities is also towards shortening the time allowed for payment.

The M. Brennen Sons Company, of Hamilton, are reported to have purchased a timber limit of 10,000 acres in Nipissing district from J. R. Booth of Ottawa, for $50,000.

CURRENT TRADE CONDITIONS.

ONTARIO.

The strength exhibited by white pine lumber has been a disappointment to buyers who predicted a break when the new cut got in shipping condition. Some new stock has been moved, but prices are no lower, and this notwithstanding that yellow pine has been offered in some cases at slight concessions from the high basis recently reached. The manufacturers of pine are standing together on the presnt price level, and so far as can be learned are offering no concessions to buyers. The quantity of purchasable lumber is limited and will all be required. In Toronto trade is still good, and dealers are busy figuring on bills of building material. Hemlock is almost as firm as pine and is in excellent demand. Hardwoods are not particularly active and there is some diversity of opinion as to prices. Mill run basswood is changing hands at $18 to $19 at the mill, although some manufacturers are asking $20.

EASTERN CANADA.

The log drives are again attracting considerable attention owing to the probability that a considerable quantity of logs will be hung up on the St. John river and branches. Some drives are already stranded and others are dependent upon the rain-fall of the next few days to keep them moving. Recent rains have helped driving operations on the St. Maurice river, in Quebec. Though a number of logs are hung up on some of the creeks, most of the mills will have enough to keep them going till late in the fall.

Because of a demand for an increase in wages not being complied with seven of the large saw mills at St. John, N.B., are closed down and 500 men are idle. The deal pilers have been receiving $2 a day and demanded $2.30. While the mills will be temporarily handicapped, the shut-down will operate in favor of those having lumber for sale.

The New Brunswick cedar shingle market is barely steady and offerings of Extras are now being made in a few instances as low as $3.60 for Boston delivery.

UNITED STATES.

The weather during the past two weeks has not been altogether favorable for the growing grain crop. Whether this has exerted an unfavorable influence on the lumber business cannot be definitely known but the fact remains that considerable uncertainty exists in respect to prices. Dealers are delaying their orders under the impression that there will be plenty of lumber and that they will be able to make favorable purchases later in the year. Already it is said that yellow pine and spruce have declined from one to two dollars per thousand feet, but there has been no break in white pine or hemlock. Much depends upon the harvest. It the production of wheat and corn should approach in volume that of last year, it would do a great deal towards sustaining lumber prices. No harm can be done, however, if prices should seek a slightly lower level, as consumption would be stimulated thereby. It is estimated that the hemlock output in the Eastern States will be less than last year on account of the smaller demand for bark. There has been no weaking in the price of hardwoods, nor could any be expected in view of the slight appreciation which has taken place during the late period of prosperity. Basswood and birch are selling freely but are somewhat plentiful.

GREAT BRITAIN.

Although the lumber trade of Great Britain has been disappointing in point of expansion, prices in most instances have been maintained. There have so far been no consignments of pine deals and this fact has given buyers more confidence. Spruce continues very firm, with little probability of early weakness. A cargo of several hundred standards was recently sold at £8 12s 6d per standard c.i.f. Manchester, and at a recent public sale in London some first quality spruce from Batiscan, Que., sold at £13 15s, and second quality at £9 10s and £9 15s per standard. A small quantity of 3 x 11 inch unassorted from St. John, N. B., brought £10 10s. Birch is showing more weakness than any other class of lumber. There seems to be very little demand, and of the 1044 logs which arrived at Glasgow last month, the greater quantity were stored. Sales were made as low as 19 cents per cubic foot for 16½ inch average. Birch planks have sold from the ship's side at £8 5s per standard. There is considerable inquiry for sawn oak lumber one to two inch thick, and for planks cut to special dimension for waggon building.

STOCKS AND PRICES.

Donald Fraser & Sons, of Fredericton, N. B., have 20,000,000 feet of logs in the Temiscouata district in safe water. They also have from 8,000,000 to 10,000,000 feet on the Tobique river in safe water. Dunn & Gregory's drive of about 5,000,000 feet on the Lepreaux has also reached their mill.

The log drive of Randolph & Baker, on the Blue River, is reported to have been stranded for this year. James Hallett, of Millville, is out of the Grand river with 7,000,000 feet for Randolph & Baker. Frank Whitehead has 4,000,000 feet out of the Little river for the same firm, and John E. Moore has a drive of 5,000,000 feet on the Salmon river in safe water. John A. Morrison has about 3,000,000 feet hung up at Priestley's Rapids and John Kilburn about 3,000,000 feet, at same point. It is reported that W. J. Nobles, who is driving for Cushing & Company, has 16,000,000 feet hung up about 75 miles above the corporation limits.

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, June 9th, 1906.—The remarkable feature in the lumber trade of the Ottawa Valley recently is the steadiness of prices. In all the principal lines a high standard was reached before the cutting operations became brisk. Some speculators had anticipated a drop when the season's output began to reach the market, but sales continue to be made at advanced figures. Lath affords a striking example for continued high prices. When the upward tendency became noticeable a few months ago, some buyers held off, expecting more favorable conditions by this time, but they are now submitting to demands nearly twice as high as those of a year ago. Recently a firm advanced quotations from $3.50 to $4, but there was no diminution in the sales. Four dollars is paid now where the current rate was $2 50 a year ago. The orders are coming in so fast that car loads of the green product are going out every day. The No. 2 brand of white pine at $3.50 and $3.75 finds a ready market in Montreal and the immediate vicinity of Ottawa. The better class at 50 or 75 cents higher is nearly all shipped across the border. The larger shipments to the British market may be estimated from a statement by the Booth firm that it has sent twice as much deal across the sea up to the present time as during the corresponding period last season. An equal active demand exists in the American market for shipping cull grades, while the pine culls are quickly bought up in local circles.

The shingle trade is keeping pace with the other branches of the lumber industry. The best grades go most rapidly, and for XXXX cedar shingles an exceptionally good price is paid.

As the 1906 drive reaches the city and the lumber kings see it pass through the mills they realize how the logs are disappearing from year to year. Consequently more labor has to be expended for a certain quantity of manutactured lumber than before. With the constantly advancing rate of wages this condition accounts very important to the manufacturers, in fact, they say this has more to do than anything else with the rise in the price of lumber.

About October 1st, the J. R. Booth firm will have their new paper mill in operation. After this Mr. Booth expects to make more money out of his spruce than formerly. The output of the mill will be 100 tons a day, all of which will be the brand of paper used for newspapers. In order to get sale for this large quantity the firm will push into the British and Australian markets. In looking over the new mill it was observed that sawdust is to be used for fuel. Carriers have been constructed for this purpose and the designers of the factory believe they can effect a plan whereby the boilers can be fed for at least nine months of the year from the sawdust of the lumber mill which is now consumed in an incinerator. The saving would be $200 or $300 a day, for it is estimated that it requires half a ton of coal to produce a ton of paper.

Mr. Booth's new paper mill is equipped with three Pusey & Jones machines from Welmington, Del., of a more up-to-date type than is found in most of the factories of the Dominion. From 150 to 250 men will be employed and the number will be increased with the establishment of the sulphite mill which is to follow. Mr. Booth has plenty of spruce on his older limits but will draw most heavily from the recently acquired area in the locality of the Montreal river, where he has contracted to cut at least 20,000 cords per year.

COOPERAGE STOCK.

Referring to cooperage stock, the Sutherland-Innes Company, of Chatham, Ont., say:

The general trade has shown a decided improvement, and a great many of the larger consumers are now placing their contracts, or asking for quotations with the view of placing contracts.

The production of staves, we believe, is going to be even lower than has been estimated, and there is no doubt that if there is any shortage it is going to be in staves, as while the quantity of heading manufactured is much less than in ordinary years, we believe there will be enough heading manufactured to take care of all the staves.

Hoops continue to be comparatively plentiful, and prices are still about maintaining their own; in some cases, the smaller manufacturers are offering hoops a shade below the average price, and apparently there is not going to be any shortage of hoops this season, unless we have a very wet summer, which will prevent the trucking of green logs.

To sum up the situation briefly, we should say that prices are being maintained all along the line, with very few exceptions, and with the increased demand, which is bound to come very shortly, prices will be higher, more especially in staves.

The situation in tight barrel material is about the same, the demand is about equal to the supply and in some lines, more particularly in the heavy and larger staves, it is difficult to supply the demand.

BIRCH SQUARES WANTED.

An English firm of timber importers desire to purchase a quantity of Canadian birch squares, ⅞ inch x ⅞ inch x 3 inch. Parties interested may obtain the name and address from the publishers of the CANADA LUMBERMAN.

Best mill site on Georgian Bay. With mills, dwelling houses, stables, store and 1,700 acres of hardwood bush. Lumber shipped by rail or water. Business established for over twenty years.

Owner going West. Address, D. DAVIDSON, Penetanguishene, Ont.

NOTICE
TO THE LUMBER TRADE

At a meeting of the Lumbermen's Association of Ontario, it was unanimously decided that the terms of sale, to take effect MONDAY, JUNE 18TH, 1906, should be as follows:

Cash Discount dating from shipment.
1½ per cent. in 15 days.
1 per cent. in 30 days.
Net. 60 days.

No discount after 30 days. All freights cash.

THE LUMBERMEN'S ASSOCIATION OF ONTARIO,
W. B. TINDALL, Secretary-Treasurer.

WANTED—600 M FEET 1" COMMON PINE sidings, to be delivered three cars per month for one year, for cash. DODDS, ANDERSON LUMBER CO., Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is talk of a weaker lumber market, but the prices at which manufacturers are holding their stocks do not indicate any change. The supply is naturally increasing, but nevertheless it is difficult to buy any large blocks of white pine. Confidence is not waning, although for the next two months there may be a slight lull in business. The call for building lumber is as urgent as ever. It was reported last week that about thirty million feet of logs had been hung up on the north shore but it is probable that the recent rains may have moved them. Nevertheless, the success of the drives is not yet assured. Pine lath are keeping close to the high price recently established, namely, $4.25 at the mill for No. 1. Dealers are cautious about buying at this figure, but the present outlook is that a large consumption this year will prevent a sharp break.

EASTERN CANADA.

The situation in Eastern Canada is daily growing more unfavorable in respect to the log drives. The water in the streams has fallen rapidly and a considerable quantity of logs are reported to be stranded, with very little prospect of coming out this year. This, in conjunction, with the shut-down of the St. John mills on account of the strike of deal pilers, has caused manufacturers to take a somewhat gloomy view of the season's operations. The production of lumber is almost certain to be small and a continuation of even the present demand is likely to result in higher prices. New Brunswick cedar shingles are unchanged in prices, but spruce lath are somewhat weaker, the recent high prices evidently having stimulated production to an abnormal degree. The decline from the high point has been about 75 cents.

WESTERN CANADA.

The lumber trade of Western Canada is showing more activity than usual at this season of the year. The British Columbia mills have all the business they can handle and many of them are refusing orders on account of inability to

make shipment as early as required. It is understood that a considerable quantity of lumber has been purchased at the Coast mills for shipment to San Francisco and it is probable that other orders of a similar kind will follow. The question of making a further advance in prices will probably be taken up at the Fall meeting of the Mountain Lumber Manufacturers' Association, but this, we believe, will depend to some extent upon the western wheat crop. If the yield should be large, prosperity will doubtless continue for another year, and with it a brisk demand for lumber. Building operations in Winnipeg continue exceptionally active, the permits this year reaching nearly $6,000,000.

UNITED STATES.

Spruce lumber is showing considerable weakness, more than has been witnessed for a long time. Values are down from $1 to $2. Frames 9 inch and under have sold at $25 in one ot two cases, but when this is so the order has either been a difficult one or one for prompt shipment. The majority will sell at $24 and one manufacturer states that he will accept fnture business at $23 and $25. Random is also weaker, and sales have been made under list prices. Furring is offered at $20. At a meeting held at Boston on June 9th to discuss the situation 80 per cent. of the spruce manufacturers of Maine, New Hampshire and Vermont were represented. It was decided to curtail the output 50 per cent. during July at least and to continue the curtailment as long as might be necessary to hold up the market. As yet the weakness in spruce has not affected white pine, which is almost as active as last month. Box and barn boards are scarce at Buffalo and Tonawanda. Hardwoods are firm, with basswood showing the most activity. Birch sells well.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., June 11th, 1906. — While British Columbia mills have all the business they can attend to, in fact orders are still behind in the filling, the path of the manufacturer has many thorns mixed with the roses. Prices for lumber are good, but the prices for logs are very high and very stiff. $9 for fir and $10 for cedar are the common figures, though the buyer who goes to the camps may get logs somewhat cheaper, as he takes the risk of towing. Labor, too, is very scarce, and this is becoming a problem. Orientals who a year ago worked for $1.25 a day or less, realize that their services are indispensable, and demand and are getting as high as $1.75 and even $2 a day in instances. Hindoos, since they began to make money working in the mills, are now coming to British Columbia, and their number is considerably over 1,200. They are a better size of workmen than the Chinese or Japanese, and can live just as cheaply. As far as they are concerned from the immigration point of view, they are not regarded as desirable, as they send away or take away all the money they can save.

It is difficult to say just when mills will catch up with their orders. One manufacturer stated to-day that he is now filling orders three months old, and the people are glad to get the material. Mills are starting up in various parts of the province, a number of Americans securing interests. G. O Buchanan's mill at Kaslo, which has been idle for three years, has been taken over by W. E. Cooke, mayor of Harvey, North Dakota. The town has given him a bonus of $5,000 and tax exemption for seven years. Three new mills are proposed for Burrard Inlet.

Conditions in the shingle branch of the industry are fair, prices remain the same, bolts are still high, and the scarcity of labor is affecting this as well as the lumber branch. Some shingles are exported to the other side, but the majority of the output finds a market in the Canadian west.

The higher price and scarcity of lumber is being felt in Vancouver, and while building is not seriously handicapped, many frame buildings contemplated have not been gone on with.

In the Kootenay, light snowfall last winter interfered with the getting out of logs, and summer logging has had to be resorted to. Now, low water is the drawback. Despite these conditions, it is expected the output of the Kootenay will reach 150,000,000 feet this season.

Messrs. G. A. Lammars and J. P. McGoldrick, of Stillwater, Minn., who are principals in the Royal Lumber Company, are about to open up their limits at Nelson, B.C. These people also own 55 square miles of timber on Moresby Island, near Port Simpson, and have sent up A. J. Mulvey to locate more. They have in view the erection of a mill as soon as the building of the Grand Trunk Pacific has progressed so far as to warrant a market for the output.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.

ST. JOHN, N.B., June 12th, 1906. —Since last writing the prospect for a good manufacturing season at the local mills has received a severe set-back, in the form of a strike on the part of the deal pilers. On Saturday last a demand was made for an increase of wages amounting to 15 per cent. or for $2.30 per day, where formerly $2.00 had been paid. Failing to receive a favorable reply the pilers at all the mills but three went out and operations have entirely ceased for the time being. At the three mills mentioned the pilers are working at the $2.00 per day rate, but it is feared that it will be only a matter of a day or two until they follow the example of the

others. It is generally believed that the strike of the pilers was but the beginning of a movement to obtain a higher schedule for the entire crews, and, taking this view of the matter, the employers, it is quite apparent, have resolved to go to almost any length rather than grant the increase asked. What the outcome will be is a mere matter of conjecture, but the trend of opinion leads to the conclusion that it may mean two or even three months of idleness for all the local mills.

Reports from the upper St. John River indicate a disappointing finish of the stream-driving season, which began so auspiciously. Handicapped by the scarcity of capable men and the unexpectedly rapid falling off of the water, the contractors engaged upon the work have found it impossible in most cases to bring more than a portion of the logs. This is particularly true of the far up-river districts, where many millions have been abandoned. Day by day reports are coming in that add materially to the volume of logs thus situated and already experienced river men are naming figures ranging from fifty to sixty-five millions of feet.

During the last few weeks the demand for "American" deals has been marked by a certain slackness due no doubt almost entirely to present and probable labor troubles in New York City and vicinity. The general impression is that the depression is only temporary and that with the removal of this obstacle it will be a matter of a very short time only until the values of a month ago are again prevalent.

The prospects for the manufacture of "American" logs intended to be sawn at local mills was below the average. This circumstance in conjunction with the fact that a large percentage of the logs will not come out this year, added to the probability of continuity of the labor troubles, all tend to the likelihood of the volume of shipments of deals from this port to United States being, during 1906, much smaller than has been the case for many years. At present writing no important quantity is ready for shipment.

It is improbable that a quotation could be obtained on any large quantity of "American" deals for summer or early fall delivery, but for such small quantities as are available figures closely resembling the following would be asked : 10's and 12's, $18.50 to $19.50 per M. ft. 9 inch, $15.50 to $16.50 per M. ft. 6's and 8's, $13.50 to $14.50 per M. ft. f.o.b. St. John.

Charters to New York City by schooner are being made at $3.75 per M. ft. on deals and 80 cents per M. on lath.

CONVENTION OF MOUNTAIN LUMBERMEN.

The quarterly convention of the Mountain Lumber Manufacturers' Association took place in their rooms at Nelson, B. C., on Tuesday, June 5th, President F.W.Jones in the chair.

Those of the members present were: F. W. Adolph, of Adolph Lumber Company, Baynes Lake; J. G. Billings, Yale-Columbia Lumber Company, Nakusp; J. F. Bridges, Coothers Lumber Company, Leclair; F. D. Becker, Staples Lumber Company, Calgary; W. E. Cook, Kaslo Lumber Company, Kaslo; D. B. Dalmage, Robinson-MacKenzie Lumber Company, Cranbrook; J. Deschamps, Blue & Deschamps, Rossland; J. A. Dewar, Porto Rico Lumber Company, Ymir; F. W. Jones, Columbia River Lumber Company, Golden; M.B.King, King Lumber Mills, Cranbrook; P. Lund, Crow's Nest Pass Lumber Company, Wardner; T. A. Ludgate, Big Bend Lumber Company, Arrowhead; W. J. Robertson, Yale Columbia Lumber Company, Nakusp; Otis Staples, Otis Staples Lumber Company, Wycliffe; S. Taylor, Standard Lumber Company, Fort Steele Junction; A. E. Watts, Watts Lumber Company, Wattsburg, and Geo. P. Wells, Secretary, Nelson.

The meeting was taken up largely in discussing and fixing standard sizes and in further going over the new grading rules, which are now in process of compilation and are about to be issued in book form to all the manufacturers.

Speaking of the meeting to a CANADA LUMBERMAN representative, Mr. Wells, the secretary of the Association, said : " It has been established that labor is very scarce and every means is to be taken to obtain outside a supply of competent and reliable labor for the interior mills. We think, however, that upon the lines we are pursuing to overcome this problem, we will have an abundant supply before long. Wages are high and the employment is of the very best to be had anywhere." Mr. Wells further stated it had been decided to let prices stand as they are at present, but at the next meeting, which will probably be held late in August, prices are likely to go up some, as the stocks at the mills, owing to the present great demand, will probably be very much lower than ever before at that time of the year."

The faces of the different members in attendance, one and all, reflected the healthy and happy condition of the lumber trade, all seeming to feel that now they will be able to make up, in part at least, what the recent hard times in the lumber trade has cost them.

The Vegreville Lumber Co. have opened up a branch yard at Mundare, Alta., with J. D. McAllister in charge The business of this firm is steadily increasing.

1 car 2 in. birch.
1 car 2 in. R elm.

Box 394, CANADA LUMBERMAN, Toronto, Ont

CURRENT TRADE CONDITIONS.

ONTARIO.

There are evidences that the heavy buying of lumber which was done earlier in the year placed a large percentage of the season's cut in the hands of dealers. Most of these dealers are in a position to carry the stock through any temporary depression which may occur and consequently there is little uneasiness because the demand is not as active as during the spring months. Dullness is usually expected around midsummer, and there is reason to believe that existing conditions will bring about an active trade a few weeks later. Even at the present time the consumption of lumber in building enterprises is large and dealers are obliged to buy from time to time in order to keep their stocks up. The claim is occasionally heard that hardwoods can be purchased at a lower price than was asked two months ago, but it does not appear that there has been any particular weakening in hardwood values.

Prices of white pine lath are exceptionally firm. The Sarnia list has this week been advanced 25 cents, making the ruling quotations $4.75 for No. 1 4-foot, $4.25 for No. No. 2, and $2.25 for No. 1 32-inch.

WESTERN CANADA.

Mr. John A. Christie, of Christie & Company, Limited, wholesale lumber dealers, Winnipeg, report that they have about everything cleaned out as regards stock This Company has always made a specialty of purchasing complete stocks, or a season's cut of a mill. Mr. Christie states that there is an unequalled demand, and that lumber retailers as well as wholesalers will take anything they can get in the lumber line. The prices throughout Western Canada are firm. There has been some considerable shipping from Rainy river to the States, and no American lumber coming in worth mentioning.

A Winnipeg lumberman showed a representative of the CANADA LUMBERMAN an order for a car load

of pine lumber. In a foot note to the letter it was stated, "if you cannot ship this pine at once, send spruce, or anything as long as it is lumber, we must have it."

EASTERN CANADA.

There is little change in the lumber situation in Eastern Canada. Shipments to the Eastern States are less active on account of the break in prices there, but most manufacturers on this side of the line are maintaining a firm stand, believing that all the lumber manufactured will find a market. Rafting operations on the St. John river are proceeding satisfactorily, the Fredericton Boom Company having secured 8,000,000 feet last week. It is not yet known, however, what quantity of logs will be hung up, although one estimate fixes 25,000,000 feet as the amount.

New Brunswick cedar shingles are weaker and can be procured at $3.60 on Boston freight rate. Predictions are made of still lower prices.

UNITED STATES.

Midsummer dullness now characterizes the lumber markets of the United States. The demand is quieter than it has been for several months, the recent weakness in Southern pine having caused a feeling of uncertainty and induced likely buyers to defer the placing of orders. There has been no betterment in southern pine prices, which are barely steady at the late decline. In hemlock, too, some weakness is shown, although some manufacturers still claim to be getting list prices. Hemlock piece stuff is selling in the Chicago market for outside delivery at $19.50 to $20 for short and narrow stock.

The decline in spruce prices is now universally admitted and is claimed to be but the natural result of inflated values. The Boston market has dropped as low as $18 for lengths not over 20 feet. It is said that a considerable quantity of New Brunswick and Nova Scotia spruce has gone into the Eastern States, one Philadelphia concern having contracted last winter for 50,000,000 feet.

GREAT BRITIAN.

The consumption of lumber in Great Britian has lately shown more briskness, and as the supply is not large, the tendency of prices has been to advance. This applies particularly to spruce. At Liverpool £8 5s to £8 7s 6d per standard c.i.f. for specifications of 60 to 70 per cent. 7/8-inch is about the present value. Many of the standard sizes are well cleared out, and 4 inch x 7 inch, of which there is usually a superabundance, is bringing 20s per standard more than 3 inch. The consumption of white pine is not as active as that of spruce, but prices are firm. There has been considerable buying of hemlock, which is coming into favor on account of its cheapness. There is no improvement in the demand for birch, but it is understood that a number of importers are acquiring good stocks which they will hold in anticipation of an advance later in the year.

STOCKS AND PRICES.

J. R. Martin, assistant timber inspector, Nelson, B. C., reports that a great many cedar poles are going out of the Kootenay district into the States, some going even as far as New York.

The Cushing Bros. Company, of Calgary, has purchased the entire output of J. B. Winlaw's mill on the Slocan Railroad in British Columbia, and it is understood a deal has been put through for the purchase of Mr. Winlaw's entire plant and limits by Cushing Bros.

A number of men who have been employed on W. J. Noble's drive on the St. John river headwaters, returned to Fredericton last week. Mr. Noble has four million feet of logs hung up in the Southwest branch, and three millions in the main river, nine miles above Seven Islands. The balance of his cut of sixteen millions is in safe waters.

THE WESTERN LUMBER TRADE.

In the course of a recent conversation, Mr. A. Carney, of Kaslo, B.C., timber inspector for southeastern Kootenay, stated to a CANADA LUMBERMAN representative, that he was more than delighted with the condition of the lumber trade of the Mountains this season. "Not one mill that I know of," said Mr. Carney, "can ship a full order to date. Apparently the dealers were under the impression that there were large stocks held over at the mills and consequently they allowed their own stocks to run down. Now, they cannot begin to get orders promptly filled."

"The lumbermen," continued Mr. Carney "are afraid they are not going to be able to have any better stocks on hand in the fall, owing to the present demand cleaning them out as fast as they can manufacture. Nowhere have I heard of a single refusal to buy on account of the prices, the dealers being glad to pay the full list prices if they can only get the material."

SALE OF TIMBER LIMITS.

The annual sale of timber limits was held by the Departments of Lands and Forests, Quebec, on Thursday, June 21st, Hon. A. Turgeon, presiding. Mr. Dechenes acted as auctioneer.

The sale was a success, 1,378 square miles being disposed of and realizing a total of $283,655, an average of $203 per square mile, which is the highest price ever obtained for spruce limits.

The sale commenced slowly and and for a time the bidding was spiritless. Finally after a somewhat

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

brisk competition, Mr. M. Boyle became the purchaser of lots Nos. 21, 88, 97, 98 and 100 in the Upper Ottawa Agency, embracing some 250 miles at $225, $265, $245, $235, and $230 respectively, these figures being a considerable advance on the Government's upset prices. A small 18 mile lot in the township of Dechene, Lake St. John West, was next put up at $400 per square mile and finally adjudged to Mr. Paradis at $560 per mile. Another small lot of 4½ miles in the township of Kenigamic, put up at $300, was knocked down to the same purchaser at $416 per square mile. A 2½ mile lot in the township of Begin Grandville Agency, put up at $200, was adjudged after spirited competition to Mr. Maurice Quinn at the remarkably high price of $500 per square mile. The same buyer also acquired a small lot of 1½ miles in the township of Restigouche at $400 per square mile and still another of 5 miles in the township of Macpes, Rimouski West, at $1,000 per square mile, Mr. Quinn's final bid creating quite a sensation. $325 per square mile was given by Baron Lepine for 3½ miles in the township of Carleton, Bonaventure West, and Lefebvre & Mann paid $320 per square mile for 48 miles on the River St. Ann, D. Gaspe West.

More interest was shown at the afternoon sale, Mr. John Rowley, in trust for Mr. J. P. Mullarkey, contractor, purchased a number of lots on the Saguenay, at Sault aux Cochon, comprising 850 square miles, for which he paid $155 per square mile. Mr. Frank Bignell, P. L.S. of Quebec, secured 50 miles at Ruissleau and May Island for $265 per mile, Baron l'Epine bought a lot of 3½ miles at Bonaventure West for $325 per mile, and Lefebvre & Mann secured 43½ miles at Gaspe West for $325 per mile. Mr. Louis Cabot bought 39 miles on the Grand River, Gaspe East, for $300 per mile and then the Minister declared the sale closed.

The water powers, sixteen in number, were next put up at auction for yearly lease at an up-set price. Only three powers were sold, however. First falls on the Manicougan River was bought in by Mr. Delorimier, advocate of Montreal, for $2,005, annual rental and an agreement to comply with all the conditions as advertised.

Lot No. 9, the River Manouan Falls, was purchased by Hon. Senator P. A. Choquette at a yearly rental of $505, and lot No. 15, and the falls of the River Sault aux Cochon was purchased by Mr. John Rowley in trust for Mr. Mullarkey, for $505 annual rental.

HARDWOOD FLOORING SITUATION.

Manufacturers of oak, maple and beech flooring have enjoyed a very prosperous season. The hardwood flooring business has fallen for the most part into the hands of a group of very able men, sagacious enough to understand that they must not overload the market if they would have a fair price for their product. The maple and beech flooring plants, which are very largely located in Michigan, have an annual capacity of more than 300,000,000 feet. The output of these plants for the past year has been considerably less than 200,000,000 feet. Every producer has awakened to the necessity or keeping his output down to market requirements. There is a general impression that maple flooring manufacture is highly profitable, and as usual under such conditions competitive plants are constantly being built, with the idea of getting "a piece of easy money." These would-be breakers into a "good game" are not as thoroughly posted on what they are going against as they should be, or they would not be so zealous to get into the flooring making trade.

Hardwood flooring manufacture is a distinct calling, and every man who has ever gone into it has spent a lot of money in paying for experience. In the history of northern hardwood flooring production there is no concern with a small plant which has ever made any money; on the other hand the big plant calls for an investment running from $100,000 to $250,000 for factory, raw material, flooring stock and the carrying of accounts. It requires experienced and skilled workmen to produce a good quality of maple or beech flooring. Buyers view with suspicion the output of a new plant, knowing that it takes time to educate a force up to the high standard of manipulation and accuracy necessary for the production of high-class flooring from these very refractory woods. Manufacturers have in the past been obliged to spend nearly twice as many dollars per thousand feet in the actual production of maple flooring as have experts in that line during the last year or two. The manufacturer who has paid dearly for his experience is able to produce maple flooring at a profit, on a price basis that would mean loss to the amateur in the trade. There is no demand for any more of these plants at the present time, and the average producer of maple lumber will find his bank balance in as good shape, at least at the end of the first few years, if he sells his lumber to existing maple flooring factories, as by entering upon the production of the flooring himself. —Hardwood Record.

TIMBER LIMIT TRANSACTIONS

B. C. Howard has sold some 12,000 acres of timber limits on his Famine River property, in Beauce County, Qne., to the Silsby Lumber Company, of West Burke, Vt., who are about to erect a modern sawmill there. The price paid was $120,000.

The Dominion Government are asking for tenders up to July 11th for a license to cut timber on Berth No. 1271, comprising section 36, Township 9, Range 12, Province of Manitoba, containing one square mile.

DON'T YOU DARE LET GO

or give up the idea of handling our **SPRUCE LUMBER and LATH** merely because we have been unable to fill your orders for several months. We were unfortunate enough to run out of stock so that we could not take care of the spring trade.

Our saw mill has now been running full capacity for over 6 weeks and we are in a position to fill all orders promptly with bright new stock. All mail should be addressed to

THE RED DEER LUMBER COMPANY, BARROWS, SASK.

Telegraphic Orders can be sent to ELK GATE JUNCTION, C.N.R., Manitoba.

We use the American Lumbermen's Telecode.

1 car 1 in. spruce.
1 car 2 in. birch.
1 car 2 in. R elm.

Box 394, CANADA LUMBERMAN, Toronto, Ont

CURRENT TRADE CONDITIONS.

ONTARIO.

The volume of business is rather above the average for this time of the year, and very little complaint is heard in respect to conditions. Stocks are not accumulating any faster than is considered healthy, and the outlook is for a firm market for some time to come. There is a heavy consumption of building material. Building operations in Toronto show no abatement, the number of permits issued during the month of June being greater than in any previous month in the history of the city. For the first six months of the year the approximate value of buildings for which permits were granted was $6,195,470, compared with $4,494,326 for the first six months of 1905.

Hardwoods are steady but have made no gain from a price standpoint. Good stocks, however, are none too plentiful, and there is nothing in the immediate outlook on which to base a prediction of lower prices.

EASTERN CANADA.

The most important development of the past week was the termination of the strike of mill employees at St. John. The men have returned to work at the former rate of

wages and the mills are now in operation. The demand for spruce for shipment to Great Britain is improving and manufacturers are showing confidence in the situation. Offers for United States specifications are lower in sympathy with the recent break, but the limited quantity to be manufactured this season is expected to bring about a recovery in the near future. The latest reports from the drives on the St. John river indicate that probably 50,000,000 feet of logs will be hung up.

New Brunswick shingles are, if anything, weaker and have been offered in a few instances at $3.50 for Extras on Boston freight rate. Larger offerings of lath have also resulted in slightly lower prices.

UNITED STATES.

The movement of lumber is lighter than during the spring months, but recent inquiries indicate that buyers are looking around for stock for the fall trade. Crops are making satisfactory progress and the industrial conditions of the country continue unimpaired. The outlook for lumber is therefore satisfactory. Southern pine is selling in considerable volume at the recent decline in prices. White pine is firm, with a good demand for the coarse grades. Hemlock is in a strong position, as dry stocks are exceptionally light for this season of the year. In the Saginaw Valley 2 x 4 inch, in 12 and 14 foot lengths, is held at $19; 16 foot at $20, and 18 foot at $23. There is a fairly active trade in hardwoods, with no over-stock excepting in maple, of which the supply is quite liberal.

GREAT BRITAIN.

The strong position of Canadian lumber in the British market is now generally admitted. The demand for spruce is good, with 3 x 9 and 11 inch deals inquired for quite freely owing to stocks having become depleted early in the spring. There is also considerable inquiry for waggon lengths in 2½ x 7 battens. Prices show no signs of weakening but are likely to go still higher before the end of the year. White pine deals are also considered excellent property with prospects of an early advance. Red pine is quieter. There has recently been some fair buying of Quebec birch, but complaint is still heard of an over-supply of St. John and Halifax shipments.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., June 25th, 1906.—There is no diminution in the active conditions of the lumber industry. "With the promise of good crops in the Northwest this year," remarked Mr. T. F. Paterson this morning, "the outlook is excellent, and I have not the slightest anxiety regarding the demand for lumber for the next year, or even two years. Everything is looking fine for business. In the logging, prices are firm and the demand strong. Figures range $6, $8, $10, delivered, and the raw material is scarce at that. Of course, the demand for lumber causes the scarcity of logs, and this season there are many hundred thousands of feet of timber being taken out more than in other years. With all this, the mills are not over supplied. Lumber prices remain the same as at last quotation, based on $15 for rough."

At the Chemainus mills, a night shift is being put on to cope with the business. Most of the cut from that mill is exported to foreign ports, but considerable is shipped via the C.P.R., and this railway company is using a lot for its own purposes.

Three new mills are contemplated for Burrard Inlet, one of which, that being erected by Mr. J. S. Emerson, at Port Moody, being almost ready.

Interior lumbermen are receiving strong protests from the newspapers for sending printing out of the country. There is a large number of Minnesota people in the lumber business in the interior, and the statement is that they are sending their printing to houses in Minneapolis. It was only a short time ago that the newspapers gave able support to an agitation respecting leases, which was successful in attaining the object sought, and they think this is hardly fair treatment now.

Shingle prices range from $1.90 to $2.00 f.o.b. here, and the conditions are without change to any great extent. There is a fair business, with quite a few shingles going over the line. The recent strike in the Puget Sound mills will affect the market in British Columbia is the opinion of a manufacturer expressed to-day. He points out that the prices over there are now going up, and the reduction in output will keep their shingles out of the Canadian market, while giving more room for the B.C. article in American territory. Altogether, the shingle business is in good shape.

The Chinese boycott is bringing trade to mills in this province, in preference to those on Puget Sound. Formerly all the business went to the United States, but coast mills are now shipping regularly to Hong Kong.

A feature of recent trade in connection with the mills at New Westminster is the shipment of a large amount of lumber to Nome. When it is remembered that Seattle is the only Northern Pacific port having direct continual connection with Nome, it is remarkable that American business of this kind should come to British Columbia. New Westminster just now is very busy with all the mills in operation.

Spruce frames have sold in Boston this week at $23, although the general asking price for 9 inch and under is $24.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., June 28th, 1906.—The strike among the mill-hands, mentioned in letter of June 12th, has been settled after three weeks of idleness at all the local mills except one; the men have decided to go back, unconditionally and at the old rate of wages. By July 2nd it is expected that all the mills will be running at their full capacity. The period of idleness will affect the season's output to the extent of from fifteen to eighteen millions of feet of long lumber alone.

Log driving operations on the St. John river are not materializing as favorably as was hoped, earlier in the season, would be the case. The indications are that the estimates of the probable hang-up mentioned in last letter (fifty to sixty-five millions of feet) were well founded.

A feature which is of much interest to local lumbermen is the compact which has been made by the most prominent of the Maine manufacturers to curtail the output of deals during the balance of the season. This circumstance, coupled with the fact that New Brunswick's output of "American" deals will be far below the average, will no doubt have an immediate effect upon prices in the New York markets; an effect which will speedily manifest itself in a tendency toward higher prices. Locally the feeling in regard to "American" deals is rather unsettled and uncertainty in regard to the future is present in a marked degree.

The local demand for N.B. spruce for shipment to Great Britain is of such a nature that all that has been manufactured so far this season, as well as all that can be manufactured for several weeks to come, has been disposed of for early shipment. Shipments have been keeping pace with the mill cuts and during the recent strike the wharves at all the local mills have been practically cleaned up of "English." For the balance of the season, the output at this port and along the river promises to be about normal, providing that some unlooked for obstacle does not arise to prevent.

Local interested parties seem to have every confidence in the immediate future as regards the sale of N.B. spruce in the markets of Great Britain. Reports tell of prices that have held firm in the face of heavy receipts, and while the demand is not so strong as the indications of early spring seemed to promise, a healthy volume of business is confidently expected.

At present writing an enquirer for this line of goods would be quoted in the vicinity of $14.00 per thousand superficial feet, f.o.b. St. John, on a specification containing say 50% 7's and 8's, 35% 9's, and 15% 11's and up, two-thirds price for Fourths and Ends.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN)

OTTAWA, June 30th, 1906.—The lumber manufacturers in Ottawa are producing in very large quantities for the foreign market. The sales are so large that they are unable to get sufficient shipping facilities. The shortage of cars has been a cause for complaint for some weeks and recently the chief lumber shippers found that they could not even get enough barges. A well known mill owner says he would send a greater quantity of pine deals if he were not confronted with this transportation problem. Shipments to England get the preference on the barges, so that the home trade suffers most when there is a difficulty in movement. The supply of barges and cars the lumbermen say is not less than it was in other years but the heavy sales surpass previous records. The output of the mills is loaded and sent away just as soon as it is available. The month of July usually witnesses a slump in the lumber activity, but the prospects are that this year will be an exception.

The immense sales of white pine, and at high rates, have had the effect of advancing spruce a dollar per thousand. Other quotations are continuing firm and the manufacturers are most happy in the progress of their industry.

No. 1 white pine lath at $4 a thousand is in great demand in the United States and the second grade is selling equally well to Canadian purchasers.

The local lumbermen report the drives as making satisfactory progress. There is considerable discussion among them as to the proposed prohibition of Sunday labor in moving logs. The new Lord's Day Act declares this kind of work to be illegal despite the protest on behalf of the lumbermen. While Ottawa representatives of the trade say their policy has been to have as little Sunday work as possible, and believing that river drivers must have a day of rest, they assert that the absolute prohibition of Sunday work would be a serious handicap in bringing their logs to the mill. The breaking of booms would have to be attended to promptly for instance. In the early spring when creeks fill with the freshets these channels have to be used at once and it is often obligatory to labor seven days of the week. While Parliament declined to make special provision for this work it is stated that the lumbermen will be allowed to continue Sunday operations in cases of emergency by virtue of the clause which permits labor of necessity and mercy.

Mr. Peter Whelan, of the Sheppard and Morse Company, has gone to England as a delegate to the Imperial Congress in London and will look into British lumber conditions when abroad.

Hemlock lath are selling in the Saginaw Valley at $5 for No. 1 and $4.50 for No. 2.

Level road to G T. R. two and a half miles.

Apply to J. J. ANDERSON, Novar, or to A. A. SMITH, Millbrook.

BUSINESS NOTES.

The Elgin-Jarvis Lumber Company, of Toronto, is interested in a contest between Joseph Edgar of Sundridge on one side, and I. M. Clemens, of New Hamburg, on the other, for a sum of money, which has been paid into court by the company, as both parties claimed interest in the funds.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market continues firm but somewhat featureless. Heavy buying of white pine for the account of wholesalers is almost a thing of the past, as the bulk of the production to be disposed of in this way was contracted for early in the year. The retail trade, however, are quite busy, and from all parts of the province come reports of an active demand for building lumber. The drives in the north have made good progress and the cut of pine promises to be fully as large as that of last year. That all the stock will be required is now taken for granted, and there is little concern about prices. The lower grades are if anything, a little firmer. Hemlock continues strong, with the quantity of stock offering less than was anticipated. Some of the smaller manufacturers have offered birch and basswood at slight reductions, but the general market is not weak.

British Columbia red cedar shingles have advanced and are now quoted as follows for Ontario delivery: xx, $2.40; xxx, $3.25; xxxx, $3.47; xxxxx, $3.80.

UNITED STATES.

There is still a strong tone to the United States lumber market. Southern pine has recovered some of the recent decline, and is now being bought quite freely by wholesale dealers in anticipation of a brisk fall demand. At Buffalo and Tonawanda the demand for white pine has improved during the past fortnight and all grades are selling more evenly than formerly. The lower grades are largely in the hands of the box manufacturers. Spruce is not as weak as in the month of June, but large blocks can still be bought at a concession of from $1 to $2 per thousand. Hemlock values are firm. Chicago dealers are quoting No. 1 hemlock

piece stuff, 2 x 4 to 2 x 10, at $20 to $21. In the Saginaw Valley boards are quoted at $19 and $20 and piece stuff from $18 up, according to dimensions. The hardwoods are getting more plentiful but are going to consumption in considerable volume. Quotations in Michigan are: Elm, $22 to $26; basswood, $22 for No. 2 common and better, and $15 for culls; birch, $20 to $25; maple $16 to $18.

GREAT BRITAIN.

The demand for lumber in Great Britain has improved, but the consumption is still below what it should be. This is about the only unsatisfactory feature, as stocks are light and prices generally firm. For spruce importers are paying an advance on the quotations ruling two months ago. Good pine deals are in fair demand, but sidings have accumulated to some extent. Wide deals are worth about $165 per standard of 1,980 feet board measure. There has been an active consumption of oak and birch, but large receipts of the latter from the Maritime Provinces have been against the price, which still shows weakness. Birch planks are being enquired for more freely.

RED CEDAR SHINGLES.

Another advance has taken place in the price of red cedar shingles. The advance of 5 cents in Washington about two weeks ago was followed by a similar increase last week, and on Saturday last the British Columbia manufacturers followed the initiative of the Washington mills by advancing prices for shingles for eastern shipment by 10 cents. There is a brisk demand, but the strike of shingle weavers had no doubt much to do with the advance. The strike and increase of prices on the other side should make things better in British Columbia. It will give the Canadian product the Canadian market, and besides will make them more in demand on the American side, where large exportations are constantly made.

The shingle mills, it was announced, would resume operations this week in an effort to break the strike, but at the time of going to press no definite news regarding the situation had reached us. For the past twenty days mills representing about 75 per cent. of the output of red cedar shingles in Washington have been closed down, which has strengthened the market to a wonderful degree.

THE GLASGOW MARKET.

In issuing their half-yearly report of the Glasgow market, Messrs. Edmiston & Mitchell say:

The most prominent examples of reduced stocks, as compared with same date last year, are spruce and pine deals, which are less than a half in the case of Quebec deals, and only a fifth of the Low Port stock at 30th June, 1905. Of Quebec logs, the only examples of an increased stock are elm and birch, the latter having been imported pretty freely of late.

As regards the consumption during the past six months, this, in most items, shows a regrettable falling-off, as the following examples will show. Pine and spruce deals are about 12,500 standards as compared with 18,600 standards for the first six months of 1905 and Quebec logs 5,800 loads against 6,400. Examples of an increased consumption are Oregon pine, birch and American oak, all of which compare favorably with last year.

Taken as a whole, the import is somewhat less for the six months than for the corresponding period last year.

In the sense that prices generally are very firm, the market may be said to be in a favorable condition, but it must not be lost sight of that this is caused not by an active demand existing, but because of light stocks and light imports. In the event of an improved demand setting in, prices would be likely to advance very smartly, as, even apart from the small stocks on hand, there is the fact that most buyers have for some time back pursued the policy of purchasing only for immediate requirements, and where a few years ago they would have carried a considerable stock, nowadays, they seem to aim at keeping this down to the lowest possible point.

WHITE PINE.—The import during the year to date has been of a trifling nature, consisting as it does of 52 loads, which came forward in one or two Liner shipments. The stock is moderate, being 250 loads under that at the same date last year. There is only a moderate demand, but values, nevertheless, continue firm.

OAK.—The stock of Quebec timber at 758 loads is about 340 loads less than at same time last year, and consists largely of second-class wood. The consumption for the first six months to date is about 50 per cent. over that for the same period last year. A good demand exists for first-class wood, and values continue on a very firm basis.

ELM.—A moderate demand exists for first class rock elm, but inferior timber is hard to move. The stock is low, and consists almost entirely of second-class wood. The fresh arrivals coming to hand should meet with a good outlet at remunerative rates.

QUEBEC BIRCH.—The June import is represented by 1,342 logs, some of which were deliveries against contracts, and part on consignment. A few sales are reported to have been made ex quay and ex store, but in most cases at unsatisfactory prices. There is a fair quantity of birch on the market unsold, and almost no demand, so that pressure to effect sales makes for lower prices, and the only apparent way to bring about an improvement

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

would be the curtailment of shipments.

LOWER PORT BIRCH.—There has been no import during the past month—neither logs nor planks. There is an ample stock to supply the market requirements for some time to come, and prices are weak.

BIRCH PLANK.—There are enquiries for 2½-inch and 4-inch planks, and shipments of these would meet with ready sale.

ASH.—A few logs are coming forward from time to time, and have been in all cases disposed of from the ship's side at fair prices. Really prime white ash logs are asked for, but the most of those coming forward are brown in color or ringy ended.

DEALS, &C.—The import of Quebec deals and sidings has been on a smaller scale than for some years past, but nas proved quite sufficient, in most instances, to meet the market's requirements. Pine sidings have come forward too freely, with the result that the stock of same has assumed heavy proportions, and is now fully double of that at 30th June last year. Spruce is in active demand, and any consignments coming to hand meet with a ready sale ex quay. Current values are as under:

BROAD FIRST PINE DEALS.—£33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25 10s.

SECOND PINE DEALS.—11-inch and up, £20 to £22; ends and non-dimensions, £14 to £15.

THIRD PINE DEALS.—11-inch and up, £12 to £14; ends and non-dimensions, £10 to £10 10s.

RED PINE DEALS.—9 and 11-inch, £9 10s to £10 10s; narrows, £8 to £9.

FIRST PINE SIDINGS AND STRIPS.—9 to 10-inch, £23 to £24; 11 to 12-inch, £25 to £26; 13 to 14-inch, £27 to £28.

SPRUCE DEALS.—9-inch and up, £9 to £9 10s; 7 and 8-inch, £7 15s to £8 5s.

LOWER PORT PINE AND SPRUCE.—9-inch and up, £8 5s to £8 15s; 7 and 8-inch, £7 10s to £8.

WESTERN CANADA NEWS.

Another new market for British Columbia lumber has been opened up. For several years all the orders for lumber used in Hong Kong have been placed in the United States, and probably the companies would have retained them, but the Chinese boycott on United States manufacturers some little time ago, gave British Columbia firms a good chance for new business, with the result that Messrs. Lemon, Gonason & Co., have orders to send by each steamer which leaves Victoria for Hong Kong, a fairly large shipment of lumber, generally about 40,000 feet. It is very likely that these orders will increase considerably. All the local mills are now working to their full capacity, and the orders for shipments of lumber to the Yukon and the Northwest seem to be placed equally amongst local firms. The Shawnigan Lake Lumber Company's mill on the lake is now turning out about 60,000 feet per day, and the orders are coming in so plentifully, that the mill is kept up to this output.

Lumber rates from Puget Sound to coastwise points are on the increase. The rate from Washington to California points is now higher than it has been for years, and shippers state that they expect the price to continue soaring. Shipping men state that the advance in price is occasioned by a shortage of vessels to take cargo to coastwise ports. Practically all of the steam schooners operated from San Francisco, which handled the large part of the trade, have been tied up. Vessels now on the run cannot begin to handle the amount of lumber offering.

TIMBER LIMIT TRANSACTIONS.

Guy Moulthrop, general manager of the Moulthorp Lumber Company, John's Island, Ont., recently closed a deal for 25 square miles of timber limits near their mill. The timber was purchased by Mr. Moulthrop and Moon & Macdonald. This will give the Moulthrop Company a ten-year stock for their mill, which has a capacity of about 23,000,000 feet annually.

TIMBER AT QUEBEC.

Following is a comparative statement of timber, etc., measured and culled at the Supervisor of Cullers' Office, Quebec, up to July 4th:

	1904 C Feet	1905 C Feet	1906 C Feet
Waney White Pine...	987,880	883,640	434,720
White Pine.....	69,920	61,440	30,520
Red Pine.....	2 000	920	560
Oak	121,760	9,680	208,920
Elm	131,400	399,200	333,520
Ash.....	1 ,2,0	8,720	3,360
Butternut.....	....	120	....
Birch and Maple	111 960	197,600	148,360

The following are the retail prices for spruce lumber at Edmonton, Alberta:

Sills, 4 x 4, 6 x 6, 6 x 8, 8 x 8, $20; sills, 8 x 10, 10 x 10, 10 x 12, 12 x 12, $21; sized dimension up to 8 in. wide, up to 16 ft. long, $21; sized dimension over 8 in. wide, up to 16 ft. long, $22; No. 1 dressed sheeting to 8 in. wide, $20; No. 1 dressed sheeting over 8 in. wide, $21; dressed flooring and ceiling, 4 in., $26; dressed flooring and siding, 6 in., $25; dressed shiplap, 6 in. wide, $23; dressed, 8 in. to 10 in. wide, $24; finishing lumber, D. 1S. or D. 2S., $30; No. 2 dressed sheeting, 6 in. wide, $17; No. 2 dressed sheeting, 4 in. wide, $14; shorts, 4 in. wide, D. 1S. 6 ft. and 8 ft. long, $12; shorts 6 in. to 12 in. wide, D. 1S., 6 ft. and 8 ft. long, $16; boards, in the rough, 1 x 4 to 8 in. wide, $20; boards in the rough, 1 x 10 and wider, $20; plank 3 in. thick to 8 in. wide, $21; plank, 3 in. thick to 10 in. wide and over, $22; spruce lath, $3.75.

Manufacturers of

SPRUCE LUMBER and LATH

Annual Capacity 40,000,000 Feet Spruce Lumber.

Annual Capacity 6,000,000 Spruce Lath.

DON'T YOU DARE LET GO

or give up the idea of handling our **SPRUCE LUMBER and LATH** merely because we have been unable to fill your orders for several months. We were unfortunate enough to run out of stock so that we could not take care of the spring trade.

Our saw mill has now been running full capacity for over 6 weeks and we are in a position to fill all orders promptly with bright new stock. All mail should be addressed to

THE RED DEER LUMBER COMPANY, BARROWS, SASK.

Telegraphic Orders can be sent to ELK GATE JUNCTION, C.N.R., Manitoba.

We use the American Lumbermen's Telecode.

W. F. HUNTTING LUMBER CO. LIMITED, VANCOUVER; B. C.

LUMBER & SHINGLES

Send us your hurry-up orders for shingles. Our new saw mill will soon be in operation; advise us of your requirements now.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is very little complaint respecting the lumber market. Consumption keeps up remarkably well and stocks are not accumulating to any extent. All grades of white pine are in steady demand with the possible exception of good sidings, which appears to be less enquired for of late. Holders are showing no concern, however inasmuch as a shortage of white pine lumber is more probable than a surplus, and while prices may not advance, they are not likely to recede much from current quotations. Log run pine from small logs is worth about $20. An abundant harvest such as now seems assured will greatly help the lumber market. Hardwoods are offering in considerable volume, but prices have in most instances been well maintained. The light production this season should soon exert an influence upon values, and this fact should not be overlooked by prospective buyers. At present prices hardwoods are good property.

EASTERN CANADA.

For building lumber there is a good demand in Montreal, where the season up-to-date has been the most active on record. Retail stocks are not large and prices generally are firm. The outlook for spruce in the Maritime Provinces is considered satisfactory, as the enquiries now being received show that the demand is expanding. Judging from present conditions, it is probable that about sixty million feet of logs will be hung up this year on the St. John river. This in itself will impart a strong tone to the lumber market.

Lath and shingles are weaker. "Extra" cedar shingles are now offered at $3.50 and "Clears" at $3.00 for Boston delivery, a decline of twenty cents within about six weeks. The tendency of prices is downward, but as the fundamentals are strong, the break is not expected to go much further.

UNITED STATES.

More active enquiry for southern pine during the past week is believed to be the beginning of the fall buying movement. Prices are showing less weakness, the closing down of the mills having inspired confidence in a marked degree. The shut-down is expected to result in a reduction of 225,000,000 feet during the months of July and August. White pine conditions are very encouraging. There is a good demand from builders as well as from large manufacturers. The spruce situation is somewhat unsatisfactory owing to the failure of the curtailment movement. It was found difficult to secure combined action, and consequently the idea was abandoned for the present, leaving each manufacturer free to act on his own responsibility. Spruce frames, 9-inch and under, are quoted at $23, and 10 and 12 inch dimension at $25. Plain oak is scarcer than any other hardwood. In Chicago $43 to $47 for firsts and seconds in car-load lots is the ruling

price. The demand for hardwoods generally is fair, but could easily be better. Hemlock lumber is showing exceptional strength. Sales are reported on Lake Superior for water shipment at $14.50.

GREAT BRITAIN.

A quiet but steady trade in lumber is about all that is expected by British dealers this year. That the demand has some snap is shown by the extent to which the stock arriving daily is absorbed. The market for Canadian pine and spruce, while not active, is especially firm for St. John cargoes, with the usual 65 to 70 per cent. of sevens and eigths, probably a bid under £8 5s. would be looked upon as a figure acceptable to shippers, but in view of the few cargoes they have at present to offer, brokers are adopting a somewhat independent tone. The stocks of spruce in Liverpool at the close of the half-year are 17 per cent. less than the corresponding month last year, whilst in Manchester they are nearly 50 per cent. less than at the end of last June.

STOCKS AND PRICES.

Wholesalers of red cedar shingles are quoting $1.85 for stars and $2.15 for clears, f.o.b. Washington.

The cooperage trade at Buffalo, says the American Lumberman, is in a promising condition and prices are good and tending higher. The cooper shops are making a fair profit, in spite of the slow movement of flour. The expected apple crop is really the thing to aim at now and all branches of the trade are putting their business in order for the big demand in sight from that direction. Following are latest local stock quotations: First class dry elm flour barrel staves, $9 to $9.50; first class basswood heading, 6 to 6¼ cents; coiled hoops, $9.50 to $10.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.

VANCOUVER, B. C., July 9th, 1906.—"I have never seen a spirit of greater buoyancy among the loggers than at present," was the remark of Mr. John Murray, timber ranger for the provincial government, who has just returned from a trip up the coast. "It used to be that booms would pile up until they were very large, and there would be considerable haggling over prices and towing. Now a deal can be fixed up in short time, and everybody satisfiied. I have never seen more men seeking timber, which is a pretty good indication of how things are in the industry. All along the coast logging is humming, and too many logs cannot be turned out. So great is the demand that mills have purchasing agents in the camps, and as soon as booms are of fair size they are snapped up."

Prices for lumber and logs continue the same, and very firm. The Mountain Lumber Manufacturers' Association decided not to increase the schedule after all, but there are a number of members who contend that the figure will have to go up, as cost of production is greater. Labor particularly is scarce all through the province, and in small towns in the interior this lack is felt to a greater degree than on the coast. Mills have all the orders they can attend to.

New markets are opening up in the Orient and the Fiji Islands. Lemon, Gonason & Company, of Victoria, are shipping every month by steamer to the former, and the Moore & Whittington Lumber Company, also of Victoria, are sending lumber to the latter place.

Both domestic and foreign demand is very good. An instance of what is being shipped over-seas is shown by the fact that during the whole of last year the Chemainus mills sent 20,392,072 feet to foreign ports, while for the first six months of this year the shipments totalled 14,102,791 feet.

Duncan McDonald, the railway contractor of Winnipeg, has placed orders for 4,000,000 feet of bridge timbers during the past four weeks on the coast. This business was originally given to the Canadian Pacific Lumber Company, but other orders on hand prevented it being handled.

Tenders are being called for 535,000 ties for Grand Trunk Pacific construction, to be in by July 12th, and other tenders for 1,010,000 more to be in by September 14th. The B. C. Tie & Timber Company is in the field directly for this business, having a mill on Kaien Island, and Americans have been securing timber up the coast to also get a share of this trade.

Expansion of the industry is shown by the large receipts from timber licenses and royalties for the fiscal year which closed on June 30th. The amount was nearly $600,000, compared with $412,000 for the year preceding.

Building operations in the city of Vancouver are slower than would be the case if lumber were not so high. Frame dwellings cost half as much again now than three years ago.

The continued steady demand for lumber is beginning to pull down the stocks in the yards of the mills. An appreciable decrease has been made in them of late.

The Mundy Lumber Company, which has a mill at Three Valley near Revelstoke, have been charged with an infraction of the alien labor law. They are alleged to have brought fifteen men from Bradford, Pa., where the head offices are located.

Frank C. Rice, of the Rice & Lockwood Lumber Company, New York, has been looking over the spruce situation in Nova Scotia. He reports a stronger spruce market and says that within a few weeks there is no queston but that prices will advance materially.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., July 13th, 1906. —As conjectured in my letter of June 28th., the strike at the local mills ended on July 2nd. All the mills are running at the old rate of wages and no further difficulty is expected in that regard.

Logs are coming along freely, although but few new logs from the far up-river districts have been received as yet—logs of 1904-05 cut only have been received from that direction to date. Later and more authentic reports fix the total of the actual hang-up at from fifty to sixty millions of feet. For several weeks to come it is probable that no difficulty will be experienced from this source, but it is quite probable that mid-Autumn will find a considerable scarcity, particularly of spruce.

The situation as regards short lumber has been rapidly developing new features in the way of prices during the past few weeks.

Spruce lath are less firm than when last mentioned. The cause of this effect is to be found chiefly in an entire lack of confidence on the part of buyers, whose operations are of sufficient volume to cover only immediate wants; offers for future delivery are of such nature as to be, in most cases, unattractive to the seller. Business in this line is consequently quiet and no immediate improvement is expected. It is generally felt that, before such an improvement will materialize, the volume of offerings must be considerably lighter than at present.

Locally, spruce lath are by no means plentiful—3,500,000 would cover all available at the local mills and no one manufacturer has in stock at this date more than 700,000. Ideas of local people in regard to value vary somewhat, but it is doubtful if a better offer could be obtained than $2.15 per thousand for dutiable lath, f.o.b. St. John, for delivery during August.

New Brunswick cedar shingles have shown unmistakeable signs of weakening in the United States markets. The demand having lost its snappiness, the effect upon prices was immediately perceptible. Prices are now practically the same as was the case before the stimulus of the late spring.

Local stocks of high grades are somewhat lighter than is usual at this time of year—one million of "Clears" and one and one half millions of "Extras" would be the outside figure to cover the quantity.

An enquirer for cedar shingles would be quoted on dutiable goods, f.o.b. St. John, for immediate delivery, as follows: "Extras" $2.75; "Clears" $2.25.

Local dealers have had no difficulty so far this season in disposing of the lower grade shingles for consumption in the Provinces. Trade in this line has been very brisk and at this date sales in carload lots are being made at the following figures:—"2nd Clears," $1.80; "Ex. No. 1's," $1.25; "No. 1's," $1.00 (f.o.b. St. John.)

Charters by sailing vessel are being made to-day as follows: New York City, lath, 75 cents; Boston, shingles, 30 cents. Indications point strongly to the fact that rates in this line will be somewhat weaker in the near future.

The estimated output of the Spanish River Boom Company this year is 150,000,000 feet, half of which is now out.

HARDWOODS.

Of hardwood conditions the Hardwood Record of Chicago says: "The hardwood trade of the country is generally moving on in a steady and fairly satisfactory manner. As is natural at this time of year, there is not the activity and vim in the business that has prevailed during earlier months, but prices are well maintained and the outlook is excellent. The woods in particularly short supply, which are doing extraordinarily well in the market, are plain white oak, poplar, cypress and cottonwood. Red oak seems to be getting back into fair supply in first hands, and apparently there is not an excess of quarter-sawed stock either in white or red being produced at this time. In northern woods inch maple is the best seller, the demand still being very heavy from the flooring makers, but the price is relatively low. Basswood has done better for some weeks, but still it has not achieved a value on a par with poplar and cottonwood. The market in gray elm, birch and beech is featureless."

The Mississippi Valley Lumberman says: "There is a good run of country yard business this week reported in hardwood lumber. Wagon stock is particularly strong while the demand for flooring is exceptional. There is also a fair amount of basswood ceiling moving into the country districts. Prices on all of these items are well maintained, and the supply is ample, but holders are not anxious to part with stock. In drawing comparisons with a month ago the trade from the country is stronger and much ahead of what it was at any time during May. This is due undoubtedly to the general movement on the part of the retail trade not to place orders in the hope of a weakening in the price situation. The demand from consumers, however, has been persistent, and they now find themselves sold down in stock to the point where they are forced to buy. The advance of the season to the time when it is necessary to make provision for the autumn business, is also stimulating the placing of many orders."

Tenders for cutting timber on the Hunting Ground Reserve, Township of St. Edmund, containing an area of 3,800 acres, will be received by the department of Indian affairs, Ottawa, up to July 26th.

CURRENT TRADE CONDITIONS.

ONTARIO.

Pine and hemlock lumber continue to exhibit remarkable strength, with nearly all grades moving freely. Prices are now at a point from which they are not likely to advance very much, but it may be said with equal certainty that they are not likely to decline. So much of the stock has passed out of first hands that there is no pressure to sell. The United States demand is still an important factor, while the large local consumption is absorbing the low grade stock. As the season advances and there is no accumulation of lumber, the predictions of lower prices become less numerous. The hardwood market is steady, but as much stock was carried by wholesalers and dealers through last winter, it is being marketed at every favorable opportunity, and this is against an improvement in prices. When this has been absorbed and the decrease in the production this season is appreciated, prices will probably harden. The lath trade is good, and the scarcity of dry material is indicated by the Sarnia price, which is $4.70 for No. 1 white pine and $4.25 for No. 2.

EASTERN CANADA.

At present the outlook for the lumber business in the eastern provinces appears good. The demand is very strong in many parts of the Maritime province, and in many cases in excess of the supply, causing profitable orders to be declined from inability to fill them. Spruce and pine are much enquired for, and hemlock is also in considerable demand. Lath is a saliable commodity also. There are no heavy stocks being held over, everything is shipped as soon as ready. In some instances there has been slight inconvenience through shortage of boats for loading spruce for American markets.

Some prices realized for pine boards, 8" and up, 10 feet and up in length, were $25.00 f.o.b., and for spruce 6" and up, $17.00 f.o.b. Prices are firm and indications are that there will be little or no opening for lower prices. On the contrary the tendency is to rise.

UNITED STATES.

The market for building material is in a generally satisfactory condition. The demand is good. Some little difficulties of a local nature have existed, such as excess of orders over capacity to fill, or lack of transportation facilities. The harvest outlook is good and this has a favorable influence on the lumber markets.

The white pine market continues strong. As the season advances indications seem to point to a continuation of this, with a tendency towards higher prices. The supply has not been at all in excess of the demand nor does it promise that it will be. Northern hemlock is quite popular as a building material in the cities, and the country is increasing the use of it. Hemlock prices were affected by the recent drop in yellow pine, but the rise of that commodity has strengthened the hemlock market. The stocks in northern mills are not burthensome, and manufacturers are looking forward to heavier demands for fall trade.

Prices in shingles continue to advance in consequence of the continued shut down. This article is becoming scarce at a time when the output should be up to its possible extent to meet the demand.

GREAT BRITAIN.

There seems to be an improvement in the general tone of business with an upward tendency in prices. The trade in Canadian yellow pine deals, which has been declining for some time past has this year greatly diminished. This has been

caused by the demand of the American market, and should that country's demand for this article diminish, Canadians may find it necessary to return to the English market.

In Liverpool, the demand for spruce continues good. The recent strike in St. John, N.B., has had its influence in keeping back shipments. There has been no change in prices, fair specifications realizing £8 2s. 6d. to £8 5s. c.i.f. Liverpool. There seems to be no indications of lower prices for some time to come. The pine deal market keeps very strong and is likely to do so during the season.

In Manchester there is no perceptible change either in trade or prices, but the possibility of higher quotations in the near future seems apparent. Cargoes of spruce and pitch pine are going to consumers as rapidly as they can be got at, and present signs indicate a shortage for the winter season.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN).

OTTAWA, July 20, 1906.—Ottawa lumber firms will begin hiring men for the shanties about August 1st. There have been reports that it will be hard to supply the demand for men this year, owing to the extensive operations in railway construction and the big drain on the labor element for the western harvests. Enquiry where hiring has been done in Ottawa for outside lumber firms does not confirm this rumor. Mr. Philip Wright, a local agent, says he is sending away from forty to fifty men a day for the woods in the vicinity of Georgian Bay. The wages are from $26 to $32 a month or an average of $4 more than last year. As he sizes up the situation, activity in other industries does not attract the bushmen, for they prefer to continue the work they are accustomed to. The Turner Lumber Company, Carney Lumber Company, and Spanish River Lumber Company have taken several crews of choppers, hookmen and teamsters already. As years go by the operations in the shanties are started earlier in the season in order to devote the whole of the winter weather to hauling. J. R. Booth will not begin hiring for this season's operations till September 1st in order to escape the hot season in the bush.

The Sheppard and Morse mill has had difficulty recently to get a supply of logs owing to delays on the drives. It seems their logs are held back by other firm's supplies. The water in the Ottawa is about as good as other years and no complaint is heard from manufacturers other than the one mentioned. The timber is out of the tributary streams with one or two exceptions. Owing to low water in the Nipissing, J. R. Booth left a considerable quantity of pine there and some logs are held up on Petawawa belonging to Mr. Booth and the Hawkesbury Lumber Company

The large lumber companies operating limits in the Gatineau district have formed a company to conduct the drive on the Gatineau river which was for many years in the hands of Samuel Bingham. The new organization has a capital of $20,000 and comprises Hon. W. C. Edwards, G. B. Greene, W. C. Hughson John A. Cameron and John Gilmour.

The demand for spruce has had the effect of advancing the price a little and some higher figures are also offered for the best varieties of pine. The manufacturers report a growing activity in the shipping trade and local sales. Few of the mills are able to supply the demand for lath and no purchaser thinks of trying to break the high price that has been ruling all summer. The Americans would buy a good deal more of the No. 1 brand of lath if they could get them. It is not probable, however, that the keen demand will increase the high figure of $4.50 that has been paid in several instances.

Tenders are requested by the Department of Lands, Forests and Mines, Toronto, up to September 5th for the right to cut pine and other timber on tie and timber berths in Rainy River and Nipissing districts, along proposed route of G. T. P. R.

A TESTIMONIAL

The following letter speaks for itself:

OTTAWA, June 30, 1906.

Publishers, CANADA LUMBERMAN, Toronto.

DEAR SIRS, — Acknowledging your favor of the 29 h, we herewith enclose you our renewal on advertising in your weekly edition. We certainly have derived benefit from advertising in your publication, and will continue using the space that we now have till such time as we decide to increase it, which we expect will be in the near future.

Yours very truly,

W. B. BARTRAM & COMPANY

SPRUCE.

The growing importance of spruce as a marketable commodity is being recognized. The Timberman, of Portland, Oregon, speaks of the spruce board trade as follows:

"The recent action of the spruce manufacturers in creating a grade of spruce common is a proper and timely recognition of the value of the lower grades of spruce, which will have a tendency to widen its market and increase the profits of the manufacturer. Spruce is well adapted for the manufacture of boards. The knots are generally sound. It is a strong, light, tough wood, nails easily and is liked by carpenters. It is the equal of any western pine board and as its qualities become known will prove a ready seller. There has recently

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

been developed in San Francisco a demand for spruce boards which bids fair to continue. Heretofore the only outlet a spruce mill had for practically 50 per cent. of its cut, if it were not provided with a box factory or cutting-up plant, was to ship to the box factories in San Francisco, where the net returns would often not equal the freight charges. With the advent of the demand for spruce cut-up stock and factory lumber, there is a constantly decreasing quantity of box lumber, which already has made itself felt in a higher price."

HARDWOODS.

The American Lumberman, speaking of American hardwoods, says:

"At this time of the year the demand invariably falls off somewhat. In several instances this is the case at the present time, but in others a good business is being done. Regarding black walnut the demand for inch medinm and inch culls remains firm, the former being worth from $72 to $72.50 a thousand feet and the latter about $50. The demand for first quality wood is poor. There is practically nothing doing in quartered oak. First quality inch boards are nominally worth $75 a thousand, but business is difficult even at this figure. Plain oak planks remain in strong demand, and 3 and 4 inch wood is selling at from $40 to $42.50 a thousand feet. Inquiry for board is light, agents finding it difficult to obtain shippers' ideas of value. The market price for prime inch white oak is from $52.50 to $55, whereas shippers are asking $60. The market for poplar is steady, the chief demand being for first quality wood and culls planed on both sides. Inch boards, planed to seven-eighths inch and averaging from 13 to 14 inches wide in first quality, are worth $52.50 a thousand, the same size in the cull grades bringing $25. Medium or No. 1 common is worth about $35, but the demand is an ordinary one First quality satin walnut lumber is slow of sale at from $37.50 to $40 a thousand, but medium wood, which is in fair demand, is bringing from $27.50 to $30."

The Mississippi Lumberman says: "Trade with hardwood dealers is good, a number of the largest consumers being in the market for supplies. Implement makers are taking fair stocks, the furniture men are receiving more orders and show a disposition to anticipate their requirements of the future. Finish makers are well supplied with orders and are running at full capacity, so that consumption of hardwoods is in excess of last year. So far this month the demand is slightly less than for the same time in June, but the loss is not regarded as serious. Poplar is having a good sale and the market has a stronger undertone, with offerings not large. Oak of all kinds is regarded as good property, although red and white quartered is not selling as fast as of late. Ash is in lighter supply. Of other woods the the supply and demand was fairly adjusted, and firmness prevailed in prices Cypress is selling to the local factories and finish makers, and tank builders are in the market constantly for stock."

A. McDougall is now sole owner of the extensive property of the Fernie Lumber Company, Fernie, B. C.

JAPANESE HARDWOOD FOR VANCOUVER.

Messrs. A. P. May & Company, of Vancouver, B.C., have purchased a shipload assortment of Japanese hardwood from Messrs. Awaya Shinazo & Company, of Osaka, Japan, whose Canadian office is at 41 Davis Chambers, Vancouver, and is known as Awaya, Ikeda & Company. The lumber, it is said, consists mostly of Japanese oak, ash and other hardwood, and is carried by the sellers' own barque "Alden Besse," which is on the way now and expected to arrive in Vancouver early in August. This is the first venture both on the parts of buyer and seller to import Japanese hardwood into British Columbia, and if it proves satisfactory, it is said, they intend not only to continue but increase the business.

THE SHINGLE STRIKE.

A special despatch to the Vancouver Daily Province, a few days ago, spoke of the strike situation in the shingle mills on the Pacific coast as follows; "Shingle manufacturers are slowly re-opening the mills closed by the strike of weavers in sympathy with the Ballard strikers. The open shop rule is being enforced in most of the mills that have reopened, and gains were shown today in several sections where mills had union crews but decided to stand in with the manufacturers' mass-meeting in the demand for an open shop.

It is probable that one of the largest mills of the state, which was tied up with a union crew prior to the mass-meeting on Sunday, will insist upon the introduction of the open shop principle. If this is done the backbone of the union fight in Whatcom County will be broken.

The enforced closedown of the mills on account of the strike has created a marked shortage in clears, and is keeping down the supply of stars. Wholesalers believe the strike has settled for the rest of the year the queston of any danger from overproduction, and that prices will remain firm during the year."

It is the opinion of an authority on Algoma matters that the timber cut in northern woods will this year far exceed that of any previous year in the timber industry in Ontario. It is beileved that preparations are being made which will mean at least one-third of an increase over any year in the past.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber trade throughout the province continues active, and stocks are moving rapidly; for the most part shipping is going on as fast as transportation facilities can be secured. The only classes in which there are quantities held over are such woods as elm, maple, birch. Prices remain firm. Many buyers have refrained from laying in heavy stocks hoping that there would be a drop in the market. It is thought this action may tend to send prices up when buying starts.

The demand for hemlock is good and prices are firm. Some quotations on this article are No. 1-16 foot, $15; 12 and 14 foot, $14.50; 2 x 4 10's, $15. Prices realized for other woods have been quoted as follows: Spruce, $15; basswood, $20; birch from $18 to $23. Pine still continues in good demand and the prices are firm, with no tendency to be lower.

Lath and shingles are marketable commodities, the former being in the lead. Prices for lath have been quoted at, from $4.25 to $4.50 for No. 1 and from $3.50 to $4 for No. 2. It is claimed by some that the shingle trade in cedar would be more satisfactory if more of the best grade and less cedar butts were used for good buildings.

WESTERN CANADA

Generally speaking, the same conditions prevail in this part of Canada as elsewhere. There is great activity in all lines of industry and with the prospect of a bounteous harvest so close at hand indications point to a continuation of this. The building activity still continues and this of course means activity in the lumber industry. Stocks are reported to be moving actively, and only moderate amounts being kept on hand. The demand is good for all classes of lumber and prices remain firm. The general yard sales prices average about $2.50 per M. above last year. The outlook is quite promising.

Lath is in good demand also.

EASTERN CANADA.

The outlook is very promising for the lumber industry in this part of the Dominion, and seldom if ever seemed better. For spruce there is good demand for all classes. Basswood and birch are also enquired after.

There is considerable activity in the movement of stocks. Some large shipments have been made to South America and United States for which satisfactory prices have been realized. $15.00 to $15,25 has been offered for English deals, which indicates a healthy condition in that market. Prices generally are keeping firm, with little or no prospect of going lower.

The trade in lath is quite brisk and shingles are also a fairly salable article.

UNITED STATES.

There is not much change in the market for building materials, but the demand is up to the normal for this season. Since yellow pine has recovered from its recent slump there is a better tone in the market. The supply of this article is not so large as it was a month ago, in consequence of the curtailment in the operations of manufacturing districts. With the fall demand in view, it is thought prices should become firmer. The white pine situation is more satisfactory than it has been for some time. Stocks are building up, as the rivers are in good driving state and the log supply is coming in sufficient to keep the mills running. There is good prospect of a heavy fall trade. Prices are firm and likely to remain so and an advance might not be improbable. There has been a recent increase in the activity of the hemlock market. The demand from the country districts for this product is increasing. The mills consider that in another month they will have a well assorted and dry stock on hand to meet the requirements of the market, but it is not probable that the supply will be greater than the demand.

There is no change in the shingle situation. Strike conditions still prevail. So far the scarcity of shingles does not seem to be causing any serious difficulty to the trade.

GREAT BRITAIN.

The lumber outlook is considered very good. Indications seem in favor of better prices in the near future, both for planed and unplaned stuff. Floorings are in very good demand and prices keep fairly firm. Spruce does not show much change. Some quotations are £8. 5s. to £8. 7s. 6d. c.i.f. for 50 per cent narrows, the balance 9 in. and wider. There does not seem to be much offering in hemlock as the prices are on two high a basis.

In Liverpool business has been quiet. Little change is reported in the c.i.f. market. Spruce is firm. The demand is good and arrivals moderate. In floorings, square-edged boards are in demand, t. and g. are not wanted. Maple lumber is in poor demand. Oak is in good demand.

At the Manchester docks business is quite lively as there has been a very heavy list of arrivals. Some local and Liverpool firms are reported as receivers of heavy lines of pine deals, boards, sidings, red pine deals, boards, spruce deals, etc.

BRITISH COLUMBIA LETTER

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C. July 23rd, 1906. — "I think lumber prices have reached the highest point for this season," is the expression of Mr. Lester W. David, president of the Fraser River Sawmills, Ltd., of New Westminster, who was in the city on Saturday, "Although mills are away behind on orders I see no reason why the price should go up. Neither do I see why the high price of lumber should have a deterrent effect on building as corresponding increases have been made in wages, logs, etc. Two or three hundred dollars more cost to a man is not going to stop his house from going up, but rather an additional cost makes it of greater value. Labor in the lumber industry just now, like other lines, in the west, is very scarce."

It might not be out of place to mention that the people on the Fraser river are considering giving a banquet to Mr. David, for re-establishing the lumber foreign trade from New Westminster.

While he is of the opinion that the higher price of lumber should not affect building operations, it is one of the causes of a shortage of dwellings in Vancouver. "People of small means have to consider every dollar of cost," remarked a builder this morning, "and I know that many mechanics who intended erecting houses have put off the work because of the increased cost. It is more difficult to get the right amount of a loan on such buildings, as the inspectors with the former price of lumber in their minds do not figure out how much the building would be worth to reconstruct, but rather consider what it would bring in a sale. I think that one of the reasons of the scarcity of houses in Vancouver is the high price of lumber."

Of the large amount of lumber which has been shipped to foreign ports from Vancouver this season, the cargo of the barque Makawell for Japan indicates that that country is becoming a very large consumer of British Columbia product. This ship carried 1,100,000 feet which will be used to build factories in Japan.

A feature of the market in the interior of the province is the demand for poles which are being shipped to the States, principally to New Jersey and Lousiana.

The McEwen Bros., of Seattle, who have control of the Sutton Lumber and Trading Company, which has just completed its big cedar mill on Clayoquot Sound, west coast of Vancouver Island, have made arrangements to place the whole of its products in the hands of consumers in the eastern States. Shipment will be made via the Horn.

An instance of the figures paid for logs is that a boom was sold in Vancouver last week for $11.50 per thousand. While prices are quoted as regular as high as $10, this bears out what was stated in the last letter that higher prices are being paid when the logs are badly wanted.

Dr. Davichand, a prominent Hindoo, states that he has contracted to supply $2,000 Hindoos for

employment in British Columbia sawmills. Manufacturers have found it next to impossible to secure the requisite amount of labor.

Charles Heidrick, president of the Pittsburg, Summerville & Clarion railway, is asking for information about timber limits in British Columbia. Joseph LaBlanche, president of the Canadian-American Lumber Co., with interests at North Bay, Ottawa, Sault Ste. Marie and Grand Rapids, Mich., may build here. Charles R. McLaughlin, formerly of the Ruby Lumber Co., Ohio, is erecting a large mill on the Fraser river.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N.B., July 28th, 1906. —The water in the St. John River is very low and is falling day by day. It is feared that, unless some heavy rains come in the near future, many logs will be hung in the main St. John from Grand Falls up, a locality which is under ordinary circumstances considered safe water. This was the case last year when the greater part of the cut of the previous winter was caught and did not come forward until early this spring. For present needs and for a few weeks to come, supplies of logs are ample and, just at present, they are arriving at St. John in considerable quantities.

The markets for N. B. spruce in Great Britain has, during the month, shown prospects of firmer values and the feeling among local people in this regard is consequently indicative of pronounced optimism. Shipments of "English" deals from this port during the present month have been somewhat below the average for this season of the year, —a circumstance due chiefly to the fact that—owing to the late starting of the mills and the time lost through the recent strike—supplies have been lighter than usual. These facts added to information received (the authenticity of which, considering its source cannot be doubted) which tells of light stocks and increasing demand throughout Great Britain, lead to the conclusion that the New Brunswick spruce trade has every promise of a period of more than ordinary stimulus.

At the local mills, stocks of "English" deals are remarkably light, the goods having been taken almost as quickly as manufactured and in many cases considerable difficulty has been experienced in obtaining cargo with sufficient rapidity. No one manufacturer has more than a few hundred thousand feet and the total quantity would not exceed two millions of feet. At present the output is about normal but, with the season passing rapidly, the total result of the season's manufacture will no doubt be considerably below the average, let the remainder of the season in this respect be ever so favourable.

Ideas of local people vary somewhat in regard to value of "English" according to the individual interpretation of the prospects, but an inquirer would no doubt be quoted from $13.75 to $14.25 per thousand superficial feet, on a specification of "English" deals, containing say 50% sevens and eights, 35% nines, and 15% elevens and up, f.o.b. steamer St. John, two-thirds price for fourths and ends.

Charters for deals to the West Coast are being made at from 34s to 37s/6 per standard, the variation in figure being due to the variation in size of vessel.

HARDWOOD.

The general conditions of the hardwood market are above the average of corresponding seasons for some years past. In some trade centres, plain white oak leads, with plain red as a second. In northern woods there is less activity than those of the south. Inch maple is generally contracted for, as manufactured. There is a slight surplus of thick stock. Owing to the immense quantity of buildings being erected the trade in flooring, of both oak and maple is large. The trade in mahogany and walnut continues much the same, with a slight increase in mahogany consumption. In Chicago, the local hardwood trade is quiet, but prices are keeping firm. Prospects indicate that the fall trade from consumers will be large. In Boston, the demand is not great. The majority of yards are well stocked and many consuming manufacturers are carrying quite heavy stocks. Prices are fairly well held. The demand for plain oak, one inch, is not great. Maple flooring is fairly active. In New York there is a slight falling off in the market. This is due more to a curtailment in buying than in consumption, as manufacturers stocked quite heavily early in the year and at present have sufficient for current need. Plain oak is reported slow. Quartered oak and maple are quiet and prices easy.

On July 31st Holland & Graves, of Byng Inlet, Ont., purchased from the Sarnia Bay Lumber, Timber and Salt Company five townships, each containing 36 square miles for $1,500,000. The townships are Hyman, Porter, Totten, Vernon and Berth No. 91, and they are located about 12 miles from Nairn Centre Station, on the Sault branch of Canadian Pacific. The limit is said to be the finest and most conveniently located block of virgin pine now standing on the north shore, and being located on the Spanish and Whitefish Rivers, the purchasers will have ample water facilities for floating logs down to the bay, there to be towed to their mills at Byng Inlet, near Parry Sound.

Sash and Door Factory For Sale

AT KILLALOE STATION, G. T. RAILWAY; well equipped, Double Surfacer, Planer, Power Mortiser and all necessary machinery. A splendid opportunity for a man who understands the business or for two men, one who could run the machine and the other the bench work; trade increasing every year. Price $3,000, cash preferred, but will give time on part. Good locality to secure stock. Apply to MOHR & CO., Killaloe Station, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber conditions throughout Ontario continue fairly satisfactory. The consumption is large, and as stocks are by no means heavy, there is nothing to cause any uneasiness as to prices. A brisk fall trade at prices not far from those now ruling is what is most generally predicted. The lower grades of white pine are getting scarce, the demand for box material being quite heavy. Finishing lumber is also moving actively. Enquiries for hemlock are quite numerous, and some difficulty has been experienced in getting certain specifications. The average price at the mill is about $15 for short and medium lengths. Hardwoods show no pronounced tendency, but we would not be surprised if prices should advance before many weeks, as the large stocks which were held a year ago are being gradually reduced. Elm and basswood are selling quite readily.

EASTERN CANADA.

A statement published in another column shows that the quantity of waney white pine which has reached Quebec this season is only 539,-

240 cubic feet, or about half of that of the previous year and little more than one-third of the year 1904. The light production should keep prices firm and probably bring about an advance later in the year. The receipts of oak at Quebec have been much larger than in 1905, while elm also shows an increase of about 100,000 cubic feet. There is a fair inquiry for spruce lumber, with a tendency towards higher prices. New Brunswick cedar shingles are still weak and sales have been made below $3.50 for Extras for Boston delivery. It is difficult to account for the weakness in New Brunswick cedars, as the demand for shingles generally is good. We anticipate some recovery in the near future.

UNITED STATES.

Reports from the United States tell of an irregular lumber market. The demand at Tonawanda is said to be quiet, with eastern retailers and consumers insisting on the shading of prices. Conditions generally are satisfactory, however, and the abundant yield of wheat, corn and cotton which is now promised is regarded as likely to result in a large consumption of lumber during the next twelve months. Hemlock and white pine are in a strong position statistically, as many large manufacturing firms sold their output on season contracts. Consumers are buying considerable hardwood lumber, which is being taken at the seller's price to a greater extent than pine. This is due, no doubt, to the fact that hardwood prices are relatively low. Shingle prices at Buffalo and Tonawanda are firmer, with the demand good.

GREAT BRITAIN.

The lumber market of Great Britain is showing unexpected activity and the outlook is more promising than for some time. Sales of spruce have been made for c.i.f. delivery to Liverpool upon the basis of £8 5s. per standard, but we understand that shippers are now asking £8 10s. c.i.f. Dealers who deferred closing contracts in the hope of getting better terms have been disappointed and are now entering the market with some freedom. A gradual rise in prices is predicted, but much depends upon the shipments from Russia. If by any chance the shipments from Russia should be cut off, the prospects for Canadian lumber in Great Britain would be much improved. At a recent public sale some 3 x 9 inch second quality spruce deals from Montreal sold at £10 5s. per standard, and a quantity of 1½ x 9 inch fifth quality boards at £8 10s. A quantity of 3 x 9 inch unassorted red pine sold comparatively low at £8 15s. Quebec birch logs at another sale brought from 1s. 7½d. per cubic foot for 14 inch average to 2s. 4½d for 22½ inch.

STOCKS AND PRICES.

The Foss Lumber Company, of Winnipeg, have purchased the entire output of the Crooked River Lumber Company, operating at Crooked River, Sask., consisting of from six to eight million feet of northern spruce.

The following quantities of timber were rafted by the Fredericton Boom Company up to July 31, 1906: At the booms—Spruce, 60,253,642 feet; pine, 2,060,310 feet; cedar, 7,908,521 feet; hackmatack, 41,525 feet; total, 70,263,998 feet. At Springhill — Spruce, 9,427,032; feet; cedar, 287,499 feet; total 9,714,431 feet. Grand total, 79,978,529 feet.

THE WHITE PINE TRADE.

Of the white pine lumber situation the Mississippi Valley Lumberman says:

The first of August finds the white pine market strong upon the price basis which has prevailed for the past six months, with individual manufacturers issuing lists showing a tendency to ask more for their products. The fact of the situation is that the market is short with a trade steadily increasing in volume and persistent in its endeavor to secure lumber. The trade from the cities and especially from special consumers at those points has been heavy and their operations have been on the increase till they have reached a maximum of production. This has forced them into the lumber market to contract for northern pine at strong figures. The building movement in most of the large cities, while it has not been as heavy as it was a year ago, is still strong enough to tax the depleted stocks of northern pine. This and the factory trade is showing a degree of strength this late in the season which is very exceptional.

There is a steady increase in demand from the country yards. The crop of the northwest is now assured. In wheat a bumper crop is not expected, but there will be a yield above the average for the past five years. Other grains are coming forward in excellent condition and the danger point in most of them has been passed. Country lumber dealers now realize the dearth of all kinds of lumber and are seeking stocks in anticipation of extreme shortages later in the season. They also find themselves surrounded with prosperous customers and are now laying plans to realize as much as possible from the situation.

TIMBER LIMIT TRANSACTIONS.

Tenders are being solicited by the Estate of Tanner Bros., Waubaushene, Ont., up to September 1st, for the purchase of a lumber mill on the south shore of the Georgian Bay, near Waubaushene, also two timber limits in the District of Algoma.

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, August 4th, 1906.—A better demand for basswood has been noticed in the Ottawa Valley during the last fortnight. The increase in the number of inquiries for this kind of lumber is presumed to be due to the scarcity of the middle qualities of pine. Buyers from the United States are showing a keen anxiety to pick up lots of basswood at $23 a thousand feet. For interior finishing it is found that basswood is cheaper than any of the other kinds of lumber at present high prices, as very little of it is wasted. Lath shipments continue very active and lath is leaving the city just as fast as it can be sawed. Though it is usual to have a dullness in the lumber trade at this time of year, there has been no falling off in the volume of trade among Ottawa manufacturers; in fact, some of the quotations have recently advanced.

The Booth firm have a large quantity of logs ahead. The surplus is so great that Mr. Booth will curtail shanty operations the coming winter. For some years the logs have been accumulating, the output from the forest each year being greater than the cutting capacity of the mill and the store ahead in the river now is so large that a departure has to be made from the usual plan of winter work. It is not the intention to withdraw altogether from any of the limits, but over most of them the number of camps may be reduced by about 25 per cent. Last year 2500 men were sent into the woods, but there will be fewer this season. It is probable that Mr. Booth will cut some pulp wood this winter on his new limit on the Montreal river.

The Gillies Brothers will have several new camps this year on the limit near the Cobalt silver deposits in order to clear that region of timber. Already they are hiring men in Ottawa.

The Pembroke Lumber Company are taking away several shanty crews from the Capital to work in the new limit on the Jocko river acquired from Fraser & Company. Their other field of operation is Deep river. The Hawkesbury Lumber Company are sending men to Jocko river; Colonial Lumber Company to Kippwa; Shepard & Morse to Montreal river and the Edwards Company to Black river, Coulonge and the Gatineau. The latter company have just started hiring. Hurdman & Elmitt will carry on the usual operations in birch and basswood on the Gatineau and will open camps about the first of September. Agents who reported men plentiful enough a few weeks ago are beginning to meet with some difficulty in getting all they want since hiring became more active. The rate of wages, however, remains around $32 a month as a maximum. Lumbermen have more reason to complain about the cost of supplies for the shanties. They say it will require about fifty per cent. more outlay for provisions this year than last. For instance, pork which was bought for $16 a barrel will now cost $24.

SALE OF UNMARKED LOGS.

The annual sale of unmarked logs rafted by the Fredericton Boom Company was held at the office of A. F. Randolph & Sons, Fredericton, N.B., August 2nd.

Randolph & Baker purchased the spruce at $13.85 per thousand; Henry Hilyard, cedar, at $5.35; Murray & Gregory, pine, at $7, and hemlock at $4.75.

The no-mark and mixed-mark logs sold totalled as follows:—

Spruce, 15,807 pieces, containing 340,968 feet of merchantable, 455,194 of battens and 107,199 of condemned.

Pine, 260 pieces, containing 15,540 feet.

Hemlock, 373 pieces, containing 28,535 feet.

Cedar, 4,896 pieces, containing 167,750 feet.

A charge of five cents per thousand is added for freightage, and the purchasers will receive at the same price the balance of unmarked logs to be rafted this season.

Last year's prices were as follows:—Spruce, $14.30; cedar, $6.90; pine, $12.15; hemlock, $4.80.

CRUISING TIMBER LIMITS.

Literally the woods are full of American timber cruisers. All along the coast to the north of Vancouver where there is unstaked timber, numerous cruisers from Puget Sound are at work. They represent American capital, which is seeking timber in this province. The Americans are not alone in the search for timber, for all the well-known British Columbia cruisers are out in the woods. Cruisers are not to be found in Vancouver today. Outside capitalists, who have been in the city for the past week looking for timber investments, have been offering as high as $15 per day on two-month contracts for good cruisers, but none can be obtained. Some of the Canadian cruisers are working on their own hook, staking limits and then selling them. They state that they are able to make more money in that manner than by working for wages, no matter how high are the sums that are offered.—Vancouver Province.

TIMBER AT QUEBEC.

Following is a comparative statement for three years of timber, etc., measured and culled at Quebec up to 7th August, as furnished by the Supervisor of Cullers:

	1904 C Feet	1905 C Feet	1906 C Feet
Waney White Pine	1,484,280	1,039,560	539,240
White Pine	148,160	133,520	44,160
Red Pine	2 960	1,200	680
Oak	187,840	22,160	291,840
Elm	200,680	477,840	567,440
Ash	14,160	8,760	3,640
Butternut	40	120	....
Birch and Maple	114,680	197,600	157,600

NINETY ACRES MORE OR LESS OF White Oak, Rock Elm and Pine Timber, situated within three or four miles of railway station.

This is one of the choicest lots of timber in Canada to-day. We will sell the whole or part of it. There is about one million feet B. M. of Square and Board Timber of No. 1 quality. Address, WM. POTTER & SON, Tottenham, Ont.

CURRENT TRADE CONDITIONS

ONTARIO.

The strike of carpenters in Toronto is the question most discussed by the lumber trade, and until it is settled business is likely to be quiet, as dealers will not place orders under such a condition. While both sides are as yet showing no signs of weakening, there is reason to believe that the influential parties who are endeavoring to effect a settlement will be successful in the near future. The white pine market is steady, although dealers are endeavoring to bring about some recession in prices. Whether they will be successful will depend to a large extent upon the quantity of stock for the fall and winter trade. "It is my opinion", said a large wholesaler who is usually well informed, "that stocks of pine are going to be short". Many logs have been hung up in Northern Ontario and several of the mills will fall short in their cut. One of the Midland firms, for instance, will be short about 6,000,000 feet. All things considered, we do not anticipate a decline in the price of white pine lumber. For hardwoods there is a fair demand, but there is still plenty of stock offering. A number of manufacturers have been carrying their stocks for a year or more, and these are coming onto the market at favorable opportunities. When these offerings are absorbed, some recovery in prices may be expected.

WESTERN CANADA.

Farmers are busy harvesting the abundant crop of wheat, and later in the year improvements will be the order of the day and a brisk demand for lumber will be the result. Higher prices are likely to rule. The Mountain Lumber Manufacturers' Association last week decided to advance the price of common lumber $1.00 per thousand and to make a slight advance on a few other lines. It is claimed that the conditions warranted a greater advance, as the mills have large orders on hand and are almost bare of stock. The conditions are most favorable and an era of prosperity for the lumber trade of Western Canada now seems assured.

UNITED STATES.

The United States is this year likely to have the largest wheat crop on record and a yield of corn almost as great as the large crop of last year. This prosperity is certain to be reflected in the lumber trade, and while buying at the present time is somewhat restricted, the indications are strongly in favor of a brisk fall movement. The tendency of prices is never very decided during the midsummer period, but the position of stocks would seem to give the seller the advantage. The supply of northern pine on hand is believed to be lighter than at the same time last year, while the prospective demand is considerably greater. Hemlock is in excellent condition. Merchantable boards are quoted in the Saginaw Valley at $20, short dimension stuff at $17, 16-foot lengths at $18, and 18-foot lengths at $21. The spruce market is still a little unsettled, with prices varying from $1 to $3 per thousand for the same grade of lumber. Buyers are cautious. Hardwoods are meeting with a satisfactory demand and the scarcity of oak and white ash is responsible for increased sales of basswood, birch and soft elm.

GREAT BRITAIN.

A feeling of confidence now pervades the lumber trade of Great Britain. Dealers and consumers who have been holding off are now buying at present prices, and in view of the light stocks it would not require very strong buying to bring about an advance. The stock of

deals in the Surrey Commercial Dock at London on July 31st, 1905, was 1,126,000 pieces, whereas this year there are scarcely 690,000 pieces. At this time last year there were in the docks 1,900,000 pieces, whereas this season there are not more than 1,000,000. It will therefore be seen that the statistical position is very strong The demand for Canadian pine and spruce is good and there is every probability of a stiffening of prices later in the season. Birch timber is still cheap, but importers are being urged to buy at present prices, as a further decline is unlikely.

NEW BRUNSWICK CEDAR SHINGLES.

Our representative when recently in Springfield had the pleasure of an interview on the shingle situation with Mr. A. C. Dutton. Mr. Dutton is the President of the Dutton Lumber Company and Treasurer of John Fenderson & Company, Inc., of Sayabec, Quebec, and is probably as well informed in regard to shingles as any man in the east. His views as expressed to the writer are quite pronounced—so strong in fact that we think it worth while to set them forth at considerable length, as we are sure the trade will be interested.

Mr. Dutton has just returned from a trip to the Eastern Provinces and Quebec and stated that never before in his experience had the shingle mills shown so little stock on hand at this season of the year. Further, that at least two-thirds of the manufacturers have enough orders now booked to keep them busy for all the way from two weeks to two months, some of the largest concerns being already sold ahead up to October first. Mr. Dutton explains this by the fact that for some time it has been difficult for the trade to get red cedars owing to the strike on the Pacific Coast and the huge demand of the middle and far west. This has turned a portion of the orders that naturally would have gone to red cedars into the white cedar channels and filled up the order books to their present plethoric state There is, moreover, quite a large number of retail buyers who have had the idea that Eastern cedars would slump in August and have been waiting for the slump to stock up—meantime letting their stocks run down. These people are now waking up and trying to place their orders, for the failure of the expected slump to materialize is opening their eyes.

The additional orders now going in are overloading the manufacturers and such an unexpected condition of affairs and the very strong undertone to the market at this ordinarily very dull season of the year is causing advances all along the line by the largest and best posted shingle makers. The Eastern cedar people think their shingles are better than the red cedars and fail to understand why white cedars shoudn't sell at red cedar prices, especially when it is very hard to get red cedars at any price. At the present time there is nothing to take the place of Eastern cedars. Slow deliveries of practically all orders should clearly prove to the trade that the shingles are being sold ahead of production.

This in midsummer! What will happen when the fall demand starts up? Again, it has been very difficult for several months for the manufacturers to get enough cars. With a fair sized car shortage prevailing in midsummer what can be expbcted when the railroads have to meet in addition the demand for hundreds of thousands of cars to move the grain crops?

Mr. Dutton predicts for this fall the greatest trouble over car shortage the Eastern cedar shingle district has ever known.—Lumberman's Review.

HEAVY LUMBER SHIPMENTS.

The Davison Lumber Company, Limited, of Bridgewater, N. S., have recently made very heavy shipments of lumber, the figures for four months being as follows: March, 3,377,692 feet; April, 2,471,136 feet; May, 5,604,484 feet; June, 2,642,676 feet. They have sold over 32,000,000 feet so far this season to the United States and South America and the demand is still good. They were recently offered $15.25 for English deals, which indicates a healthy condition in that market. Conditions in Nova Scotia never looked better.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., August 6th, 1906.—Mr. W. H. Cushing, of the firm of Cushing Bros., of Edmonton and Calgary, who is in Vancouver, gave an interesting interview to your correspondent. Cushing Bros. have a large sash and door factory at Calgary and retail lumber yards in that city and Edmonton also. "Lumber is a pretty scarce article just now," Mr. Cushing remarked, when asked the object of his visit to the coast, "and it is to see what I can do personally toward getting a sufficient supply for our operations that I have come to Vancouver. I expect to be here for several weeks. I cannot just say about prices, and although they are rather high, I am sure millmen do not raise them unless it is absolutely necessary. With such a strong demand for the output, and indications that it will continue for some time, I do not see that there will be much decrease."

Cushing Bros. recently purchased the output of J. B. Winlaw's mill in the Slocan. "We are now negotiating for the pnrchase of the entire plant and timber areas," Mr. Cushing said further. "I cannot say that we will buy any other properties in British Columbia, though we are in the field to do so should good opportunity offer."

Fine summer weather for the last two months has resulted in large numbers of logs being taken out of the woods, but they have no effect

on the market. The mills want all the logs they can get, and all that are cut are none too many. Prices are still very firm as high as $10, with even a little better when occasion demands. With some of the mills operating at nights the visible supply is soon exhausted.

No changes are reported in lumber and shingle prices. The markets are good, both domestic and foreign. A feature of the export this week was the shipment to Nome of 800,000 feet of ties and lumber from the mills of the Victoria Lumber and Manufacturing Company at Chemainus and the Fraser River Sawmills at New Westminster. Generally, these purchases are made from the mills on Puget Sound.

Bush fires are beginning to start up in different parts of the province, though no very extensive damage is reported as yet. In this connection, the Great Northern Railway is being sued for damages by the Union Bank, the Cedar Valley Improvement Company, the Fernie Lumber Company, and the Elk Lumber Company, all of Fernie. The plaintiffs allege that a spark from an engine of the railway company set fire to limits, which were badly damaged.

Big American companies have cruisers on Vancouver Island and it is believed that they have inside information regarding the policy of the C. P. R. Limits are being selected which are inaccessible under present conditions. All the good cedar and fir near the Alberni canal have been staked, and it is likely mills will be erected there. The Woods mill, at the head of the canal, is now in operation.

The prospect of the construction of the Grand Trunk Pacific in the north is attracting operators in that direction, and a Seattle syndicate has secured 40 square miles of limits on Moresby Island, preparatory to erecting a mill.

Mr. Joseph LaBlanche, president of the Canadian-American Lumber Company, which has recently acquired mills at North Bay and Ottawa, is looking for timber here and will build. He says the refuse will be utilized for the manufacture of wood fibreware, like to that turned out at Hull, Que.

WESTERN LUMBER CONDITIONS.

The Mountain Lumber Manufacturers Association, at a meeting at Nelson, B.C., on August 8th, decided to raise the price of common lumber one dollar per thousand. There will be a slight advance also on a few other lines. It is claimed that the conditions warranted a greater advance but the lumbermen did not wish to take advantage of the situation arising in the North-West over good crops. One mill to-day reported orders for 360 carloads of lumber, with little stock. Added to the troubles of the coast lumber manufacturers, owing to the scarcity of cars wherein to ship their manufactured product East, is an increasing scarcity of towage capacity to bring logs down to the mills.

Lumber is in very good demand at Dauphin, Man. Most of the material used is cut locally, and consists chiefly of spruce, with some poplar, coming from the Riding Mountains. The firm of Shaw Bros. were busy all winter taking out logs and their mill commenced running about the middle of April, since which time they have been steadily rushed filling local orders. The local product is used both for dimension and finish. The demand for lumber for building purposes at Plumas, Man., and vicinity is this year in excess of other years, especially for town buildings. Most of the lumber used there comes from the Northern part of the province around Dauphin and Winnipegosis.

The lumber business at Neepawa, Man., is reported as rather dull this year. Not much building is going on either in the town or the surrounding country.

Holland & Graves, of Buffalo, are announced to have purchased from the Sarnia Bay Lumber, Timber & Salt Company, five townships of standing timber, each containing 36 square miles, the price being in the neighborhood of $1,500,000. The townships are Hyman, Porter, Totten, Vernon and Berth No. 91, and are located on the Sault Ste. Marie branch of the Canadian Pacific Railway, on the Spanish and Whitefish rivers. The timber is largely virgin pine.

FOR SALE

100,000 FEET 4/4 BIRCH AND MAPLE culls. For price, etc., apply to Box 404, CANADA LUMBERMAN, Toronto, Ont.

FOR SALE—PLANING MILL AND LUMBER yards at St. Thomas. This is a very profitable business. Mr. Powers' death is the reason for selling. Address SANDERS & POWERS, St. Thomas, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market is little changed from last week, but low grade stocks are gradually becoming stronger. Some manufacturers have advanced their hemlock from fifty cents to one dollar, and it is claimed that the relation of supply to demand warrants a still further increase. In the Ottawa Valley, and in fact in all parts of the province, hemlock is being used in large quantities for building purposes. For 1 x 8 and 10 inch, 10 to 14 feet in length, the mills are getting $15. This is the same price as is asked for 1 x 10 inch mill culls, for which there is also a brisk demand. Some attention will shortly be given to making contracts for next year, and in this connection the rumor is heard that the Ottawa manufacturers will ask another ten per cent. advance. Buyers now have no hesitation in taking stock at the prices now prevailing.

The large consumption of lath has prevented any break in prices, mill quotations still being $4.25 to $4.50 for 1½ inch No. 1 white pine and $3.50 to $3.75 for No. 1 hemlock. Shingles are steady and the white variety firmer in sympathy with the advance in red cedars.

EASTERN CANADA.

Although the demand for spruce lumber is not particularly strong, as might be expected at this season of the year, there is a firmness to the market which promises to result in higher prices at an early date. British importers are now willing to purchase on more liberal terms, and this, coupled with the demand from the United States, is giving manufacturers more confidence. Clapboards, which have been dull for a long time, are now in better inquiry.

New Brunswick cedar shingles are somewhat stronger. It is difficult to contract with the larger manufacturers below $3.50 for Extras for Boston delivery, while some sales of Clears have recently been made as high as $3.10.

WESTERN CANADA.

The lumber business of Western Canada is in a flourishing condition. Notwithstanding that prices are about $2 per thousand higher than a year ago, there is no disposition to make any concessions, as it is difficult for the manufacturers to keep pace with the demand. Although the mills are working to the fullest capacity, stocks do no grow and are exceptionally small. This at a season of the year when business is generally quiet, points to almost a lumber famine after the crops are harvested and the fall trade sets in.

UNITED STATES.

The past week has witnessed an increase in the lumber demand in most sections of the United States and the inquiries now being received indicate greater activity in the near future. The abundant crops would seem to assure a large consumption of lumber. Although Buffalo and Tonawanda have received a larger quantity of lumber than usual, the stocks carried at these points are not heavy. In the Saginaw Valley white pine stocks are much broken in the common grades. Common is quoted at wholesale at $27 to $32 for 1 x 4 to 1 x 12. Merchantable hemlock boards are selling at $20 wholesale, short dimension stuff at $17, and 16-foot lengths at $18. Above these lengths there is an advance of $1 on every two feet. The red cedar shingle market is firm, with a fair demand. Large quantities of lath are being produced but the demand is readily absorbing the supply. No. 1 white pine are quoted at $5 at the mill and No. 2 at $4.50.

GREAT BRITAIN.

The buying of lumber in Great Britain is proceeding in a quiet manner. While the business shows some improvement over the spring months, buyers are still operating conservatively and evidently do not expect more than a slight advance in prices. Spruce continues to show exceptional strength. Battens are

much wanted in England and prices of these have risen considerably, while the present stocks are 60 per cent. lower than in 1905. Sidings are slightly weaker. The large supply of birch has been against any improvement in the price.

STOCKS AND PRICES.

Holland & Graves, of Byng Inlet, Ont., have contracted to stock the mill of Chew Bros., at Midland, Ont., for the year 1907. They expect to put nine camps into the woods and will operate the new limit purchased from the Sarnia Bay Lumber, Timber & Salt Company.

Boston prices of spruce lath are $3.50 for 1½-inch and $3.65 to $3.75 for 1⅝-inch in carload lots.

Up to August 1st the Tonawandas received 189,000,000 feet of lumber, against 177,000,000 feet for the corresponding period of 1905.

The lumber shipments from Lake Superior up to August 1st of this year amounted to 429,285,000 feet, as compared with 424,985,000 feet in 1905 and 343,916,000 feet in 1904.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N.B., Aug. 13th, 1906. — The manufacturing end of the lumber industry has settled down to the usual steady production. Logs are coming along in a way that prevents any inconvenience from that scource and all the mills are running at full capacity. The greater part of the cut is from "Provincial" stock, the proportion of "American" goods (non-dutiable) being smaller than usual. In view of this fact, the time lost through the late starting of the mills, and also because of the recent strike, the output of "American" deals at this port during the season of 1906 will in all probability be much smaller than for many seasons past. Shipments have so far been light, no important quantity is now on the way, and not more than a few hundred thousands of feet is available at present writing.

Trade in N.B. spruce for export to the United States has, during the last week or two, shown but little snap. In spite of this there is little indication that the prevalent values will not be sustained and, when it is considered that values have borne up during the greater part of the hot season, it is natural to suppose that, with the heavier demand which is certain to begin with the advent of cooler weather, firmer prices will materialize.

Local dealers and manufacturers seem to have every confidence that this view of the "American" spruce trade is the correct one and apparently are in no haste to put their goods upon the market, preferring rather to wait, on the strength of the conviction that a higher schedule of prices will soon go into effect.

An inquirer for "American" spruce deals would be quoted as follows, f.o.b schooner St. John: 10 x 3 and 12 x 3, $19.00 to $19.50 per M. superficial feet; 9 x 3, $16.50 to $17.00; 6 x 3 and 8 x 3, $14.00 to $14.50.

Merchantable one inch spruce boards are only fairly plentiful; 600,000 superficial feet would cover all available at present writing and this quantity is divided among several manufacturers. An inquirer would be quoted from $11.75 to $12.00 per thousand superficial feet for dutiable boards and from $13.75 to $14.00 for non-dutiable boards, f.o.b. St. John.

The output of hemlock and pine at this port has this year been so light as to be unimportant so far as export is concerned; local woodworking factories have so far taken care of everything in these lines.

Since last mentioned, freight rates to the westward by sailers have weakened considerably. At present charters are being made at the following figures: New York City, on deals, $3.00 per thousand; New York, on lath, 60 cents; Boston, on boards, etc., $2.75 per thousand.

TIMBER LIMIT TRANSACTIONS.

It is reported that the Crowe Lumber Company, of South Maitland, N. S., have sold their plant and timber limits to Frank C. Rice and L. L. Ashley, of the Rice & Lockwood Lumber Company, of Springfield, Mass. The timber limits comprise 15,000 acres of choice spruce.

The Arrowhead Lumber Company, of Arrowhead, B. C., are announced to have sold their timber limits and mills to American capitalists, at a price said to be somewhat in excess of $500,000. The property consists of 82 square miles of splendid pine territory in the Arrowhead country and a saw mill with a capacity of 110,000 feet per day.

The Canadian Pacific Railway Company have sold all of their timber lands on Vancouver Island, British Columbia, to the Fraser River Sawmill Company, Limited, of which Lester David is the head. The price is given as $10 an acre, which means that the purchase amounted to about $3,000,000. This land was granted to James Dunsmir, the coal mine owner, now Lieutenant-Governor of the province, as a land grant by the Government for building his short line of railway from the coal lands to Victoria, and was subsquently sold with the Esquimalt and Nanaimo Railway to the Canadian Pacific Railway Company.

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells, under date of July 31st, say:

July is proverabially a quiet month in this district, and the present one has been no exception in that respect.

Apart from spruce, of which there has been a fair quantity sold, business during the past month has been decidedly dull, and although

prices have on the whole been well maintained, it is only because of the strong position abroad, and reduced stocks held here.

An unsatisfactory feature has been the dullness of high grade white pine, and although the import has been in no sense excessive, quite a number of shipments failed to find buyers.

Birch logs still continue to arrive in excess of the demand, and consequently prices are much lower than they were earlier in the season.

The position of the market as a whole is, that, assuming an active demand sets in, prices would in most instances advance sharply, owing to the low stock held here, but at the same time present appearances unfortunately do not point to any immediate improvement in this direction.

WHITE PINE.—The import during the month consisted of 936 loads, per "Atbara," the bulk of which was delivered in fulfilment of contract purchases. Owing to the holidays there has been rather less enquiry in the market. The stock is moderate and values are steady.

OAK.—The July import is 862 loads, also per "Atbara," the initial arrival of the season, it may be mentioned. A good inquiry exists, and as the stock of first class wood on hand is very small, arrivals coming to hand should meet with a ready outlet.

ELM.—The import for the month aggregated 1526 loads, which about constitutes a record for any individual month. It has, however, come to a very bare market, and the first class rock timber is meeting with a fair inquiry.

QUEBEC BIRCH.—The July import amounts to 1350 logs as compared with 550 logs for the corresponding month last year. Too much birch has been coming forward recently, and the consequent pressure to make sales has had the inevitable result of lowering prices considerably. The stock of logs unsold is by no means inconsiderable, in view of buyers being well supplied, so that there is no incouragement to make further shipments into the market at present. Several nice lots of birch planks have come to hand in July, and been disposed of at £10 15s to £11 per standard c. i. f.

ASH.—The import has been trifling, and the few odd lots coming to hand found buyers in every instance at fair prices.

DEALS, &c.—Business has been very quiet, consequent on the event of the annual holidays, and unfortunately, as is usual, the import assumed particularly heavy dimensions when there was a minimum demand, with the result that the stock in store has been considerably augmented.

Pine sidings continue to come forward too freely; this has been caused entirely by the holidays and buyers having got momentarily filled up from the recent arrivals. This, however, should right itself very soon, and meantime the position may be considered quite strong. Current values are as under:—

Broad First Pine Deals.—£33 to £35; 11-in., £30 to £32; ends and non-dimensions £23 to £25 10s.

Second Pine Deals.—11-in and up, £20 to £22; ends and non-dimensions, £14 to £15. Third Pine Deals, 11-inch and up, £12 to £14; ends and non-dimensions, £10 to £10 10s. Red Pine Deals.—9 and 11 inch, £9 10s; Narrows, £8 to £9.

First Pine Sidings and Strips.—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to 28

Spruce Deals.—9-inch and up, £9 to £9 10s; 7 and 8 inch, £7 15s to £8 5s. Lower Port Pine and Spruce.—9-inch and up, £8 5s to £8 15s; 7 and 8 inch, £7 10s to £8.

BUSINESS NOTES.

In wholesale lumber circles the firm of C. A. Spalding & Company is conceded to be one of Detroit's leading concerns. They make a specialty of long and short leaf yellow pine, California white pine and sugar pine, and large piece timbers. The output of the mills represented aggregates 700,000 feet daily. C. A. Spalding, head of the business, has been in the lumber trade for 15 years, and has a large personal acquaintance throughout the middle-west and Canada. Their headquarters are at 725 Hammond Building, Detroit.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber trade is of seasonable proportions, with prices well maintained on every item. The amount of building under way continues large and there will soon be an increase in the volume of business. Predictions are heard of a shortage in white pine and hemlock, and in view of the large consumption and moderate stocks, this does not seem unlikely. Present stocks must supply the demand for almost another year. Hardwood manufacturers are reporting an improved trade, but it seems that quite a number of mills are still carrying some of last year's cut. Prices are firm, however, and offers below the manufacturer's price are not being accepted in the majority of cases. The feeling of the trade is hopeful. A wholesale firm write: "There is a noticeable improvement in the demand, with a probability of a scarsity and higher prices in the near future." A manufacturer expresses his opinion as follows: "The hardwood market cannot help but improve in the near future. All woodworking concerns are exceedingly busy and the old stocks are getting pretty well sold off. There was a light cut of hardwood logs last winter owing to the scarcity of snow. This will very soon be felt after the new cut is on the market, then prices will go up."

WESTERN CANADA.

The lumber market of Western Canada may be characterized as bouyant. The manufacturers are operating their mills night and day to meet the demand, and as the stocks of retail dealers are low, it will be some time before the supply will overtake the demand. After the harvest, farmers will have more time to devote to improvements and there will no doubt be a substantial increase in orders. The enormous amount of building and railroad work that is now under way promises to tax the capacity of the mills for many months and there is some reason to expect a further advance in prices. The situation might soon be relieved if the British Columbia mills could secure an ample supply of logs, but this seems out of the question in the near future.

GREAT BRITAIN.

Steady buying of lumber whenever a favorable opportunity presents itself is preventing any accumulation of stock on the British market. The inquiry is stronger than it was at this time last year, while stocks are considerably lighter. It is most difficult, however, to advance prices and the prediction of higher values later in the year has not caused any anxiety on the part of either importers or consumers to cover their requirements. The demand is unevenly distributed. At Manchester nearly all the spruce deals arriving are going direct in to consumption, while Liverpool stocks are in many cases being stored. Prices are firm. At a recent public sale 3 x 11 inch third quality pine brought £13 5s per standard of 1,980 ft., and 3 x 9 inch second quality spruce, £10 5s. A Liverpool firm last week contracted for a 1,600-standard cargo of spruce deals, 70 per cent. 3 inch x 7/8 inch, at £8 1s 3d per standard c.i.f. Birch planks continue weak, a Nova Scotia shipment having recently been sold at £6 17s 6d per standard.

UNITED STATES.

Lumber in the United States is gradually showing more activity and already a shortage in the supply of white pine is talked of. The Minneapolis mills have been unable to secure a constant supply of logs, which is likely to reduce the cut. Buffalo and Tonawanda report prices firmer than for several weeks, but the margin between the mill price and that obtained from the eastern dealer or consumer is small, a matter which is giving the wholesaler some concern. Lumber purchased a year ago, for instance, is being offered at practically what it would cost at the present time, and until this stock is worked off the position is not likely to be much improved. Hemlock is very strong, with the demand in excess of the

supply. The Hardwood Manufacturers' Association have put a new list into effect in which prices have been advanced. Basswood in firsts and seconds and No. 1 common has been increased $2, making the present price $36 and $26 respectively f.o.b. Ohio river points. No. 2 common basswood is advanced $4 to $20. Soft elm and soft maple are advanced from 50 cents to $1. Firsts and seconds plain white and red oak are advanced $2, to $49, and No. 1 common $1 to $32. There has lately been heavy buying of basswood, which, on account of its lower price, is being used instead of poplar and cottonwood.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, Aug. 27.—Every lumber merchant in Ottawa has the same story of the keen and almost unprecedented demand for all products of the mill. The shipments of heavy deals to the old country were so large all along that there is not a great quantity now fit for sending away. In this branch of shipping there is a falling off in activity but the general movement of lumber is more than made up for by the lively trade in other classes. Pine cut into the smaller dimensions is going in large consignments to the United States. No weakening is occurring in the stiff prices made in the spring. One dealer reports heavier sales than usual of box boards and pine mill culls to American purchasers than in any other variety. The manufacturers have as many orders for lath ahead as they would like to take. The local consumption of lath is very strong and the large shipments abroad keep the prices high. There is no difficulty in getting $4.50 for No. 1 white pine and odd lots have been sold at a better price.

If there is any drop in quotations in the near future one manufacturer believes the best grades will be affected, as he finds the greater buoyancy in the sales of the common sorts of lumber. This is specially so in the case of shingles.

The labor problem is becoming a source of anxiety to the lumbermen. More than a dozen firms are hiring shanty men in Ottawa and some of them are offering $36 a month for the most skilled help. As the search for men began earlier than usual this year, they are now nearly all picked up. Operations in shipping and manufacturing circles are in danger of being curtailed for this reason. One of the largest shippers reports that he would send more lumber to the old country if he had the staff sufficient to handle it.

The trouble to find shipping facilities is less acute than it was a month ago and there is a fair supply of barges.

Fraser & Company have started to send shanty crews to a new limit on Jocko river and will have the usual large number of men on the old limits.

The E. B. Eddy Company reports that the dearth of labor and difficulty of securing pulp timber are matters of great consequence to that branch of the lumber industry. The scarcity of the raw material for pulp and paper manufacture, it is contended, makes it imperative to advance the prices of most of the products of the factory.

The low water in the Ottawa is troubling some of the manufacturers at the Chaudiere. The E. B. Eddy Company have been obliged to close down their sawmill and pulp mill No. 2 during the day because of insufficient power tor un them together with their own establishments. At night, however, they are in operation as usual. The water in the Ottawa and its tributaries has not been so low in twenty years.

The Sheppard & Morse mill in Bayswater has been obliged to discontinue night operations owing to scarcity of logs.

The Ottawa Valley lumbermen were astonished at the large offers made for the Kippewa Berth No. 9 belonging to the estate of J. & B. Grier in liquidation, which was sold recently by auction in Ottawa. The area was 44 square miles in extent and brought $145,000. The purchaser is G. A. Grier, who will transfer it to B. Grier, the surviving partner. Other large bids were: C. J. Brook, Hull, $135,000; J. W. Grier, Montreal, $142,000; J. J. Westgate, Montreal, $140,000. Representatives of the Hawkesbury lumber Company and McLachlin Bros of Arnprior watched the sale, but neither firm desired to buy the limit at the high price it reached.

TIMBER LIMIT TRANSACTIONS.

The time for receiving tenders for the right to cut pine and other timber on a number of tie and timber berths situated in the Rainy River district has been extended by the Ontario Government to October 1st.

A timber limit on the Kippewa river, known as Berth No. 9, was sold by auction at the Russell House, Ottawa, last week. The limit belonged to the estate of J. & B. Grier, in liquidation, and contains 44 square miles. G. A. Grier, of Montreal, was the purchaser at $145,000.

CANADIAN LUMBER WANTED.

A firm of timber merchants in South Africa are desirous of purchasing Canadian lumber. In a letter to the CANADA LUMBERMAN they say:

"We shall esteem it a favor if you will kindly put us in communication with suppliers of white pine and hemlock lumber in car lots, for shipment via Montreal or St. John for Cape Town.

"Owing to the readjustment of the Customs Tariffs, particularly in regard to the increased duties on manufactured goods, it is our desire to arrange for direct supplies of Canadian lumber suitable for door and sash making.

"We would prefer to draw our supplies from Canada not only for sentimental reasons but also that raw material from your Dominion is admitted free ,against 3 per cent. ad valorem from the United States.

"Large quantities of doors, windows and other joinery have been imported into South Africa from Sweden, and in a lesser degree from America; having a large plant we have for some time past been manufacturing joinery chiefly of Swedish wood. Now that the new tariff is in operation we are encouraged to extend the scope of our manufacturing business, and we are anxious to obtain suitable supplies of raw material for the making up of articles of joinery that have in the past been done chiefly abroad. We would like quotations for 7/8" white pine, unplaned, suitable for shelving boards, 11" to 12" wide and up and 12" to 16" long, in car load quantities, mill run. This timber is usually planed up on four sides for shelving boards and other purposes. It is our intention to import in the rough and plane up here, thus saving the duty of 15%.

"We shall also require 1½ and 2 inch lumber suitable for sash and door work."

The name of the firm may be obtained from the publishers of this paper.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., August 20th, 1906.—The story circulated in the east that the market of Pacific coast lumber was weaker is hardly borne out by the facts. "It is stronger if anything," was the reply of Mr. R. H. H. Alexander, secretary of the B.C. Lumber and Shingle Manufacturers Association, when asked about the matter. "Mills are still filled up with orders and it does not appear that there will be any apparent diminution in the near future.

Mr. G. P. Gibson, a director in the Pacific Coast Lumber Company, said he could not see how such a rumor could have originated. "Why," he said, "our company is so far behind in orders that we are going to hold a meeting of the directors to see if something cannot be done for those who have been waiting for lumber for a long time. It really is getting serious. We have been receiving a large part of the local trade this season, which has been another factor in loading us down with more than we can carry.

Other mills are in much the same condition. The representative of the Saskatchewan Lumber Company, who is in the city, cannot find a mill to take his order, unless it is with the condition that it is to be filled when possible. It was because mail orders were no use that Mr. W. H. Cushing came to Vancouver, as told in our last letter.

The further fact that the Mountain Lumber Manufacturers, Association, at its meeting two weeks ago, raised the price $1 per thousand is an indication to the contrary that requires no amplification. This advance was made after considerable hesitation, and not until after the matter had been fully considered.

Consumers in the Territories, as may be imagined, do not look with favor on this increase, and in Calgary it is regarded as a means to "cinch" the people. The situation is set forth in the statement of a Kootenay mill man who is at present in Vancouver. "Only three years ago," he said, "the product of B. C. mills could not be disposed of at prices below the cost of production, owing to the flooding of the Territories with bankrupt stocks of American mills, which were dumped anywhere a price could be obtained. That experience of buying lumber below cost of production at the mills put false notions into the heads of settlers, and now that a reasonable figure is being charged they are loud with tales of woe and that the mill men are bent on robbery. But none of these settlers will take one penny less for his grain or horses or cattle than the market will justify. We are only the same kind of people. This is the first for several years that a profit is being made on lumber, and with the great improvement in conditions, it does not look as if our product will be the drug on the market it has been during the last decade."

All countries are beginning to look to British Columbia for timber supply. Last week it was a representative from the yellow pine dis trict who came north to get fir, and now Mr. G. Spaltcholz, of Dresden, Germany, head of a firm which supplies lumber for building, is opening up business connections with mills here. He has been buying for many years in different parts of the United States.

Mr. R. Wolfenden, King's printer at Victoria, has received a communication from the stationery office of the Government at Ottawa to the effect that one of the largest manufacturers of lead pencils in the United States is asking for information concerning B. C. cedar.

CURRENT TRADE CONDITIONS.

ONTARIO.

A canvass of the white pine field reveals no indications of weakness in that lumber. The upper end more nearly approaches that condition than anything else, but it would be giving a false impression to say that it is weak. Only in comparison with the lower grades can any degree of dissatisfaction be expressed. Taking white pine as a whole, the market is strong and inquiries numerous. A considerable quantity of stock has passed into the hands of large dealers who are evidently believers in still higher prices. Inquiries which are constantly being made show a decided scarcity of certain grades, and unless present indications should prove very misleading, there will be an active and strong market for white pine for some time to come.

Among the hardwoods, basswood is steadily gaining ground. While the supply is still plentiful, the time is approaching when the demand will overtake it, and then we may expect an advance in prices. Birch is also moving in some volume at unchanged quotations, with a satisfactory outlook.

UNITED STATES.

The last week in August was characterized by considerable activity in lumber circles, and this is regarded as the beginning of a very active fall trade. Some of the eastern markets are reported to be running short of certain classes of white pine, particularly the common grades, while an improvement has taken place in the demand for southern pine and spruce. The Brooks & Scanlon Lumber Company, operating in Minnesota, have sold 5,000,000 feet of white pine lumber for 1907 delivery at an advance of $1 a thousand over the prices that prevailed last spring, and it is predicted that other contracts will shortly be closed at a still greater advance. The feeling in the hardwood trade is very hopeful. So great has been the demand for basswood that, for the first time in two years, stocks are getting scarce. There is also a more active movement of maple and birch, while elm is showing some dullness.

No. 1 white pine lath has sold during the past week at $4.75 f.o.b. Minneapolis, whereas previous sales were at $5. This weakness is regarded as temporary, although lath is no doubt selling for all it is worth.

GREAT BRITAIN.

Our review of the British lumber market this week must be similar to what has been said in recent issues, for there has been practically no change in the situation. The market is firm, with the volume of business a little less than in previous years. Some Quebec pine deals are being stored, the demand being rather tardy. While stocks are low at present, they will probably increase unless the consumption becomes heavier. Spruce continues to lead in point of strength. Sales are being made at £8 2s. 6d. per standard c.i.f. Liverpool for cargoes containing 60 to 70 per cent. of 3 x 7 and 8 inch, and second quality Quebec spruce, 3 x 9 inch, was sold last week at auction at £10 3s. per standard; 3 x 11 inch third quality white pine bringing £13 5s. Birch planks are weak in price owing to heavy stocks, but prices are not likely to go much lower, while an improvement in the demand might easily bring about a sharp advance.

STOCKS AND PRICES.

The steamer "Concordia" is loading a cargo of deals at Chatham, N. B., for Glasgow.

A raft containing about 4,000,000 feet of logs from the Spanish river arrived at Owen Sound last week for the Carney Lumber Company.

Prices of cooperage stock at Buffalo rule at $9.50 for first-class elm staves; 6 to 6½ cents for best basswood staves, and $9.50 to $10 for six-foot coiled hoops.

Herman Noss & Sons, of York, Pa., are having about 2 million feet of pine cut at W. W. Carter's mill

at Fesserton, Ont. They own a limit in Gibson Township, on the Muskoka river.

The Elder-Dempster Company are now loading the steamer Nyanza at Matane and Rimouski, Que., for Buenos Ayres, South America. She will take 2,600,000 feet of lumber, one of the largest lumber cargoes that has ever left the St. Lawrence.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N. B., August 30th, 1906. —The activity in lumber manufacturing circles of this section continues. Shipments have also been considerable in volumn and local stocks of the most important lines are consequently on the light side.

In short lumber particularly, the smallness of present stocks is a prominent feature. Cedar shingles of the higher grades are scarce, some shipments by schooner during the week having practically cleaned up all available, and an entire month must elapse before any important quantity is ready for shipment.

Since last mentioned, shingle values have continued uniform under heavy receipts and at present writing are at least holding their own. It is confidently expected by local interested people that the beginning of fall building operations in the Eastern States will mean a higher schedule of prices in this line, but while the tendency toward higher prices seems to be growing more pronounced day by day, it is scarcely probable that the higher values which were prevalent early in the season will be equalled this fall.

At this date non-dutiable shingles could not be bought, f.o.b. St. John, less than: Extra, $2.90; Clears, $2.40; 2nd Clears, $1.90; No. 1, $1.15,

Local authorities are of the opinion that spruce lath for export to the United States will be considerably firmer during the autumn than has been the case during the summer months, although no such boom as took place last fall is anticipated. So far prices are practically uniform with those last quoted, although a firmer tendency is quite apparent. Conditions seem to be ripe for the advent of higher prices; lath are remarkably scarce at this port—the total stocks at the local mills would scarcely aggregate a fair-sized schooner's cargo—and advices from Maine ports tell of no surpluses that would prove a vital feature. The demand at the chief building centres of the Eastern States promises to be particularly strong during the remainder of the season and sales are made rapidly and readily at the prices at present prevalent.

Shipments of lath from this port during the summer months have been considerable in quantity and it is apparent that, for the remainder of the building season, owing to the extreme lightness of stocks at present, New Brunswick lath will not be nearly as conspicuous as usual at this time of year in the U. S. markets.

For October delivery, a prospective buyer would be quoted on non-dutiable lath from $2.50 to $2.60 per M and on dutiable lath from $2.25 to $2.35 per M, f.o.b. St. John.

Freight rates by schooner to New York City range from 60 to 65 cents per M on lath, with the probability that the lower figure will be the current rate in the near future. The prevalent rate on shingles to Boston and vicinity is 30 cents per M and to the Sound 32½ cents per M.

BRITISH COLUMBIA LOG GRADES.

Members of the British Columbia Lumber and Shingle Manufacturers' Association and the British Columbia Loggers' Association recently met in conference with Mr. Andrew Haslam, provincial supervisor of log scalers, and drafted a schedule of grading for logs. The following schedule was agreed upon as satisfactory to all interests:

Flooring—Logs suitable for flooring and deck plank, reasonably straight, not less than twenty feet long nor less than thirty inches in diameter, clean and free from visible defects of such a character as would impair value for clear lumber.

Merchantable — Logs that are sound, reasonably straight, free from rotten knots or limb knots, not less than fourteen inches in diameter, with the grain straight enough to insure strength and durability.

Rough — Logs having visible defects, such as crooks, bad knots or other defects that would impair the value and lower the grade of lumber below merchantable.

Culls—Logs not good enough for rough grade.

In all cases the scaler has the right to use his own judgment.

In case logs are defective and in the opinion of the scaler will saw out less than 50 per cent. of their contents in marketable lumber, all such logs shall be classed as culls.

The grades are classed as follows: (1) flooring, (2) merchantable, (3) rough.

SPRUCE LUMBER AT BOSTON.

Of the large producers some are still peremptorily demanding $23 for frames, 9-inch and under, and refuse to accept less. There are others, however, and they are in the majority, who regard $22.50 as the outside for any but a really hard order, and who from a good customer would accept a bid of $22 for an ordinary frame. We have not, however, heard of any further business this week at $21.-50. The sellers who are quoting top figures affect to ignore that business is being done for less, but they are not, of course, taken seriously. About the immediate future there is still a great difference of opinion. Some authorities are predicting an advance before the middle of next month, while others are equally sure of a decline. There is no real change to note in the random situation. Sellers are often urgent, purchasers generally indifferent,and it is difficult,therefore, to keep prices on an even keel. Nevertheless, we heard of a close buyer who, after a thorough canvass of the market this week, decided that $18 was the inside price for small sizes.

No one speaks of the demand for spruce boards as of more than fair proportions, and a little concession from the figures quoted below would fail to surprise, but they are, so to speak, the regular rates. For northern hemlock clipped boards a seller who has obtained $20 thinks he has done very well.

There is beginning to be more inquiry for shingles and the mills are taking a firmer view of prices. Already $3.50 is sometimes quoted for nice brands of extras, and it looks as though sales might result. It seems quite possible, indeed, that next week it may be necessary to add 10 cents to the range of figures. At the moment the tendency is no doubt upwards.

There is much more stir, too, in the market for laths, and although prices are not as yet quotably changed, the tone is, no doubt, firmer. For nice 1½ inch laths, $3.50 is about the best a buyer can do. The seller's tendency would be to add to rather than detract from this figure. In New York the range for 1 3/8 inch is $3.85 to $4.15.

There is nothing new to be said about either the demand for or the prices of clapboards. If a buyer is in need he has to look about a little before he can find any. If, on the other hand, a mill has some to sell, it is not always easy to discover a customer.

HARDWOOD CONDITIONS.

The following report on market conditions was submitted at the recent meeting of the Michigan Hardwood Manufacturers' Association :

Your acting secretary sent blanks to all manufacturers of hardwood in Michigan requesting them to report the amount of stock on hand and unfilled orders July 1, 1906. Fifty-nine manufacturers reported and among these most of the larger manufacturers, although ten or twelve of the largest manufacturers did not report their stock.

From such deductions as we have made from a compilation of the stocks reported we think it probable that fifty of the largest manufacturers produce in the neighborhood of 90 per cent. of the hardwoods cut in Michigan. Twenty-nine out of fifty-nine reporting, or a little less than 50 per cent. of those reporting, have 92½ per cent. of the stock reported. The woods on which we have reports are maple, beech, birch, elm and basswood. This report shows the amount of the above woods in feet only and does not show sizes or grades.

From such information as this committee is able to secure, it appears that there is considerably less hardwood lumber in the hands of manufacturers than there was at this time last year, and that the demand is sufficient to consume all of it at fully as good prices and in some instances at much better prices than have prevailed during the present year.

Thick maple is in much better demand and stocks much lighter than at any time during the past two years, and probably will be scarce before next winter's cut is in condition to market. The amount of beech lumber in stock is very well covered by orders and there seems to be no surplus. Beech has been used very largely as a substitute wood, the purpose generally being to secure something cheaper than had been used before and from its use in this way many consuming manufacturers have come to know that beech is a valuable wood for many purposes. We expect to see the use of beech increase both because of its merits and because for some time at least it will be the cheapest of hardwoods. Either of these reasons should be sufficient to help the price of beech.

The stocks of birch are no doubt much lighter than they were at the beginning of the year, owing to a very much increased demand, due likely to concessions in prices.

Basswood has remained practically unchanged during the past year, the supply about equalling the demand. We can learn of no accumulation in stocks, neither does there seem to be any marked decrease in stocks.

Elm has not maintained the position taken by it early in the year, as there has been some decline in prices and a slight increase in stock due probably to the use of substitute woods.

It is the opinion of this committee that the general conditions and outlook for Michigan hardwoods, taken as a whole, are probably better than at any time in their history.

LIMIT FOR SALE

17½ NICE LOTS SITUATED IN TOWNship of Hope, County of Bonaventure, Province of Quebec, on North Nouvelle river; lots contain spruce, birch, fir, etc. Fine locality to start small lumbering business. Write P. NADEAU & SONS, Grand Cascapedia, P. Q.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market is showing considerable strength, for which the heavy local consumption is largely responsible. There are other factors, however, which are contributing towards firmness. The drives have come down very slowly and many logs have been hung up. Manufacturers are finding themselves unable to carry out their contracts in respect to the delivery of lumber at the specified time and buyers have in some instances been compelled to purchase elsewhere in order to meet the wants of their customers. Then low water in the Ottawa river has forced a temporary shut-down of some of the mills. Under these conditions the tendency of prices is naturally upward. The most urgent demand pertains to the lower grades of pine. Inch mill culls and sidings are held at $15 at the mills, and mill run at $22. Ten-inch box and common is worth $21 to $22. Hemlock has advanced about 50 cents and predictions are made that it will go still higher; 1 x 10 and 12 inch, 12 to 16 feet in length, is held at $16 at the mill, while 2x4, 6 and 8 inch ranges from $15 to $17, the latter for 16 foot lengths. Manufacturers of hardwoods are showing more confidence and some at least are holding for higher prices. The average price is about $18 for mill run birch, $20 for soft elm and basswood, and $17 for maple and beech.

EASTERN CANADA.

The quantity of waney white pine timber measured at Quebec up to September 5th of this year was only 602,720 cubic feet, compared with 1,076,000 cubic feet in the corresponding period last year, and 1,738,880 cubic feet in 1904. This large falling off would seem to indicate that the demand for waney pine in Great Britain is yearly growing less. Prices have been maintained fairly well, however, and the light production this season will probably result in an advance in the near future. Square white pine also shows a decreased production, while the quantity of oak and elm which has reached Quebec this year is considerably larger than last year. The market for spruce deals and boards is firm. The high cost of labor and supplies will probably restrict logging operations the coming winter. New Brunswick cedar shingles are holding steady around $3.50 for Extras for Boston delivery, although there are still light offerings as low as $3.40.

WESTERN CANADA.

Indications point to the most active demand for lumber that Western Canada has ever experienced. Buying in anticipation of the Fall trade is now in progress and the number of urgent orders received by the mills is evidence that retailers are carrying light stocks. A shortage in the supply seems likely to develop, as the bulk of lumber ordered will be wanted during the next two or three months. Higher prices are the rule. Edmonton dealers recently put into effect a new list covering spruce, pine, poplar, tamarac and rough cedar, which have been advanced from $1 to $2 per thousand. There has been no further advance in shingles, but the demand is good and prices firm.

UNITED STATES.

There is a good demand for lumber throughout the United States and the situation from a price standpoint is strong. The past week, however, has witnessed both advances and declines of small proportions and governed almost entirely by local conditions. Buffalo and Tonawanda dealers are asking higher prices for low grade pine, which they consider has been selling too low in comparison with sawmill prices. Prices of pine in New York have advanced from 50 cents to $2 a thousand. On the other hand, low grade boards at Minneapolis are off about 50 cents, which is said to be due to certain box manufacturers offering to place orders for large blocks in consideration of this slight concession. The market there is strong on piece stuff and general building lumber.

The substitution of hemlock for white pine has further strengthened the position of the former. Hemlock boards at Boston are quoted at $21 to $22 for 12, 14 and 16 feet lengths. Hardwoods are moderately active, with maple strong and birch selling in considerable volume at unchanged quotations. Basswood is steadily improving, but elm continues quiet.

GREAT BRITAIN.

While the British market is steady, there is an entire lack of buoyancy, and it appears that some difficulty is being experienced in sustaining prices. First quality pine deals are not moving as freely as the lower grades, the relatively high price apparently restricting consumption. The best quality deals are held at £33 to £35 per standard of 1980 feet, while thirds can be purchased for £12. Spruce deals continue firm and stocks are light.

STOCKS AND PRICES.

A Wisconsin paper manufacturer is reported to have contracted for 12,000,000 feet of hemlock logs at $9, the delivery to be at the rate of 3,000,000 feet for four years. The highest price paid last winter was $8 delivered at the track.

Some sales of No. 1 white pine lath are being made below $5 and it is believed that the substitution of cheaper lath is at last having its effect. No. 1 Norway and mixed are held from $4.50 to $4.75, and No. 1 hemlock and No. 2 white pine at $4.25 to $4.50.

There will be shipped from Port Grenville, N. S., this season about five million feet of spruce; of this two million to the English market and the balance to the American market. In addition to this about 40,000 pieces of spruce piling will be shipped to New York. The lumber and piling will be shipped principally by the following: Fox River Lumber Company, H. Elderkin Company, T.K. Bentley, Gesner Kerr, and William Slater.

LUMBER HIGHER AT EDMONTON.

Lumber prices at Edmonton, Alta., were advanced on September 1st. The old and new list is given below:

Spruce sills, 4 x 4, 6 x 6, 6 x 8, 8 x 8, old price $20, new $22.
Spruce sills, 8 x 10, 10 x 10, 10 x 12, 12 x 12, old price $21, new $23.
Spruce sized, dimension up to 8 in. wide, up to 16 ft. long, old price $21, new $22.
Spruce sized, dimension over 8 in. wide, up to 16 ft. long, old price $22, new $23.
Spruce, No. 1, dressed sheeting to 8 in. wide, old price $20, new $21.
Spruce, No. 1, dressed sheeting over 8 in. wide, old price $21, new $22.
Spruce dressed flooring and ceiling, 4 in., old price $26, new $28.
Spruce dressed flooring and siding, 6 in., old price $25, new $27.

Spruce lath, old price $3.75, new $4.

NOTE.—$1 per M. is added to all kinds of dimensions for each 2 feet over 16 feet long.

THE GLASGOW MARKET.

The following particulars of the Glasgow market are extracted from the monthly report of Messrs. Edmiston & Mitchells:

WHITE PINE.—The import during the month consisted of 1159 loads, per the steamer "Atbara," the bulk of which was composed of deliveries against contract purchases. There has been rather more demand in evidence, and one or two good lines are reported to have been placed. Values are steady, and the stock is by no means excessive.

ELM.—The import during August has again been heavy, aggregating 1300 loads, the total import for the year to date being 2919 loads, as against 1461 loads for the same period last year. Stocks are heavy and quite ample for the market's prospective requirements for some time to come. Values, however, keep steady.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, SEPT. 7, 1906.—The Ottawa river has kept on sinking until now nearly all the lumbermen are inconvenienced by the low water. Every industry depending on Chaudiere water power is in a similar plight and some steam auxiliary plants have been called into commission. The drop in the river level interferes with lumber manufacture more than any other because extra men have to be employed in getting logs out of the stream. The output of the Booth mill went down somewhat on account of the unfavorable condition of the river. It has been difficult to get labor to operate under ordinary conditions and the situation has become more aggravated with the low water. Part of Booth's mill has stopped night operations for the want of help. The records taken by the Upper Ottawa Improvement Company show that the water level at Quyon is ten inches farther down than its lowest point last year. The unprecedented drought of July followed by a dry August has had a serious effect on the streams.

During the last month logs have been accumulating at many points because they cannot be floated ahead to their destination. J. R. Booth, the Hawkesbury Lumber Company, and R. & T. Ritchie of Aylmer, had to leave considerable portions of their drives in the Petewawa river, while in the Coulonge river are to be found much of the timber cut last winter by the Gillies Bros., Gilmour & Hughson and the W. C. Edwards Company. The way in which the logs come into the Ottawa river for delivery to the mills has made it impossible to supply all the manufacturers regularly. The Hawkesbury Lumber Company was so seriously affected in this way that its mill was closed for three days this week, resuming operations September 6th.

The efficiency of the Upper Ottawa Improvement Company is to be increased for next year's operations by the construction of a new steam tug which will operate between Des Joachims and Allumette island. The steamer will be built in Pembroke.

There is not a great activity in shipping pine these days. The United States buyers are giving small orders and it is not necessary to keep up the heavy shipments to the old country. Manufacturers are not uneasy because the business, even it has relaxed a little, is keeping up with other years.

The wholesalers are now in the busiest season. From them it is learned that spruce has gone very strong and the tendency is toward higher prices. None of the other line have shown such activity in the last while. W. B. Bartram & Company, the big birch firm, is sold right up. The season has been a phenomenal one in this trade and the price has recently made an advance of $2 a thousand. For the choice quality the demand is so keen that unprecedented prices can be obtained. Bartram & Company are building a camp on the Rouge river to carry on extensive operations in taking out birch the coming winter. The firm are handling 10,000,000 feet this year and the outlook is that a greater demand will prevail in 1907. Owing to the advances in the cost of labor and equipment for the shanties the manufacturers must ask what would have been startling prices a few years ago.

BUILDING OPERATIONS.

The remarkable activity in building operations throughout Canada is shown by the permits granted in the cities of Winnipeg, Montreal and Toronto. Up to August 31st the Building Inspector of Winnipeg had issued 2,484 permits, representing a value of $9,500,000. The figures at same date last year were $8,851,000.

The building operations in Montreal show an increase over the whole of last year. The total amount of work done last year was $5,590,698, while up to August 31st of this year permits had been issued totalling $6,510,485.

The value of building permits issued in Toronto up to the end of August of this year was $8,660,525, as against $7,068,779 in the same period last year.

THE BARBADOS MARKET.

Under date of August 25th, Messrs. S. P. Musson, Son & Company say of the Barbados market: The only arrivals for the fortnight have been the "Success", from Gaspe, with 58,000 ft. spruce and 1,094,000 shingles, and "Maggie Belle" from Gold River, with 100,000 ft. spruce and 14,000 ft. white pine. The spruce ex former vessel, which was a mixture of second quality and inferior, brought $16.70, while the "Maggie Belle's" cargo, of which 90,000 ft. was second quality, was sold at $24.26 and $19.10 respectively, for merchantable and second quality. In white pine the little lot by this vessel brought $28 and $22 respectively. We also learn of a cargo having been contracted for at $27.25 and $22. These sales, however, have affected the market very little, and next arrivals of both white pine and spruce should bring very full rates. Shingles — The "Success" shipment was placed as follows: 594,000 cedar laying No. 1 at $1.84 to $1.86, 81,000 extra No. 1 at $1.90, 136,000 long Gaspe at $5.63 to $6.05, and 114,000 extra large at $6.30; 65,000 Dimension at $4.20 to $4.35, 4-inch, $5.50 to $6.60 5-inch $7.50 to $7.60 6-inch, $8.50 to $8.60 7-inch, $9.40 to $9.60 8-inch, $10 9-inch.

CURRENT TRADE CONDITIONS.

ONTARIO.

Complaints regarding the lumber trade come from two sources, from shippers who have been unable to secure cars to move their lumber, and from dealers and consumers who have permitted their stocks to run low and are waiting for a break in prices in order to replenish. The car shortage has affected the entire trade seriously, the quantity of lumber held up on this account being very great. The second complaint is an indication of the strength of the market. Buyers who hoped to be able to purchase at lower prices during the midsummer period were disappointed, and at present indications are more in the direction of an advance than a decline. Pine sidings and strips have recently advanced in the Ottawa Valley, and box boards are stiffening under the stimulus of a good demand and probable shortage. A gentleman who recently returned from a visit to several northern mills reports that stocks will be no more than sufficient to supply the demand until the 1907 cut is ready for the market, while in certain grades there may be a shortage. Hemlock and hardwoods are going into consumption quite largely with no tendency towards weakness. For the higher grades of birch and basswood there is an improved demand.

EASTERN CANADA.

The tone of the spruce market is steadily improving. The low water in the St. John river is now giving lumbermen much concern, as it promises to tie up a considerable quantity of logs which were expected to reach the mills this year. Happening at a time when the demand for lumber is increasing, and the British market in particular showing more activity, the result is almost certain to be a shortage in the supply and consequent higher prices. We do not expect a sharp

advance but rather a gradual hardening of values, the extent of which will depend largely upon the offerings. If the large mill owners stand t g ther they can no doubt put ...ss higher. - Cedar shingles are firm at $3.50 for Extras for Boston delivery, and lath are inclined to advance. The New England demand has been exceptionally heavy, with standard 1⅝ inch slab lath quoted at $3.65 to $3.80 and 1½ inch at $3,50 to $3.60.

UNITED STATES.

Lumbermen look upon the harvest of 1906 with a great deal of satisfaction. The quantity of wheat that has been harvested is the largest on record, and if the corn crop is not damaged by early frosts, it, too, promises to be an abundant yield. The crop of these two cereals should form the foundation of a large demand for lumber and enable manufacturers to dispose of all they can produce at good prices. White pine is generally reported strong, although sales are not as numerous as might be expected. There is a tendency to withhold orders in the hope that concessions may be obtained later in the season, but the realization of this expectation seems unlikely. Some sales are reported for delivery next year at prices in advance of quotations earlier this season. The position of spruce lumber has improved steadily of late, and most of the larger mills now have orders which will consume their product for several weeks, Hemlock is firm. Prices have advanced considerably during the year, and, as with pine, there is a disposition to withhold orders until the eleventh hour. The hardwoods are showing considerable activity, and especially factory lumber. Birch and basswood are selling quite largely, with indications of a continuance of a good demand well into the winter season.

GREAT BRITIAN.

Canadian lumber seems to be gradually getting into a stronger position in the British market. The figures of imports indicate a more healthy condition of trade than has existed for some time past. The stock of pine deals at Liverpool is about 26,000,000 feet, compared with 20,000,000 feet one year ago. There is also a decrease in the supply of spruce deals, Quebec waney white pine, red pine and oak planks, the principal exception being birch logs and planks, which have been imported too freely and are now held in considerable quantities. Quebec pine deals are showing an upward tendency, due largely to an increase in freight rates of five shillings since the opening of the season. The high price of good pine is restricting the consumption to some extent, but for certain purposes there is no substitute and the demand seems likely to take care of all the lumber that will be shipped from this side. There was almost a cessation of receipts during the month of August. Spruce in the lower qualities, suitable for packing-case and kindred purposes, continues in active demand, with every prospect of higher prices in the near future, as for some time to come the supply is likely to be light

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, Sept. 17, 1906. — A prominent lumber merchant reports that he has 100 orders ahead, most of them from the United States. There is activity in all branches of the lumber trade. The keen demand for pine has sent the prices up several notches in the last fortnight. Shipping cull sidings, strips and shorts are having a great call and dealers are astonished sometimes at what the buyers are willing to pay; the scarcity of these sorts, however, makes high quotations. It looks, too, as if there would be no decline. The lumbermen who are preparing for shanty operations in the pine forests are obliged to pay enormous wages and correspondingly high prices for food supplies. The wage problem reached the serious stage of a strike on Saturday in the James McLaren Company's mills at Buckingham, when 400 men quit work and asked for an increase in wages. Owing to the absence of the proprietors in British Columbia the mill had to close down and will probably remain shut the rest of the season.

Numerous sales of shipping cull strips are being made at $20 a thousand and sidings from 7 inch up at $25. Indeed, some manufacturers are selling theirs out so easily that they are not anxious for new orders.

The active market in spruce and birch reported a while ago is maintained. If the mill owners would turn out choice qualities they would have no trouble in getting $24 a thousand for birch and as much for the first quality of spruce.

Basswood is doing splendidly. W. B. Bartram and Company have an order for twenty cars at quotations above June prices.

It is learned from the Upper Ottawa Improvement Company that the quantity of logs brought down the river this year is greater than for any past season. Definite statistics are not available. If one were

THE McLENNAN LUMBER CO., LIMITED, MONTREAL, QUE.

to compare the number of pieces of timber with other years the increase would be extraordinary, for the timber is being made from smaller trees every year. The growth of pulp and paper manufacture in Ottawa also tends to swell the volume of timber coming down the Ottawa. There is much timber hung up along the streams. The E. B. Eddy Company are so seriously affected in this way that about two-thirds of their last winter's cut will not reach the mill this year. It is lying along the Ottawa, Gatineau and Rouge rivers.

The disposition of saw-dust is a live question at the Chaudiere. The complaints that have been made against Mr. J. R. Booth for emptying this refuse in the river has made it necessary for the Minister of Marine to inspect Mr. Booth's mill with a view to learning if he has taken all the possible precaution to prevent a saw-dust nuisance. The lumber king is prepared to have the inspection any time. He believes the complete system of saw-dust carriers running from every part of the mill to an incenerator is all that could be desired. Mr. Booth says that the greatest quantity of saw-dust that could escape from his mill would not justify the complaints that have been made. As the matter stands, the city of Ottawa is in danger of losing the Booth industries entirely on account of too stringent regulations.

It is Mr. Booth's desire not to let any saw-dust get away, for he has just completed a spacious subway for the conveyance of saw-dust from his mill to the paper factory. The paper factory will go into operation in October and Mr. Fred Booth estimates that the output of saw-dust from the lumber mill will keep the factory supplied in fuel during eight months of the year. The daily consumption of coal would probably be 40 tons a day, so that by the substitution of saw-dust the manufacturer saves a considerable sum. When the mill is in full blast the factory fire will not consume all the saw-dust and a means has been provided for storing up the surplus. A large quantity of the refuse from the mill is too coarse for the paper factory and will have to be destroyed elsewhere. However, the time is not far off when it is believed every atom of waste matter and especially the saw-dust will be utilized for fuel.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N.B., Sept. 11th, 1906. —The Autumn season opens in this section with every prospect of being the busiest of the present year in lumber manufacturing circles. It is probable (although by no means a certainty) that sufficient spruce and cedar logs will come forward to keep the mills in cut until well into December. The element of uncertainty arises from the fact that, after the phenomenally dry summer, the rivers are remarkably low and a continuation of the drouth must have far-reaching consequences before many weeks have passed.

Already several millions of feet—the chief part of which is spruce and owned by local people—are hung in the main St. John in the vicinity of Grand Falls.

The most conspicuous characteristic of the situation just now is the prosperous condition of the New Brunswick spruce trade in Great Britain. The volume of business in that direction, according to recent information, is very heavy and the demand is of such nature that all offerings have been readily taken care of with no apparent tendency to weaken values. Shipments of "English" deals from this port will no doubt be fairly heavy during the remainder of the present month. On October 15th the winter deck-load regulation comes into force and any steamer clearing after that date may take not more than a six-foot deckload. To offset this, a higher schedule of freight rates is put into effect; hence the eagerness of shippers to get away as much as possible before that date.

The indications are that after October 15th the shipments of deals from this port to the United Kingdom will be more than ordinarily light and that the same conditions will continue throughout the balance of the year. Stocks in this line at the local wharves are fairly light (4,500,000 feet would cover the quantity), and when sailings which are now booked have been completed, it appears that this port will not be an important factor so far as "English" deals are concerned, during the balance of the season.

Local people who have "English" deals to sell are decidedly optimistic in regard to the future in this line, and their ideas in regard to price are somewhat higher than was the case a month ago.

An enquirer for spruce deals for export to Great Britain would be quoted on a specification containing say 50 per cent. 7's and 8's, 35 per cent. 9's and 15 per cent. 11's and up, $14.25 to $14.75 per thousand superficial feet, two-thirds price for fourths and ends, free on board steamer St. John. 2 x 3, 3 x 4, 3 x 5 and 3 x 6 spruce scantling could be bought at from $11.25 to $11.50 per thousand superficial feet.

Mr. Fred J. Davenport, of Detroit, representing the Cypress Selling Company of New Orleans, is at present in Toronto in the interest of his company. He intends visiting Kingston, Ottawa, Montreal and other Canadian cities and hopes to place considerable Louisiana red cypress.

WANTED

TO CORRESPOND WITH LUMBERMEN who can furnish from one hundred to six hundred thousand feet of Soft Elm per year to be delivered to Kingston, Ont. Address the ST. LAWRENCE B. B. HUB MFG. CO., Benson Mines, N. Y., St. Lawrence Co.

WANTED

POSITION AS SUPERINTENDENT, MANAGER or Partner in a Lumber Concern operating between Lake Superior and Pacific Coast, Canada. Character assured; habits strictly temperate; large experience American and Canadian logging methods. Box 412 CANADA LUMBERMAN, Toronto, Ont

CURRENT TRADE CONDITIONS.

ONTARIO.

The local consumption of lumber is heavy, yards are busy and stocks are running low. Finishing material is wanted in considerable quantities and as a rule the seller can get his price. Retail trade is good. Wholesale business is less active on account of buyers in the Eastern States holding off in the hope of being able to induce some concessions. They argue that there is always the possibility of unfavorable developments which would cause the market to recede, while there is reasonable certainty that advances from the present level of prices will be along very conservative lines. The situation in respect to white pine, however, is daily growing stronger. About five million feet of manufactured stock was burned at Aylmer a few days ago, and several of the Ottawa Valley mills are closed down as a result of low water. Mills in the Georgian Bay district are short of logs, and altogether it appears that the season's cut will be less than last year, while the consumption has been much heavier. The lumber exports to the United States for the first seven months of this year were 517,000,000 feet, compared with 355,000,000 feet for the corresponding period in 1905 and 259,000,000 feet in 1904.

The lath market is getting a little more active at unchanged quotations. No. 1 white pine are selling wholesale in Toronto at $4.75 and No. 2 at $4.25. Shingles are reported to be getting scarce, and there is no difficulty in maintaining present prices of white pine and B. C. cedar.

WESTERN CANADA.

The building strike in Winnipeg has been the only unfavorable development since our last review of the western lumber trade, but just as we are going to press we learn that a settlement has been reached and work resumed. The consumption of lumber continues large. The mills have plenty of orders and prices are fairly remunerative, although logs are still very high. For first quality fir logs as high as $12 has been paid on the coast, and the supply is still inadequate. The demand for shingles is equally as good as for lumber. There is as yet no accumulation, and it will not be long until the production will be curtailed by some of the mills closing down.

UNITED STATES.

The movement of white pine lumber is not as heavy as some had expected, but considering the conditions, it may be considered satisfactory. Holders are making no concession to buyers, as there does not seem to be any prospect of lower prices in the near future. At Buffalo and Tonawanda the question of advancing all grades of white pine from No. 2 barn down has been discussed, as the list is now too low in comparison with the mill prices. The demand is still running largely to the common grades, which are quite buoyant, while the upper grades are a little sluggish. Buying for the winter requirements will soon be a factor and predictions are made that the lower grades of white pine will sell at higher prices before the close of the year. The yellow pine market is steadily recovering from its late weakness, while hardwoods are showing considerable strength. At the annual meeting of the Wisconsin Hardwood Lumbermen's Association last week, 34 members reported stock on hand amounting to approximately 96,000,000 feet, while on April 1st 37 members reported a total stock on hand of 230,000,000 feet. This remarkable increase shows that the consump-

tion of hardwoods during the summer season has been very large.

GREAT BRITAIN.

Importers are now showing more disposition to contract for spruce lumber even at the additional price which must now be paid to cover the heavier freight charges. As stocks are light both in England Canada, the natural course of events will doubtless bring about a higher range of values. The outlook on the whole is somewhat encouraging for shippers, as the market will be almost bare of stock before next spring. A remarkable advance has occurred in the price of staves, and at the present time there is much speculation as to what the future will bring forth. One year ago the price of staves was £4 per standard, while the present price is £6 10s. and quotations as high as £7 are being made. A more moderate advance has taken place in the price of slating battens.

STOCKS AND PRICES.

Cedar ties are worth 32 to 37 cents in the Saginaw Valley.

The City Council of Winnipeg have accepted the tender of D. E. Sprague for the supply of from 1,000,000 to 2,000,000 feet of lumber.

The Sawyer-Massey Company, Hamilton, are making another important addition to their works. The lumber is being supplied by the Long Lumber Company, Hamilton.

Theodor Telier, contracting engineer and architect, has placed an order with the Long Lumber Company, Hamilton, for 100,000 feet of hardwood flooring. This is to be used in buildings now under construction in Toronto.

The Bell Telephone Co. last week let their western pole contract for the 1907 season. The successful parties are J. L. Hyland & Company, of Winnipeg, and the contract amounts to around 100,000 poles, being one of the largest pole contracts ever let in the west. Not less than 50 per cent. of thes peoles will be furnished from British Columbia and coast points.

A quantity of birch timber from Quebec was sold at auction at London, England, on September 5th, realizing the following the following prices: 14¼-17¾ in., 7-16 ft., 72s. 6d. per load of 50 cubic feet; 15-17¼ in., 8-15 ft., 70s.: 14¼-17¾ in., 8-12 ft., 70s.; 13½-17¼ in., 7-22 ft., 70s.; 14-17¾ in., 8-14 ft., 70s.; 13¾-15¾ in., 8-15 ft., 60s.; 14½-15⅜ in. 9-15 ft., 60s.; 14-15¾ in., 8-16 ft., 62s. 6d.; 14¼-15¾ in., 9-12 ft., 62s. 6d.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., September 14th, 1906.—The market in British Columbia remains practically the same. There is still a very strong demand for lumber, with the list prices firm. The call is for all kinds, and mills are having quite a run in big timbers. The Fernie Lumber Company have completed the cutting of a million feet of small timbers for the Grand Trunk Pacific. This railway company is bringing considerable business to the coast. In the north, near its proposed terminus, a number of mills are starting, and the Georgetown mills and those at Port Essington have received large orders for ties. Other mills have also contracts, including that of the B. C. Tie Company, of which Mr. D. H. Hays, brother of Mr. C. M. Hays, is manager.

A recent arrival from the north says the coast is flooded with Americans and their representatives who are looking for timber. The shores of Portland canal and the Queen Charlotte islands are being carefully cruised for good timber. On the latter, D. Drysdale, of Seattle, is to erect a mill of 150,000 feet daily capacity.

With the last purchase of the Kamloops Lumber Company by Americans, all the large lumber industries in the interior are now controlled by people from the United States, with the exception of the Columbia River Lumber Company at Golden. Within the last month, the Lamb Syndicate of Minneapolis took over the interests of the Arrowhead Lumber Company and S. H. Bowman has purchased the three mills and various yards of the Yale-Columbia Lumber Company.

Mr. George McCormick, who has been president of the Kamloops Lumber Company, will assume the management of the Pacific Coast Lumber Company in this city. He states full particulars of the recent sale will be made public on the 15th. The shareholders of the Kamloops Company are nearly all Ontario people, Mr. Wm. Irwin, of Peterboro, being among the number.

An interesting case comes up next month at the Nelson Assizes, when the Union Bank, the Cedar Valley Improvement Company, the Fernie Lumber Company, and the Elk Lumber & Manufacturing Company will sue the Great Northern Railway for damages to their limits by fire, said to have been caused by a spark from a locomotive of the defendants.

The shingle part of the industry does not share in the prosperity

THE McLENNAN LUMBER CO., LIMITED, MONTREAL, QUE.

which is attending the lumber mills. There is enough business to keep them fairly busy, but that is all. Standards are going at $2.05, the price which has prevailed for some time. Bolts are very scarce, and are worth from $4.50 to $4.75. Labor is also hard to get, in all branches of the trade.

The Hindus, which are swarming into the province, are being rapidly taken up by the lumber companies, who find them desirable laborers, especially since few Japs and Chinese come into British Columbia now. Work is plentiful in all lines, and the highest wages are demanded. Even at this rate, the men are very independent, since no man need be long out of a job.

SPRUCE LUMBER FIRMER.

Spruce has regained much of the ground lost during the earlier months of the year, and while the base price cannot be quoted beyond the $23.00 and $25.00 level, the market is to-day quite steady at that figure, and demand is absorbing production much faster than during June and July.

During the past two or three months, says the Lumberman's Review, much has said regarding the poor quality and mill work of the spruce and hemlock product coming into this market from the Eastern Provinces. It is, of course, true that there are scores of mills in the Provinces which turn out a very coarse line of product, but this is almost equally true of this same class of mills in the northern section of New England, and we make a mistake when we fail to consider both Nova Scotia and Eastern New Brunswick as producers of high-class mill work in connection with their spruce output. Many modern mills have been installed in that territory during the past ten years, from which the output is as good as the best, and this class of mills is as a rule standing for full prices, while the smaller poorly equipped mills both in the Provinces and Northern Maine have been turning out a class of random that has been supplying much of the demand during the past three months. This class of mills is fast sawing its last log and even to-day scores of plants belonging to this class have ceased sawing for the season and are now out of the market. The fact I would like to impress upon every lumberman in the East is that by conservative handling and by keeping mill product sold and shipped, the market has regained its equilibrium, and yet it would be little short of commercial suicide for manufacturers to attempt from now on to hold any of their product in an effort to scure prospective higher prices. The market will be strong at $23.00 and $25.00 within the next ten days, and unless something unforeseen happens to check demand, the market will be established at $24.00 before fleecy white snow spreads over this Eastern territory. Happily there has been no accumulation of stock at mill points during the past four months, and as the yards at consuming points have reduced their stocks heavily, actual consumption should force free buying during the balance of the year.

HARDWOOD STOCKS.

Some very interesting figures pertaining to hardwood stocks were presented by the Secretary of the Wisconsin Hardwood Lumbermen's Association at the annual convention at Milwaukee last week. The statistics in regard to dry and green lumber and logs in the hands of the members of the Association on September 1, 1906, showed a substantial decrease as compared with the spring report. Replies were received from 34 members, who reported a total stock of 96,309,000 feet, made up as follows: Dry lumber, 72,195,000 feet; green lumber, 18,307,000 feet; logs 5,807,000 feet. The classification of the stock on hand is as follows:

	Feet B. M.
Ash	2,834,000
Basswood	21,756,000
Birch	40,442,000
Butternut	242,000
Rock Elm	2,295,000
Soft Elm	9,608,000
Maple	15,515,000
Red Oak	2,722,000
White Oak	895,000
Total	96,309,000

In the spring 37 members reported a total stock on hand of 230,129,000 feet.

It will be seen that birch constitutes nearly 50 per cent. of the total stock on hand. The production of birch in Winconsin during the past year has been large, but the consumption has also been heavier than usual. Basswood is the next largest item on the list, but is only about half as large as birch. Maple comes next, followed by soft elm. The stocks of the other hardwoods are so small as to be of practically no significance at all.

The prices of hardwood lumber in Wisconsin are about as follows: Inch log run ash, $26; inch log run birch, $18; inch log run basswood, $21; inch log run soft elm, $20; one inch to two inch log run soft maple, $16; inch log run hard maple, $14.

LUMBER BURNED.

A fire broke out in the lumber yards of R. & T. Ritchie at Aylmer, Que., on September 20th, and destroyed over 4,000,000 feet of lumber. The loss is about $80,000, and the insurance $35,000.

Tenders were opened September 5th in the offices of E.R. Chapman, St. John, N.B., for the lumber lands of the late James V. Brown, St. Martins. The tender of A. F. Bentley, St. Martins, was the highest and was accepted.

ADVANCE IN LUMBER PRICES.

The following telegram has been received from the Vancouver office of the CANADA LUMBERMAN:

VANCOUVER, B. C., October 1, 1906.
CANADA LUMBERMAN, Toronto.

"Fir and Common Cedar products advanced one dollar throughout on Saturday."

GEO. A. GALL.

CURRENT TRADE CONDITIONS

ONTARIO.

The buyer of lumber continues to increase in volume. Retail dealers in Toronto have all the business they can handle and the planing mills are working to full capacity to meet the demand. Certain grades of white pine are getting scarce, and in many cases it is a question of where the material can be obtained rather than the price or grade. Hemlock is in the same position. The advance which was made in the early spring has been maintained throughout the season, and at the present time sales are being made at the highest prices which have yet been reached. The fear of a shortage this winter is causing some uneasiness among those whose stocks are light. The Ottawa Valley production has been curtailed by low water, and even if the rivers should rise sufficiently to warrant the starting of the mills, there would probably be difficulty in securing the crews, as many of the men have gone to the woods. The situation in hardwoods is also strong, with the volume of demand fairly large. Basswood is showing considerable improvement.

EASTERN CANADA.

Building lumber is very active in Montreal and stocks are getting exceptionally light. The common and lower grades have been going into consumption in large quantities this season, and there has been an unusually brisk demand for box material. Dealers are finding some difficulty in securing sufficient stock to meet the demand, and while prices are high, there is no prospect of any recession in the near future. Export shipments have been light, as the quantity manufactured for the British market was curtailed on account of the excellent American demand. The production of spruce on the St. John river will be about 25 per cent. below the average on account of the scarcity of water to float the logs. This has further strengthened the spruce situation. Renewed activity has appeared in spruce lath, and as the supply is light, predictions are made of higher prices this month. The call for shingles is confined largely to Extras and Clears, the lower grades being rather quiet.

UNITED STATES.

Lumber prices show no weakness whatever. The demand from all sources is moderately good, with indications of a more active movement later on. In the Lake Erie district the lower grades are showing considerable buoyancy, as has been the case practically all season. So long as the present prosperity of the country continues, there is not likely to be much decline in white pine, the production of which cannot be increased owing to the comparatively small supply of standing timber. Spruce is, if anything, a

little firmer, the majority of dealers asking $23 for 9-inch dimension and under at Boston, and $25 for 10 and 12-inch dimension. The movement of hemlock is large and prices are in good shape. Hardwoods are experiencing a very satisfactory demand and again it is reported that there is a scarcity in the supply of maple. Birch is being bought in large quantities, but the supply if so great that it will be some time before manufacturers will be able to secure much higher prices.

White pine lath seem destined to advance even from present prices, as the Fall inquiry has developed a shortage. No. 1 white pine are quoted in Chicago at $5, No. 1 norway at $4.75, and No. 2 white pine and No. 1 hemlock at $4.50.

GREAT BRITAIN.

The British lumber market is firm to strong. Notwithstanding that whitewood has been substituted for Canadian pine wherever possible, it has not prevented a further slight advance in the price of the latter, which is rather unusual at this season of the year. Importers are commencing to realize that stocks for the winter and early spring trade will be exceptionally light, and already it is predicted that the opening prices next year will be higher than those now ruling. Of course, many things may transpire in the meantime to change the natural trend of the market, but as the situation now sizes up, higher prices will result. Spruce is going direct into consumption on arrival and there is reason to look for a material advance in the near future. Some fifth quality Quebec spruce was recently sold at auction at £8 per standard of 1980 feet, which is considered a very satisfactory price. Birch is still weak, while waney pine timber is firm and likely to bring higher prices for next year's delivery.

STOCKS AND PRICES.

The Crown Lumber Company, of Woodstock, Ont., are in the market for half a million feet of white oak plank, 2¼-in. thick, firsts and seconds; also half million oak rim strips cut to order.

W.J. Pulling & Company, Windsor, Ont., are reported to have secured the contract to supply all the lumber required for the construction of the tunnel of the Michigan Central Railway under the Detroit river. The quantity will be several million feet.

It is estimated that 50,000,000 feet of logs will be taken out this winter by the Prince Albert Lumber Company, Sturgeon Lake Lumber Company and William Cowan, of Prince Albert, Sask. This compares with 30,000,000 feet taken out last year.

Operations in the Lake-of-the Woods district promise to be very active this winter. The Rat Portage Lumber Company will increase their cut and have a thousand men in the woods. The Rainy River Lumber Co. will put in nine camps and take out probably 60,000,000 feet of logs. The Preston-Bell Company, which has been newly organized, will operate largely in both logs and ties, while the Backus-Brooks Company, who have acquired the Keewatin Lumber Company's business, will have several large camps. W.A. Preston, Porter Elliott, H. H. Wood and L. Christie will take out considerable quantities of ties.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N.B., September 27th, 1906.—The logging season is fairly started and camp crews are leaving daily for the woods. Men are particularly scarce this year and wages are consequently from ten to fifteen per cent. higher than was the case last year.

Like last season, the logging season of 1905-06 will be marked by a curtailment that will place the total volume of the cut some twenty or twenty-five per cent. lower than the average. This condition of affairs is due to the fact that most of the largest manufacturers have quantities of logs scattered along the St. John river which will not reach the rafting works at Fredericton this fall on account of the scarcity of water. Estimates have placed this quantity at from eighteen to twenty millions of feet.

A feature of the trade at present writing is the continued activity in spruce lath. With supplies lower than nominal at both the shipping end and the receiving end, the demand seems to be increasing in volume. At this port and in the vicinity, "scarce" would not be too strong a word to use in speaking of the supply of lath, and no quantity that could be called important is now on the way. The situation in this line seems to have every indication that values will be higher during October than has been the case during the present month. Local prices have already stiffened somewhat and an inquirer would be quoted on lath, for immediate delivery, $2.50 to $2.60 per thousand for dutiable and $2.75 to $2.85 per thousand for non-dutiable, f. o. b. St. John.

The cedar shingle trade is unmarked by any important change. The demand for export to the Eastern States is brisk and steady in Extras and Clears, but for 2nd Clears, Extra No. 1's and No 1's the call is exceedingly light; the volume of shipments in the latter lines having been infinitesimal thus far during the season. In the better grades, stocks are somewhat below the average (1,800,000 would about cover the total), but in the lower grades, trade has been slow and stocks have consequently multiplied until from five to six millions are to be seen on the different wharves about the city.

Prices in these lines have shown practically no change during the past month and the figures mentioned at the beginning of that time, namely, $2.90 and $2.40 for non-dutiable Extras and Clears respectively, f.o.b. St. John, is about the average.

Freight rates to the westward by schooner are quoted as follows: Shingles, Boston, 30 cents; shingles, Sound ports, 32½ cents; lath, New York City, 70 cents.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., September 24, 1906. — "If an advance is made in the price of lumber it will be nothing more than I expect," was the answer of Mr. T. F. Paterson, of the Paterson Timber Company, when spoken to this morning concerning the rumor that an increase might be made in the near future. "The mills cannot help it. Logs have been scarce and dear all summer, and are now at $9 and over. Rainy weather is about to set in, and as everyone knows, the supply of material for the mills is always more difficult to secure in the winter than in the more favorable seasons of the year. The result is inevitable. It's no use of the mills playing the philanthropic role and producing lumber at a loss. Those engaged in the manufacture of lumber do not raise prices just to see its effect on the consumer. They are bound by the cost of production. When this is increased, then the cost of lumber to the user of it must be higher. There is no other way out of it. The price was advanced last spring for no other reason, and if it is given another little hoist at the next meeting of the Association it will be because circumstances absolutely demand it."

Business is good with the mills, the demand from both foreign and domestic points being as strong as ever. Recent shipments to Nome indicated that the American markets were more than enough for American mills, and the second shipment of lumber from a British Columbia mill to Mexico is a further indication of the extension of the home business. The Kosmos liner Serapis took 250,000 feet last week for Mexico, and the previous steamer of the same line took a large consignment.

Activity in timber is almost approaching a sensation. On Vancouver Island and the mainland coast large numbers of cruisers are quietly surveying limits. Real estate in Vancouver is something that is attracting men of money, but timber is equalling if not surpassing this. An instance of the demand is shown by news from the office of the provincial inspector. A couple of weeks ago, J. D. Robertson and J. R. Burrows, Kansas men, with associates, took over a large limit of McLean Brothers, Vancouver, at $225,000. Now, it is stated, they are offered $100,000 advance on that figure, and do not seem disposed to sell.

Lumbermen generally expect good results from the convention of the Canadian Forestry Association, which is being held in Vancouver this week. "It will be the most important gathering yet held in this city," a prominent millman remarked, "and British Columbia as a whole should profit greatly by the holding of the convention in this province. Lumbermen are taking a great interest in it. The Mountain Lumber Manufacturers' Association will atend in a body, so will the members of the Coast organization."

The Lamb-Watson Company of Minneapolis, which recently purchased the extensive property of the Arrowhead Lumber Company, are making large additions to the mill. Considerable money will be spent in making it one of the finest plants in British Columbia.

ADVANCE IN LUMBER PRICES.

Just as this issue is going to press, a telegraphic dispatch from our Vancouver office announces that The Coast and Mountain manufacturers have advanced the price of British Columbia fir and common cedar one dollar per thousand. The mills are behind with orders and the high cost of logs has made it necessary to further increase the price of lumber.

Here is a Bargain

NINETY MILLIONS HEMLOCK AND hardwood; easy logging; plenty water for rafting down French river or to Lake Nipissing. LAYCOCK LUMBER Co., Buffalo, N.Y.

NEW OFFICES.

The Parry Sound Lumber Company have removed their head offices in Toronto from the Home Life Building to the new Traders Bank Building, occupying Rooms 1315 to 1320, on the thirteenth floor. The new quarters are commodious and afford a splendid view of the city and harbor.

WOOD-WORKING FACTORY BURNED.

The wood-working factory of Silliker & Company, of Amherst, N.S., has been destroyed by fire, together with their offices, warehouse and a large quantity of valuable lumber. This factory was one of the largest and best equipped of its kind in the Maritime Provinces, employing in all about seventy-five men. The total loss is estimated at $75,000, while the insurance amounted to only $23,300.

CURRENT TRADE CONDITIONS.

ONTARIO.

The destruction by fire of between twenty-five and thirty million feet of Ottawa valley lumber has furthered strengthened the market and given the seller a still greater advantage. There is no prospect of lower prices for pine or hemlock this year, as the demand is absorbing the supply and preventing any accumulation. The largest blocks are in the hands of dealers who are firm believers in present prices and who practically control the situation. Mill culls at $15 at the mill may seem high, but until there is a falling off in the consumption there will be no decline. Hardwoods are holding their own, but nothing more favorable can be said. Stock seems to be found in unexpected quarters and until it is worked off a further advance in prices need hardly be expected. The lath market is firm and more active. There is not a great deal offering and all grades are in good demand. White pine and cedar shingles are rather dull, but in some quarters an advance is predicted owing to the higher prices now ruling for British Columbia red cedars.

EASTERN CANADA.

The light production of waney white pine is being reflected in the shipments from Quebec, which up to the present time are little more than one-half of last year. Prices are firm but have not advanced as much as was predicted, although it is expected that buyers of the coming winter's production will have to pay an advance. Spruce lath have advanced from 25 to 50 cents during the past month and are now quoted at $4.00 to $4.25 for 1⅝-inch and $3.75 to $4.00 for 1½-inch, Boston delivery.

New Brunswick cedar shingles still keep around $3.50 for Extras on Boston freight rate, with $3.60 as the top figure.

WESTERN CANADA.

Recent developments in British Columbia are not in favor of lower prices for lumber. The situation is controlled by the timber supply and at the present time logs are difficult to get at any price and no quotations can be given until the market is steadier. The production of lumber is being curtailed by the log

shortage, and as most of the mills are behind with orders, the recent advance which was made by the Coast and Mountain manufacturers was unavoidable.

In Washington the price of logs was advanced $1 to $2 on October 1st, an increase of $1 being made on No. 2 logs up to 40 feet long, $1.50 on merchantable logs and $2 on flooring logs. These increases make the price $8.50 for No. 2 logs, $11 for merchantable logs up to 40 feet long, and $14 for flooring logs.

UNITED STATES.

Shortage of rolling stock is about the only complaint that is heard from the lumber trade. The conditions are good, and while there is not as much snap to the white pine business as might be expected, the volume is sufficient to prevent an undue accumulation of stock. It is probable that the mills will go into winter quarters with as much lumber as last year, but there is reason to expect a larger consumption. In the Duluth district 12 inch No. 1 boards are said to be selling at some concession, but everything else on the list is firm and there is a shortage of box material. There have lately been larger receipts of spruce in short lengths, but the demand has been sufficient to take care of the supply. For 9-inch and under $23 is the general price asked at Boston. All hardwoods are having a good sale, with ash and maple showing to good advantage. The demand for hardwoods is increasing as the season advances, and there is reason to believe that prices will continue firm through the entire winter.

GREAT BRITAIN.

Athough the British market is still lagging behind, conditions are gradually improving, and it is generally predicted that prices will be higher next year. Importers apparently still fear consignment cargoes, induced by the higher range of values which has been established. The shipments from Canada, however, for the balance of the season will certainly be light and there is no reason to expect that prices will be affected thereby. The demand at home and in the United States is so good that there is no incentive to ship to Great Britain. Prices for all grades of pine have advanced owing to high freight rates and the approach of the close of navigation. Baltic prices are firmer, and as the failure of these to advance earlier in the season operated against Canadian lumber, the way is clear for further recovery. Floorings which sold earlier in the year at £9 and £11 per standard for mixed white and first red are now quoted at £10 and £12 respectively. Quebec birch has recently shown some signs of recovery.

LUMBER IMPORTS AND EXPORTS.

During the first eight months of this year the United States imported unmanufactured timber to the value of $19,596,387, as against $14,304,759 during the corresponding period of 1905. The quantity of lumber imported from Canada shows an increase of nearly 50 per cent. The figures are as follows:

	1905.	1906.
Boards and other sawed lumber (Ft.B.M.).....	444,124,000	624,856,000
Shingles.....	485,052,000	536,872,000
Logs and round timber (Ft. B. M.).....	71,499,000	58,044,000

The United States exported during the same eight months boards, deals and planks to the value of $22,468,138, compared with $16,580,049 in 1905. British North America took 70,425,000 feet this year and 82,179,000 feet in 1905.

HARDWOODS.

The demand for hardwood lumber is some better this week, and the trade extends to about everything on the list. Prices are strong in proportion to the scarcity of stock, through there is only one really week spot. The birch trade is not satisfactory. The volume of demand is fairly large, but the abundance of stock in the hands of manufacturers and jobbers keeps the price situation in an unsettled state. Birch is being used in constantly increasing quantity, but manufacture has been more than keeping pace with the demand, hence the weakness. Oak is selling well to the factory trade. In fact, the factory trade is picking up, indicating that the supplies laid in during the early summer are getting low, and this demand is extending to basswood, elm, ash and some of the other woods. A very good appearing quartered oak is now being made of soft elm by the furnture factories, and it is deceiving some of the experts. The country trade is taking a fair amonnt of oak timbers and other yard stock. Red oak is scarce and white oak still more so, and, as usual, these items are the strongest on the market.—Mississippi Valley Lumberman.

THE BARBADOS MARKET.

Lumber conditions in the Barbados market are reported by S. P. Musson, Son & Company as follows:

"The arrivals during the fortnight consist of the schooner Arthur H. Whyte from LaHave, N. S., with 100,000 feet of white pine and spruce, and the schooner E. A. Post from Shelburne, N. S., with 190,000 feet of white pine, both cargoes to our care. We sold the white pine ex. former vessel at $30.27 and $23.37 for merchantable and second quality, and for the spruce we obtained $26.89 and $20.66 for merchantable and second quality respectively. The white pine ex. latter vessel we placed at $30.56 for merchantable and $24.08 for second quality. These prices may be said to be record ones, as we do not remember their being obtained at any previous time, and although we do not expect they will be maintained for any length of time, yet we have no doubt that a few more cargoes would do extremely well owing to the bare condition of our market. We hear that a sale of spruce to arrive was made yesterday at $22 for a cargo consisting of 4-inch wide and up lumber, and any arrivals of spruce will meet with a good market. The cargo of shingles which is expected from Gaspe, Que. has not yet arrived, and while the market for both Long and Laying Cedar is fairly supplied, yet we think that remunerative prices will be obtained for any shingles which may be coming this way."

THE COOPERAGE STOCK MARKET.

The Sutherland-Innes Company, Chatham, Ont., report as follows:

No. 1 staves are showing an upward tendency, on account of the small stocks on hand at the mills. Mill run staves are very unsettled; there are still considerable of these on hand at the mills, and some of the manufacturers are very anxious to sell them so as not to run any chance of having to carry them over into another year; the consequence is that the price of Mill Run staves varies according to the ideas of the different manufacturers; and while good mill run elm or mixed timber staves which are jointed strictly 9/16 in. bilge are in fairly good demand, the prices are still very close to the cost of production.

Considerable quantities of these staves have been turned down by the consumers and dealers on account of the joints, a great many of the manufacturers through some error having joined their staves 5/8 in. instead of 9/16 in. bilge, as required by the apple trade this year. This has been caused, to some extent, by the uncertainty of the apple trade, and the manufacturers jointing their staves with the idea that they would do either for the apply trade or for other purposes. The apple barrel coopers this year, however, are most particular as to the bilge, and will not take anything over 9/16 in. bilge, while there is quite a little demand for even ½ in. bilge to work up the higher bilge staves carried from last season or accumulated during the present run.

No. 2 staves are fairly steady, and there is quite an improvement in prices, more especially No. 2 28½" staves, which were for a considerable time a drug on the market.

Hoops maintain their price fairly well. There does not seem to be much variation, and the manufacturers who have the reputation of turning out an exceptionally good hoop are getting a little better price than they were a month ago, but there is practically no change in the price of hoops, excepting the keg lengths, which are sagging off considerably on account of the lack of demand.

Heading is improving considerably in price and as there are no very large stocks of heading on hand in the Wisconsin district, we look for prices to be maintained or increased in all sizes of heading.

To sum up the situation, both in slack and tight barrel stock, the market is in a better condition than it has been for some time; the tight barrel department is quite satisfactory to the manufacturers, but slack barrel prices are not yet on a remunerative basis, considering the heavy investments and the small production of the season.

CANADIAN LUMBER IN ENGLAND.

The following prices were realized for Canadian lumber at an auction sale held by Churchill & Sim, London, England, September 26th:

Quebec Pine.—Ex. Lobelia, from Quebec—13 ft. 3 x 9 in. unassorted red, £8 per standard of 1980 ft. Ex. Naparina, from Quebec—12-13 ft. 3 x 11 in. third quality, £12 15s. Ex. Mount Temple, from Montreal—12 it. 3 x 11 in. first quality, £22 10s; 13 ft. 3 x 11 in., £22 and £22 10s. Ex. Devona, from Montreal—10 ft. 3 x 11 in. third quality, £8 10s.

Spruce. — Ex. Yanariva, from Rimouski and Matane, Que.—9-16 ft. 3 x 8-12 in. unassorted, £9; 9-17 ft. 3 x 6-7 in., £8. Ex. Ontarian, from Quebec—12 ft. 2½ x 7 in. first, second and third quality, £8 15s. Ex. Dessborough, from Quebec—11-14 ft. 2½ x 11. fifth quality, £8 and £8 5s. Ex. Montezuma, from Quebec—10-15 ft. 3 x 6-9 in. third and fourth quality, £7 10s.

British Columbia Pine. — Ex. Nereide, from Vancouver—13-30 ft. 1 x 5 in.; £8 5s. 10-31 ft. 1¼ x 5 in. tongued, grooved and jointed, £11 3s.

Elm Timber.—Ex. Philæ, from Quebec—17-32 ft. x 12-32 in., 70s. per load of 50 cubic feet.

Birch Timber.—Ex. Philæ, from Quebec—7-logs, 22-in. and up, 90s. per load of 50 cubic feet; 10 logs, 22 in. and up, 87s. 6d; 8 logs, 22 in. and up, 87s. 6d; 11 logs, 20 in. and under 22 inches, 77s. 6d; 8 logs, 18 in. and up, 70s; 12 logs, 16 in. and under 18 inches, 67s. 6d; and 65s; 15 logs, 15½ in. and 15¾ in., 62s. 6d; 10 logs, 18 to 20 in., 65s; 11 logs, 18 to 20 in., 67s. 6d. and 70s; 10 logs, 18 to 20 in., 67s. 9d; 9 logs, 16 in. and under 18 in., 65s.

MILLIONS OF LUMBER BURNED.

Fraser & Company's lumber yard at Deschenes, Que., was swept by fire October 3rd, when about 26,000,000 feet of lumber, valued at upwards of $450,000, was burned. The fire broke out at 7.20 a.m., just after the employees had begun work for the day. When the company's firemen arrived several piles of lumber were ablaze and the fire was beyond control. The lumber consisted chiefly of pine and cedar of this year's cut, which had been sold and was awaiting shipment. The purchasers of the lumber included the Shepard & Morse Lumber Company, W. C. Edwards & Company, McArthur Export Company, Watson & Todd, and one or two American firms.

TIMBER AT QUEBEC.

Following is a comparative statement for three years of timber, etc., measured and culled at Quebec up to October 3rd, as furnished by the Supervisor of Cullers:

	1904 C Feet	1905 C Feet	1906 C Feet
Waney White Pine	2,020,160	1,075,000	641,160
White Pine	225,·60	133,520	76,520
Red Pine	15 920	1,200	13,420
Oak	247,160	140,320	503,480
Elm	254,120	484,520	602,120
Ash	14,640	9,960	8,880
Butternut	40	....	....
Birch and Maple	114 610	207,640	158,400

CURRENT TRADE CONDITIONS.

ONTARIO.

The past week has witnessed an advance in some of the lower grades of white pine lumber. Shipping culls and better, for instance, have been marked up in the Ottawa Valley list to $21 to $23 for 8-inch and $23 to $25 for 10-inch, and box boards to $19. The market is getting remarkably bare of these grades and the seller is able to get almost any price he chooses to ask. The Sarnia list is higher nearly all round, although the greatest advance is confined to the poorer grades, of which No. 1 mill culls at $17 to $18 and No. 2 at $15 are examples. The trade are looking for no weakening unless unexpected developments of a very unfavorable character should arise. The scarcity of white pine is helping spruce and hemlock, and to a lesser extent the hardwoods, and we would not be surprised to see higher prices all along the line before many weeks. There is a revival of activity in lath, as might be expected at this season of the year. Buyers are plentiful, and in Toronto the retail price of No. 1 white pine is now about $5.50. The supply is decidedly short.

EASTERN CANADA.

The spruce situation is practically unchanged, although some additional strength has been shown during the past fortnight owing to more inquiry for British specifications. Prices in the Eastern States are also showing a tendency to advance and the situation as a whole is favorable to the holder of lumber. Considerable interest is shown in the lath market, which has developed activity and strength. As stocks are light, prices are likely to advance further. New Brunswick cedar shingles are firm at $3.50 to $3.60 for Extras, Boston delivery.

WESTERN CANADA.

The lumber demand of the West shows no abatement. Finishing material is now being called for in large quantities and the planing mills are exceptionally busy. Prices are firm, with an advancing tendency. The British Columbia mills are carrying very light stocks in their yards and the burning of the ssw mill and shingle plant of E. H. Heaps & Company, of Vancouver, will further curtail the production, which for some time has been below the consumption. Logging operations are active, but prices are still high and there seems no likelihood of an increase in the available supply of logs in the near future. The demand for shingles is not as strong as for lumber, but there is no accummulation and the market is steady.

UNITED STATES.

The car shortage is greatly restricting the movement of lumber in the United States, and in some districts the mills have been obliged to close on this account. Consumption is all that could be desired and dealers are kept busy supplying the wants of their customers. The lower grades of white pine have advanced from $1 to $2 at Buffalo, while some dealers are also asking increased prices for the upper grades. The stock of white pine in the Lake Superior district is believed to be less than at the close of the season at any time within the past decade. Hardwoods are showing considerable activity. The demand for birch and basswood is excellent, but as the supply of the former is large, there has been no change in price. Basswood, the stock of which is not heavy, has strengthened.

There is a scarcity of all kinds of lath.

In Boston spruce lath ranges from $4.25 to $4.50, while in Chicago, where the white pine variety is used, the price is $5.00 to $5.50 for No. 1.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, October 11, 1906.—The destruction of large quantities of lumber by fire near Ottawa has created a temporary panic in the market but it will not prove serious nor last long. Fraser & Company, the heaviest losers, give the opinion that although the fires were unusually destructive, the quantity of lumber removed from the market is too small to affect prices. This firm has not been able to figure its loss definitely, but Mr. W. H. A. Fraser states that the yard visited by fire contained 25,000,000 feet of red and white pine. About 15 per cent. of this was saved. The lumber was worth about $20 a thousand. The value of the lumber consumed would be $425,000. A large quantity of it was sold and in possession of the W. C. Edwards Company, Shepard & Morse, Laidlaw & Company, and others. The Frasers carried $313,000 insurance on what they held and the other companies had $200,000 insurance, so that the lumbermen stand to lose little. A revised estimate of the value of the lumber of the Robert Hurdman Estate destroyed by fire is $80,000. There was 3,500,000 feet of red and white pine and 150,000 feet of spruce. This lumber was in R. & T. Ritchie's yard at Aylmer and was cut by them, but this firm had no material loss of lumber. The Hurdman Company had practically all its sawn lumber destroyed and the fire has caused some inconvenience where sales were made. Otherwise the firm is not affected. The Robert Hurdman Estate has enough logs ahead for next summer's mill operations and will not make any logs in the shanty this year.

Fraser & Company have shanties going on Deep and Black rivers, taking out pine. The operations will be much curtailed compared with last year. A representative of the firm states that excessive cost of shanty work is responsible for the falling off in activity.

Hurdman & Elmitt report brisk work in taking out hardwood timber on Gatineau limits, but like other manufacturers they say cost of labor and supplies is an immense burden.

The keen demand for lumber continues. The large number of inquiries for pine shipping culls has led to an advance in prices of a dollar a thousand. Large sales of pine box boards have been the most important feature of the market recently. Exporters are unanimous in reports of a brisk trade in this line of lumber. The mills have turned out an unusual quantity of box boards and found a ready market for it all. The buyers come from both the United States and Ontario.

No decline is noticeable in the demand for lath and dealers anticipate an increase in present quotations rather than a drop. During the season, when the best pine varieties sold at $4.50 a thousand, no person laid in a supply, so that the ordinary consumption will necessitate at least a continuance of current rates. Buyers from the United States and the west of Canada are giving big orders for No. 1 white pine, while large sales are being made locally of No. 2 white pine at $3.50 and $3.75 a thousand.

The depressing effect of low water continues to hamper operations in most of the Ottawa Valley mills. J. R. Booth is affected very much and his pulp mill has been practically thrown idle. Fortunately, the 5,00 or 6,000 tons of pulp he has ahead will feed the new paper mill which is about ready to start.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., Oct. 11th, 1906.—The attention of the local lumber people is occupied just now to a very great extent with the making of arrangements for getting logs during the coming winter. Most of the important operations are now under way, but considerable difficulty is being experienced in obtaining competent men. For ordinary choppers, the wages paid range from $28 to $30 per month, and even though willing to pay these figures, many operators are shorthanded.

Speaking generally, contractors are obtaining somewhat higher prices for logs in most cases 25 cents and in some cases 50 cents per thousand feet.

Just at present, the spruce lath trade is claiming a great deal of attention. A marked eagerness on the part of buyers is discernible and this condition, taken in connection with the fact that local stocks are light and that there is no perceptible anxiety to sell, is having a tendency to boost local prices. A prospective purchaser would be quoted $2.65 per thousand on dutiable slab-lath and $2.90 on non-dutiable, f. o. b. schooner St. John. Stocks of lath on local wharves would total to from 3,000,000 to 3,250,000, of which quantity the much larger part is dutiable.

The trade in spruce deals for export to the United States has been steady and fairly brisk thus far throughout the autumn. Values have been quite uniform and no important change is expected in the immediate future. During the present month the volume of business

The LONG LUMBER COMPANY, HAMILTON

has not been so great in this line as was the case during September and the demand perhaps lacks snap, although so far prices have shown no sign of weakening. Local stocks of this line of goods are very light, one and one-quarter to one and one-half millions of feet would cover the quantity.

All indications point to the conclusion that, when the above mentioned quantity has been cleaned up, the volume of shipments of deals from this port to the United States will be more than ordinarily light throughout the remainder of the year, the average weekly output being far lighter than is usually the case owing to the fact that several of the largest "American" manufacturers are sawing for the English trade.

An inquirer for non-dutiable spruce deals, etc., would be quoted figures closely resembling the following: 10 x 3 and 12 x 3, $19 per thousand sup. feet; 9 x 3, $16; 6 x 3 ond 8 x 3, $14. One inch boards, $13,75; 2 x 3, 3 x 4, etc., $13, (all f.o.b. St. John.)

Charters by sailing vessels to New York City are being made at $3.50 per thousand on long lumber and 70 cents per thousand on lath.

STOCKS AND PRICES.

The St. John Railway Company, St. John, N.B., will receive tenders up to October 20th for supply of the following spruce piling: 122 pieces 35 ft. long, 122 pieces 38 ft., 123 pieces 40 ft., and 123 pieces 45 ft., all 12 inches square across butt and not less than 7 inches at top.

The Board of Trustees of the Washington Shingle Mills Bureau have decided to issue a circular to all mills within the jurisdiction to sell shingles either on the basis of $1.80 and $2.15 or $1.90 and $2.25 f.o.b. mill for Stars and Clears. The former price is that offered by the members of the Wholesalers Club who are fighting to maintain a steady market in the East at $1.90 for Stars and $2.25 for Clears plus the freight. The other faction among the wholesalers have been offering the mills $1.85 for Stars and $2.20 for Clears, putting their cars in transit and selling to the Eastern trade at from 10 to 15 cents advance plus the freight.

TIMBER LIMIT TRANSACTIONS.

The Department of Interior, Ottawa, are asking for tenders up to Wednesday, October 24th, for a license to cut timber on Berth No. 1282, situate in the Province of Saskatchewan and comprising twelve square miles south of the Etoimani river, and Berth No. 1281, situated in the Province of Manitoba and comprising sixteen square miles in Township 44.

London, Eng., has imported 670,000 pieces of pine deals from St. Lawrence river ports this year, against 549,000 pieces in the corresponding period of 1905.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
137 Bay Street, Toronto.

A FEW CARS NO. 1 AND 2 MILL RUN heading for sale, 17⅞" and 18⅜". Address W. N. BUCK, Port Rowan, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market may fairly be characterized as buoyant, the demand being exceptionally good and stocks comparatively light. "The man who has lumber for sale occupies an enviable position, for he can obtain almost any price he may choose to ask," was the way in which a local dealer explained the situation. He had just booked a large order for pine at a price which represented a substantial advance over the quotations of a few weeks ago. The buyer of to-day, although willing to pay high prices to get the lumber, is not as exacting in respect to grades as when prices were lower, and consequently stocks which have not been considered very desirable are finding a purchaser. This is evidence of the inherent strength of the market. In the Ottawa Valley, where stocks are short, spruce, basswood and birch have advanced. Contracting for the 1907 cut has commenced and we are informed that sales have been made averaging $3 per thousand above the figures realized for the present year's production. It would not be surprising, however, to find a disposition on the part of manufacturers to defer entering into contracts until after the turn of the year, inasmuch as those who sold early last year had reason to regret their action.

British Columbia kiln dried cedar, for Ontario delivery, is this week advanced to $54, air dried boat lumber to $57, Douglas fir timber to $37.80, and flooring to $44.

EASTERN CANADA.

Recent rains have moved a quantity of logs which were hung up in the St. John river, and it is probable that the mills will continue operations later than usual this year, as there is a good demand for lumber. Spruce boards for shipment to the Eastern States are wanted, and buyers seem willing to pay current prices, as there is little probability of a lower range of values before next midsummer at the earliest. Eastern cedar shingles are selling freely at $3.50 for Extras for Boston delivery, while some of the standard brands are held at $3.60 to $3.70. Most of the season's production having passed out of the hands of the manufacturers, shippers are in a position to secure full prices throughout the winter months.

WESTERN CANADA.

The condition of the lumber trade of Western Canada continues prosperous in the extreme. The building permits issued in Winnipeg this year have already exceeded $11,000,000, and so great is the demand for building material that the mills and retail yards are taxed to their utmost. Prices are strong all along the line. The recent advance by the British Columbia manufacturers is now in effect, but it does not seem to have checked the demand in the least. This advance is $1 per thonsand on boards and timbers, $2 on No. 2 flooring, ceiling and siding, $1 on No. 3 flooring, ceiling and siding, and $2 on No. 2 boards and shiplap.

UNITED STATES.

There is nothing in the white pine situation to indicate any weakness, as the demand continues very heavy and prices firm. The weather has permitted the northern mills to continue operations without interruption, but it is believed that all the lumber manufactured will find a market before the 1907 cut is in shipping condition. There is an excellent demand for box lumber,

as may be determined from the fact that a Chicago dealer last week sold 7,000,000 feet of No. 5 boards to a local box manufacturer, this being the entire product of that grade to be manufactured by a Minneapolis mill next season. The price was based on current quotations. Buffalo and Tonawanda dealers are booking orders freely and report that the tendency of prices is to harden. Hemlock is in a strong position and Boston buyers are paying $20 to $22. Cargo prices for Chicago delivery are $17 for piece stuff. The spruce situation has improved. Boards are very scarce and in some cases buyers having mill facilities have purchased carloads of 2 x 6 inch and 2 x 8 inch to be resawed into boards. Spruce lath is held by a few mills at $4.50 for 1⅝ inch and $4.25 for 1½ inch, although sales are being made below these figures.

GREAT BRITAIN.

The situation in Great Britain is still one of considerable uncertainty in respect to new business, as importers are fighting the high prices which are now ruling. The quantity of lumber on the public docks at London is a little heavier than at the corresponding time last year, but considerably lighter than in the four previous years. If consumption should improve during the winter months, there will be very light stocks in the spring. The import of white pine lumber this year been light and prices are firm. Consumers are being urged to buy now, as nothing can be gained by waiting. The spruce situation is strong, and as imports from the St. Lawrence will cease in a few weeks, there does not seem to be any likelihood of prices. The lower grades of spruce are being bought in large quantities for the packing trade.

STOCKS AND PRICES.

In Wisconsin No. 3 basswood is bringing $14 and No. 2 $16 at the mill.

For the twelve months ending June 30th, 1906 statistics show that a total of 641,531,000 spruce lath were exported from Canada to the United States.

The Vigars-Shear Lumber Company, Port Arthur, have secured the contract for supplying nearly half a million ties for the Canadian Northern Railway.

Up to October 1 the Fredericton Boom Company, Fredericton, N. B., had rafted 120,824,000 feet of logs and the total for the season may run close to 130,000,000 feet, which is ahead of last year's record.

The Spanish Boom Company have rafted and sorted 2,600,000 pieces, estimated to contain 150,000,000 feet. There will be held back in the stream about 10 per cent. of the output, which will be carried over for next season.

The Sturgeon Lake Lumber Company, of Prince Albert, Sask., have given a contract to the British Columbia Construction Company to get out 17,000,000 feet of logs on the Company's limits 20 miles north of Prince Albert. The contract is the largest individual contract ever let in Saskatchewan and involves an expenditure of about $150,000.

The LONG LUMBER COMPANY, HAMILTON

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., October 8th, 1909.—"Conditions in the shingle industry in British Columbia are fair," stated Mr. H. H. Spicer, manager of the Export Lumber Company, to-day. "There has been no change in prices since July, and at the mills the figures quoted are $2.05 for XXX, with No. 2's at $1.20. There is a XXXX brand which is shipped specially to Ontario, this being sold at $2.20. The demand for shingles is not particularly heavy just now, particularly from Ontario. A number of reasons may be given for this, but they are the usual causes which affect the market. There is a small quantity shipped to the United States from British Columbia.

Shingle bolts are scarce at from $4.25 to $4.50, and since winter is at hand, when wet weather will make work more awkward in the woods, the price will likely be high for several months to come.

Mr. R. H. H. Alexander, secretary of the B. C. Lumber and Shingle Manufacturers' Association, states that there is no special feature in the lumber market, beyond the increase made ten days ago of $1 on all classes of product. As explained before, this increase was deemed necessary because of the high prices of logs and labor, both of which are very scarce.

Stocks in the mill yards are away down, and all the better kinds of lumber are cleaned out. What are in place are the rougher grades, and not much of them.

There is no change in the log market. Notwithstanding that July was a record month, with 26,000,000 feet put into the water, and August capped this with 35,000,000, there were none too many. September had a number of rainy days, but it is expected that the output of the camps will be very high. Still prices are hovering around $9 and $10, and with bidding goes higher.

The burning of the mill and shingle plant of E. H. Heaps & Company on Saturday night last, with a loss of $200,000, will seriously affect the market. The daily shipping capacity of lumber was a little over 200,000 feet, with about 70,000 shingles. The company had orders for four months ahead for lumber, and these will necessarily be thrown back on other mills, which are already going to the utmost of the log supply. The Heaps Company has another mill at Ruskin, but this too is being worked to capacity.

Scarcity of cars is hampering the shipment of lumber by coast mills. One to close down for a week or ten days is the mill of the Nanaimo Lumber Company.

Orders for about a million feet of lumber have been placed with coast mills by the G. T. P. Company, supplementing those already being filled by mills in the north. The material is required for construction purposes at Prince Rupert.

A. F. Holden, Pres. J. M. Diver, Gen'l.-Mgr

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
79 Adelaide St. E., Toronto.

A FEW CARS NO. 1 AND MILL RUN heading for sale, 17⅛" and 18⅜". Address W. N. BUCK, Port Rowan Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The strength of the lumber situation is now so universally admitted that not a pessimistic word is heard. Dealers are giving their attention to picking up white pine lumber wherever it can be found, for the supply is getting scarce and there may be some lively bidding for stocks before spring. United States buyers are taking the Ottawa Valley stocks more liberally than in any previous year, and competition from this source has been responsible for a recent advance of from $1 to $2 per thousand in the price of the lower grades. Toronto retail dealers are as busy as is possible. Building permits so far this year have exceeded $11,000,000, and the fact that the figures for the month of October are almost as large as any previous month would indicate a continuance of the prevailing activity and a large demand for lumber during the winter season. Hardwoods are going into consumption on a moderate scale, but that branch of the lumber trade shows none of the buoyancy which is seen in white pine and hemlock. There is a feeling that birch should improve further, as it is low in price when one considers the many purposes for which it is suited. Lath are scarce and strong.

EASTERN CANADA.

It is understood that the quantity of oak timber which will winter at Quebec this year will not exceed 200,000 cubic feet, which is much less than a year ago. The production this winter will also be light, and higher prices are predicted.

irch is showing a little more trength. Offers for spruce deals or export to Great Britain are said o have been lowered about fifty ents per thousand, but the trade egards the weakness as temporary nd the result of misunderstanding f the exact situation, which is real- strong. At time of writing it is ot known whether the recent rains ere sufficient to bring any quantity f the hung-up logs down to the ills. "Extra" cedar shingles are elling at $3.50 on Boston rate of reight.

WESTERN CANADA.

Building permits issued in Winnipeg up to the end of October exceed $11,000,000, which means that a ast quantity of lumber has been onsumed by the building industry. he demand continues as keen as ver, and the dealers and builders re being greatly inconvenienced y the inability of the railroads to ake delivery of lumber purchased ithin a reasonable time. The ills throughout all Western Canda have more business than they an handle, but with orders so lentiful a shut-down has become ecessary in some instances owing o the scarcity of cars. The conitions may result in a further dvance in lumber prices. Shingles re less active, but stocks are not arge and prices are not likely to ecede owing to the high cost of roduction.

UNITED STATES.

White pine lumber is firm in all he United States markets. The hipments from the Lake Superior ills have been somewhat lighter han last year, but as the sawing eason is about to close and manuacturers' stocks are not heavy, there s not likely to be any difficulty in aintaining present prices. Stocks t Buffalo and Tonawanada promise o be of normal size, but the Albany upply is lighter than usual. There s a strong demand for all classes of common lumber, with indications of slight advances on certain sizes and grades. The spruce market is steady but does not show much animation. For prompt shipment $24 has been paid for 9-inch and under, Boston delivery, but sales are still being made at $23. Strength in ash, birch and basswood is the feature of the hardwoods. There is a good demand and the outlook is favorable. Lath does not recede from its high price, but on the other hand where the buying is brisk, the seller has been able to obtain a slight advance. For 1 5/8-inch spruce lath $4.50 has been realized at Boston.

GREAT BRITAIN.

Business in Great Britain is still on the quiet side, but nearly everyone is hopeful about the future. Buyers are not disposed as yet to close contracts for next year's delivery, but as the tendency seems to be towards a higher range of values, there cannot be much gained by waiting. Pine deals of first and second quality are strong, the supply light, and inquiries on the increase. The lower grades are less firm. One or two cargoes of spruce have recently been sold below the ruling price, and the market is temporarily weaker, but in the face of higher freight rates and insurance charges, there can be no good reason for any general decline, and as soon as the effect of these forced sales is lost, a recovery will no doubt take place.

STOCKS AND PRICES.

Mutchenbacker Bros. have closed their mill at Mafeking, Man., and started operations in the woods. They expect to take out 7,000,000 feet this winter, which will be nearly double their production of last year.

Of cooperage stock Mr. James Innes, of the Sutherland-Innes Company, says: "Even with the moderate demand for stock, the mills are getting pretty well cleaned out, especially on heading. Hoops, of course, are being made right along, and will be made in large quantities as long as the favorable weather for trucking hoop logs continues. Stocks of staves, however, are decreasing rapidly, and there is likely to be a considerable shortage of staves, if there is even a moderate demand for apple barrel stock, in addition to the demand for other classes of material."

We quote from S. P. Musson, Son & Company, Barbados, as follows: "The schooner "Drusie", from Gaspe, Que., brought down 85,000 feet spruce lumber, which represents the receipts for the fortnight. This lumber has not yet been placed on offer, but should elicit a good price when sold, as our market for spruce is very bare and the demand at this season active. There has been no further arrival of white pine, and the two cargoes reported in our last are being rapidly used up, so that further arrivals of both this and spruce will fetch exceedingly good prices. Shingle receipts comprise 185,000 Long Gaspe and 15,000 Laying Cedar ex "Drusie", which have not yet been sold. They should bring good prices as stocks are not heavy, especially in Long Cedar, and the demand has been very good in consequence of the rainy weather.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, October 26, 1906.—The market is especially buoyant for basswood and birch in the Ottawa Valley. The demand is so great that many buyers are unable to get the large quantities they require. The better qualities are the scarcest. The large sales of basswood are due partially to the substitution of this brand of lumber for the higher-priced article, and the market is also affected by the general keen demand for lumber. The demand for spruce also continues good, and despite advances in prices buyers are anxious to place orders. Spruce commands three dollars a thousand more than it did last year.

W. B. Bartram & Company, who handle birch, basswood and spruce, find that their sales for the season will be double what they were in 1905. The firm raised prices on spruce last week, but the increase did not discourage buyers. Almost 75 per cent. of the Bartram Company's spruce is going to the United States. There is an unusually large number of inquiries for 8 x 1¼ and 9 x 1¼, but all varieties are sought eagerly. On account of the many

orders booked for basswood and birch the Bartram Company is carrying on more extensive shanty operations than usual and will take out a large quantity of lumber on the Rouge river.

Though prices in all grades of lumber are exceedingly high, manufacturers do not anticipate a decline in the near future. Already it has been pointed out that logging operations are too costly to permit a drop. Another sign of sustained quotations is the desire of buyers to lay in supplies for the spring trade, for they do not contemplate a weakening in prices.

The James MacLaren Company, of Buckingham, has done practically no work since the strike in the mill six weeks ago, when 500 men left their places. The cessation of work has had a serious effect on the output of lumber. The Company has 50 men employed under military protection but all their time is devoted to sawing for the pulp mill. As a result of the strike a great number of logs will be frozen in the Lievre river this year.

The wet spell of last week gave a set-back to shanty operations. Some of the large firms who had been sending gangs away suddenly stopped and it will require some hard freezing weather to revive the activity in the woods.

The Pembroke Lumber Company have just about filled their shanties on the Jocko river, and Holland & Graves are nearly done hiring for their limits along the Wahnapitae river.

Companies who are able to draw on their mill gangs for shanty hands are in an enviable position, for men are exceedingly scarce. Wages is firm at $35 a month for log makers, which is an advance of $3 over last year. The demand is so good that the laborer has plenty of choice to where he will go for the winter.

The low water which has been menacing the Chaudiere industries all along has closed Mr. J. R. Booth's pulp mill completely. Mr. Booth has decided to let the pulp grinders stand idle in order to divert all the water power to the lumber mill. Any time that the volume of the river increases sufficiently the pulp machinery will be put in operation again and it will start anyway as soon as the saw mill closes for the winter.

The Eddy pulp mill has been partially stopped also, to save the power for the manufacture of paper. Low water has interfered with pulp making in many parts of Canada. The lumber kings hope to find partial relief through an arrangement the Dominion government has made apportioning the Chaudiere into water lots. This, however, does not immediately increase the supply of energy, but it is expected steps will be taken to provide effective dams before long. The reduction of the falls has been the greatest menace of years to the Ottawa lumber industry.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., Oct. 22nd, 1906. —The log operators at the head of the St. John river and along its branches are getting under way in earnest with their operations. The difficulty being experienced because of the scarcity of men is still a feature. From $27.00 to $32.00 per month for competent choppers is being paid.

A feature of many contracts this year is the limitations being placed upon the contractors in regard to size and percentage of battens, which will necessitate the leaving of many of the smaller trees which in other years would have been cut. A tendency in this direction has been apparent during several seasons past and this year the idea is being carried out more thoroughly than before.

A heavy rain at the headwaters has been reported and the river has risen materially during the last few days, but whether or not this circumstance will have any effect upon the logs which are at present hung in the Grand Falls section, is a mere matter of conjecture.

The trade in Great Britain for New Brunswick spruce has shown no important change during the past month. Up to October 15th —which is the date set by law for the adoption of the six-foot deck-load on steamers loading to cross the Atlantic—shipments in this line from this port were considerable in volume and the result is that the wharves in this city and vicinity show very light stocks. The object of this eagerness to ship is to get away as much as possible before the increase in frieght rates, contingent upon the necessity of a smaller deck-load as mentioned above.

At present writing, none of the local manufacturers are carrying in stock more than a few hundreds of thousands of feet of "English" deals and, taken all together, these quantities would not total to more than 1 1/2 millions of feet. Being thus practically cleaned up on this line, it is apparent that the receipts from this vicinity will be very light at the other end during the next two months. Such quantities as will gather on the local wharves between now and the usual closing down of the mills (early in December), will practically all go forward piecemeal by the winter liners.

Local feeling in regard to "English" deals indicates confidence in the strength of the market. An enquirer for this line of goods, in a specification containing say 35% 7's, 50% 9's, and 15% 11's and wides, would probably be quoted no lower than $14.00 to $14.15 per thousand superficial feet (two-thirds price for fourths and ends) f.o.b. steamer St. John.

TIMBER LIMIT TRANSACTIONS.

The right to cut timber and ties in Barr Township, District of Temiskaming, has been granted to Brennan Brothers, of Hamilton. The price is $6.77 per 1,000 feet board measurement, for white pine, red pine, jack pine, and spruce, and $3 for tamarac and cedar, in addition to the regular Crown dues of $2 per thousand feet. For the ties the price for jack pine, tamarac, and cedar is five cents per tie bonus in addition to the Crown dues of 5 cents per tie.

The announcement was made last week that Hood Bros., Spokane, Wash., had purchased 13,000 acres or a little over 20 square miles of timber land on Crazy creek, about ten miles west of Revelstoke, B. C. from the Eagle River Lumber Company, for the sum of $175,000 cash. The deal was directed by Messrs. Alex. McRae and S. A. Mundy, the latter being vice-president of the Eagle River Lumber Company.

TIMBER LIMITS FOR SALE.

An auction sale of timber limits which will no doubt attract a large number of persons will be held in the Russel House, Ottawa

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
79 Adelaide St. E., Toronto.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

FOR SALE—HEMLOCK AND HARDWOOD sawmilling and timber proposition including good mill and virgin timber. Rail and water shipments and best location on Lake Huron. Address Box 417, CANADA LUMBERMAN, Toronto, Ont.

HEMLOCK LOGS WANTED

WANTED TO CONTRACT FOR LOGS, TO be cut next winter, any quantity up to five million feet Address Box 377, CANADA LUMBERMAN, Toronto, Ont.

SPRUCE LATH

WE SUPPLY A LARGE TRADE THE year around, and are consequently always in want of laths, both 1¼" and 1⅝". Write us. CHARLES S. WENTWORTH & Co., 70 Kilby Street, Boston, Mass.

CURRENT TRADE CONDITIONS.

ONTARIO.

It is now generally conceded that there is likely to be a shortage in the supply of white pine lumber for the winter and spring trade. The extent of this shortage will depend largely upon the consumption during the winter months, which cannot be determined at the present time. The lumber market is quite buoyant, with stock always in request. The urgent buying of the lower grades in the Ottawa Valley has resulted in an advance in the price of pine shorts, which are exceptionally scarce. British buyers have been endeavoring to close contracts for next year's production, but the manufacturers do not seem anxious to sell. Hemlock and hardwoods are showing a strong undertone. Although stocks of hardwoods are still comparatively heavy, the situation is greatly improved as compared with one year ago, and if the log production this winter should again be light, hardwood prices should advance to a more remunerative basis. White pine lath is, if anything, a little stronger, as the mills are now asking $4.75 for No. 1, which makes the wholesale price in Toronto about $5.25.

EASTERN CANADA

No signs are yet visible of any falling off in the demand for building lumber in Montreal, where numerous structures are still in an unfinished state. If the winter should prove mild, building operations will continue almost without cessation. The lumber supply is light and prices very firm. The demand for New Brunswick spruce lumber cannot be termed as active, although in view of the light stocks, the situation is considered very healthy. Spruce boards are more asked for than deals. There has been another upward turn in cedar shingles and most of the large mills are now asking $3.60 for Boston delivery.

UNITED STATES.

Nothing has happened during the past week to weaken the lumber market, as the weather has been exceptionally fine. The approach of winter will likely have an effect very shortly and a falling off in country trade may then be expected

Prices on all grades of lumber are firm, with the lower grades of white pine in very strong demand. No. 4 boards are selling at $18.50 delivered in Chicago, and No. 5 at $14.50. Buffalo dealers report a good trade and notwithstanding that prices are considerably higher than they were last fall, there is little hesitation on the part of the buyer. Spruce is not showing as much activity as other classes of lumber. Asking prices at Boston are $23 for 9 inch and under and $25 for 10 and 12 inch. The hardwoods are in a very healthy condition. Birch is selling freely and shows a tendency to stiffen in price. Basswood, maple and ash are improving slowly, but steadily.

White pine lath are slightly firmer, $4.75 being the asking price of No. 1 at the mill. Shingles are also showing increased strength.

GREAT BRITAIN.

The rise in the Bank of England rate has seemingly further restricted the buying of lumber and has almost entirely checked the speculative tendency. It is almost impossible to discern any improvement in the demand notwithstanding that consumers are beginning to realize that a higher level of prices must be faced. The spruce market, however, is again steadier and it is not possible to purchase at any concessions. For 9-inch and up, the ruling quotations are £9 to £9 10s per standard, and for 7 and 8 inch, £7 15s. There is more demand for sidings than for any other class of pine, although the lower grades of deals are enquired for to some extent and stocks are unusually low. Birch is still too heavily stocked and the experience of the past season does not augur well for shipments next year.

The Sutton Lumber and Trading Company's new saw mill at Musquito Harbor, Clayoquot, B. C., has commenced operations.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., October 22nd, 1906.—If conditions in the shingle industry were as prosperous as those in the lumber part of the business, manufacturers would have little cause for complaint. As it is, the shingle men have to contend against a scarcity of labor and of bolts, without having the very considerable amount of trade which is coming to the lumber manufacturers. Yet, business is accounted fairly good, with prices firm. The shingle market is mainly domestic, with a good local trade. The Ontario shipments feel the keen competition with other brands than those turned out in British Columbia, and the $2.25 shingle f.o.b. cars, produced here especially for Ontario dealers, is without doubt the best in the world. The XXX, which forms the main portion of the supply, is strictly a high class article, and meets with general favor. This is the brand that is shipped to the United States, and since it is able to successfully compete with the American shingle, even with the handicap of a duty, shows that it has superior excellence. Puget Sound mills are pressing B.C. manufacturers for a close season in shingle production, but it is a question if the mills here will shut down at any time during the winter. Bolts are as scarce as ever.

Mr. T. F. Paterson was reported the other day with saying that lumber would be raised again in price pretty soon. In regard to this a millman said this morning: "Mr. Paterson bases his remarks, evidently, on the labor and log conditions. Both are very scarce and the prospect is that they will continue so during the winter. There has already been considerable wet weather this fall, which has had an effect on the output from the woods. The scarcer the logs, the higher the price, and millmen cannot afford to pay the increase altogether. We will probably have more fine weather before the rainy season sets in, but if no great opportunity for getting out logs is given, then I can see nothing else but another increase. It looks high now, with rough lumber at $16, but in all cases the advances have been forced."

Mills are talked of in the north, but in the meantime the work at Prince Rupert is necessitating the ordering of lumber from this part of the province. The Chemainus mill has obtained a large order for immediate filling.

John Arbuthnot and associates, who purchased the Nanaimo Lumber Company's interest, will enlarge the mill. The name is now the Red Fir Lumber Company. Scarcity of cars caused a recent shut-down there for about ten days.

Joseph Patrick, president of the Drummond Lumber Company, which operates on the St. Lawrence river, is one of the latest to come west after timber. There have been some very large purchases of timber of late, particularly in the interior. Hood Bros., of Spokane, secured about twenty square miles west of of Revelstoke, and will build a large mill and engage in the Northwest trade. The illimitable business developing in the prairie provinces, with the high prices of lumber, are attracting Americans, and every week some purchase by them is reported.

BRITISH COLUMBIA LOGGING.

Logs scaled by British Columbia Government scalers in September totalled 28,413,467 feet, according to the returns filed by A. Haslam, in charge of the scaling dapartment. This is a falling off from the previous month's returns of seven million feet. As winter operations are handicapped on this coast, it may be expected that there will be a further reduction in the quantity of logs marketed during the winter. As the lumber demand is still as active as ever, and mills are months behind with their orders, there is no question but that there will be a scarcity of logs to keep the big mills going during the winter season. British Columbia is a good place for skilled woodsmen and loggers who are sober, steady and willing to work. Wages are top-notch now, and the logs are selling at $8 to $11 in the water.

Forty-four hardwood manufacturers in Michigan had 36,000,000 feet of unsold lumber on October 1, compared with 49,000,000 feet on July 1.

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, Nov. 5, 1906.—The lumber market has witnessed some very sharp advances in pine shorts. The prices are now excessively high compared with previous quotations in Ottawa, but buying is as active as the low stocks will permit. One inch good pine shorts of the narrow variety command $30 a thousand and seven inch and up is selling at from $37 to $40. As high as $45 is paid for the best two-inch stock. The quantity of No. 1 and No. 2 barn on hand is probably lower than any other sort. This accounts for a recent rise in price. The inquiries for this line have fallen off recently purely because the manufacturers were unable to supply the stuff. The demand for birch, spruce and basswood continues brisk and the best varieties are almost impossible to get. The closing week of October brought a great volume of orders for most of the fine grades of lumber from the United States. These buyers are willing to pay such handsome figures that it looks as if the sales of deals to Great Britain would decline greatly in the near future. British buyers are trying to close contracts in Ottawa for next season's cut with some big manufacturers, but their offers cannot be considered. It will not pay the lumbermen to cut deals when the American buyers are so aggressive and high quotations ruling. The continued strength of the market is astonishing local lumbermen. The run of stocks has been so great that in most classes of lumber in this paper's price list it would be difficult some days to purchase a car load, while a few years ago millions of feet would be easily procured. The present market conditions are not likely to change hurriedly either. A representative Ottawa dealer expressed his opinion to the CANADA LUMBERMAN as follows: "For the last two years it was thought that prices had reached such a height there would be reaction. These views were held by the very best informed in the trade. But they have changed their opinions. Many people today think that there will be no weakening and that present prices regarded as high are merely a moderate standard of what lumber is to be at its lowest the next three to five years. At no time in the history of the lumber trade in Ottawa or Canada has there been such radical changes as in the last three years. It has now reached such a point that it looks as if there was going to be a great change in what used to be fixed markets in Canada. Conditions and prices have reached such a point that English trade has to pay much more or practically surrender the whole lumber trade to local and United States markets. It looks as if care would have to be taken not so much to get a market outside as to reserve lumber for our own uses in Canada. In Ottawa lumber is not to be had at all."

The scarcity of lumber in Ottawa is partially due to difficulty of getting logs. The cut was greatly reduced. The Shepard and Morse mill, for instance, would have run at night all season if it had the logs. Only a very small portion of some 400,000 logs put into the Ottawa river by this firm last May has yet reached the mill in Ottawa. The Braeside mills were completely closed for five weeks owing to this circumstance. The Hawkesbury Lumber Company had also to close down for some days in September for want of logs and Ritchie's mill in Alymer was prevented from running steadily at night for a similar reason. It is learned from the Upper Ottawa Improvement Company, which has charge of bringing down the logs, that it is extremely difficult to keep up a steady supply of logs for the many lumbermen who have interests on the Ottawa.

The James McLaren Company mill at Buckingham is still running with 60 hands, who are protected by 33 special policemen. Most of the 500 men who went on strike two months ago have gone to work in the shanties for other lumbermen. The McLarens have as many men as they are able to secure. It is difficult to surmise what permanent effect the strike will have on this industry which has practically made Buckingham. The strikers are determined to hold to their demand next spring and in any case it is not likely any of them would be re-engaged. Nearly all of them have their homes in the town and an attempt to replace the whole number would have far reaching effects. The seriousness of the roit which occurred October 8th was shown by the verdict of the corner's jury rendered on October 31st declaring two members of the firm, five detectives, five strike leaders and a local magistrate responsible for the death of two strikers. The detectives are censured for not trying to effect peace by arrests instead of open battle and the strikers must answer for encouraging their leaders. Messrs. Albert and Alexander MacLaren were named in the indictment not because they participated in the fight, but for bringing in the Thiel detectives. There was a sound reason for procuring this armed protection in view of the danger of setting fire during the hostilities between the company and the men. The MacLaren's insurance in Buckingham amounted to $557.500 exclusive of $75,000 on their private residences. The insurance companies insisted upon having 33 men to guard that property immediately after the strike was declared at the peril of cancellation of the policies. Up to and before October 8th insurance inspectors had come to Buckingham to see to this matter so that the company found itself in a critical position. The extra expenses to the company since the labor trouble began is nearly $50,000.

Log run ash is worth $26 at the mills in Wisconsin. Ten years ago it was selling for $9.

TIMBER LIMIT TRANSACTIONS.

J. Newton Pugsley, of Parrsboro, N.S., has purchased from A. C. & C. W. Elderkin the lumber property on the western part of Cumberland county, known as the Eatonville property. This is one of the best timber berths in the county and covers an area of about eighteen thousand acres of well timbered land. The price paid is in the vicinity of $90,000.

Messrs. G. Diederichsen, jun., of Hamburg, P. Lorentzen Apenrade, and M. Jebsen, ship-owners, of Hamburg, have purchased Easton & Company's timber limits on the River Portneuf, Quebec. The property, which is 484 square miles in extent, is on the north shore of the St. Lawrence, about 135 miles east of Quebec, and consists partly of virgin forest and mills. It originally belonged to C. P. Easton, and has been controlled during the last few years by the New York State National Bank of Albany, N.Y. The

transaction, which amounts to about half a million dollars, all of it German capital, was brought about by Mr. E. van der Osten, of Toronto.

The timber limits and saw mill of the Nanaimo Lumber Co., Nanaimo, B. C., are reported to have been sold a few days ago to J. R. Arbuthnot and John C. McGarvin, of Winnipeg, for $100,000. Last spring J. S. Emerson and William Munsie purchased the mill and timber limits. They were owned by Andrew Haslam, now supervisor of provincial log scalers. The price paid by tender was $72,000. Several months after the purchase the new owners sold the Jervis Inlet section of the limits to the Merrill interests for $37,000. This left the Elk Bay limits and the mill, which have now been sold for $100,000.

Timber Limits For Sale

VALUABLE TIMBER LIMITS IN THE Province of British Columbia. For particulars Address H. S. Cane, Newmarket, Ont.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
79 Adelaide St. E., Toronto.

The Cypress Selling Company, of New Orleans, La., have established a branch office in the Board of Trade Building, Montreal. Their Mr. F. J. Davenport, of Detroit, has recently been in Canada, and reports having booked a large number of orders for Lousiana red cypress.

CURRENT TRADE CONDITIONS.

ONTARIO.

Nothing has developed within the past week to change the lumber situation, which could scarcely be more healthy. Consumption is large, lumber stocks low and prices strong. Building is proceeding without interruption, and since November 1st permits were issued for thirty-eight residences in Toronto. Until the fundamentals change materially there is no hope of lower prices for lumber. Strips and common lumber in pine are meeting with the heaviest call, but there has also been a better enquiry of late for the upper grades. There is no doubt that stocks are short and the manufacturers have really nothing of consequence to offer. This is also the case with lath, which have seldom been known to be as scarce at this season of the year. No opinion of next season's prices can safely be ventured at this time, but the fact that operations in the woods this winter are being carried on at greater expense than any previous year is significant, especially when considered in conjunction with the present lumber shortage.

EASTERN CANADA.

A fair demand for spruce lumber is reported, although shipments are being restricted by the high freight rates. The weather has not been favorable for operations in the woods, and in view of the high wages, it is probable that the log production this winter will be below the average.

The market for New Brunswick shingles continues strong, Extras selling freely at $3.60 to $3.65 on Boston freight rate. There is still a hardening tendency to spruce lath, sales of 1 5/8 inch having been made at $4 75 for Boston delivery.

A statement from the supervision of cullers shows that the receipts of waney white pine at Quebec this year have been only 673,040 cubic feet, compared with 1,209,600 feet in 1905 and 2,020,160 feet in 1904. Square white pine also shows a falling off, while oak and elm show a substantial increase.

WESTERN CANADA.

The logging industry of the Pacific Coast is still in a most flourishing condition insofar as the price of

logs is concerned. The prevailing prices for logs are as follows: Fir, $9 to $11 per thousand; Cedar, $8 to $12; Spruce, $9.50 to $12. Speaking to the CANADA LUMBERMAN regarding the market, Mr. J. S. Emerson said: "The present prices, as quoted above, will I think prevail until next summer, with every probability of an increase in January next. The logging season is now over and the wet weather has set in, and there is not only no surplus, but there is actually a log shortage. Such a condition at this time of the year has never before been known in British Columbia, so that there will be a decided stortage this winter, and the probabilities are that some of the mills will have to shut down before spring for want of logs. While the shortage exists in all kinds of logs, it is most acute in fir."

UNITED STATES.

The lumber business has developed considerable irregularity during the past week. The situation is dominated by the car supply, which is very inadequate, but apart from this, there is a dullness in some branches of the trade. Stocks of southern pine are accumulating at the mills to some extent and fears are expressed that the winter developments may result in depressing prices. Neither is the demand for white pine all that could be desired, although the Eastern markets furnish reports of satisfactory business. Prices, however, are being sustained. Some white pine uppers were recently sold in the Buffalo market for $125 per thousand. In contrast to the market for soft woods, the demand for hardwoods is exceptionally good. Practically all kinds are selling briskly. In Wisconsin a shortage has developed in the supply of cull basswood, rock elm and ash. Last year there was a quantity of basswood carried over the winter, but this will not be the case this year. Trading in lath and shingles is active at firm prices. White pine lath are now held in the Saginaw valley at $5.50 for No. 1, and $5.00 for No. 2. No. 1 hemlock are quoted at $5.00 and No. 2 at $4.50.

GREAT BRITAIN.

As the importing season has practically closed, there is little change in the British market so far as Canadian lumber is concerned. Spruce deals have been unsettled and are still showing some weakness, but it is confidently predicted that when the cargoes which recently arrived are disposed of, prices will again strengthen. There is a shortage in the supply of 2½ x 7 inch, for which the flourishing condition of the wagon building trade is said to be chiefly responsible. There has been little effort as yet to close contracts for next year's shipments, but there is little doubt that prices will be higher than during the season which is now drawing to a close.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., November 5th, 1906.—It is not often that charters are refused by a lumber manufacturing company which ships to foreign countries, yet that is practically the case with the Hastings mill in this city. "It has been remarked," said Mr. R. H. Alexander, general manager, "that we have booked no ships for after the first of the year, and the reason is that we are unable to guarantee delivery before next June. We are so piled up with orders that any new business will have to take its turn."

This statement covers the whole of the business done in the lumber industry here just now. Prices are firm at the increased figure, demand is brisk, and raw material is scarce. Conditions generally are the same as they have been all summer, though since winter is setting in logs are harder to get. During October, 35,329,890 feet of logs were scaled, and it is expected that with complete returns this number will be considerably increased. This is seven million feet more than in September, yet it is not noticed on the market. Prices range around $10, and millmen in extremity pay more. Some of the men in the timber industry look for a log famine before spring, and the present indications are that with any cause to prevent the usual supply of logs coming to hand some mills may have to shut down.

The shingle market is not disturbed by an unusual feature, neither is it marked by anything special. With only a fair business, bolts continue high and scarce. Manufacturers have to pay a high price for raw material, yet are averse to any further increase in the prices of the shingle product, as they are considered at a pretty good figure now. Ontario shipments of red cedar shingles is medium in quantity, while the export to the United States continues steady.

Stocks in mill yards are away down, and very few new piles are seen. Building in Vancouver has been very large duriug the summer, principally dwellings, and the call for all kinds of lumber has been large. This still continues, though wet weather will necessarily prevent as active operations as has prevailed for several months.

In the interior, where the mills close down during the winter, it is expected reserve stocks will be largely depleted before spring. Geo. P. Wells, Secretary of the Mountain Lumber Manufacturers' Association, says: "As the early spring demand is generally large, and in view of the good conditions in Manitoba and the Northwest this year, that demand should be larger than ever in the early months of 1907. That being the case I look for almost a lumber famine."

An open price of $14 per hundred is being offered for ties at Port Essington. G. O. Buchanan, who went north after visiting the Forestry Convention, says that price is considered fairly good, and the fact that he saw it on a placard shows that large quantities must be wanted, as contracts have been let besides.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., Nov. 5th, 1906. —The lumber manufacturing season is already approaching its end;

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

the greater number of the local manufacturers are preparing to close down their plants for the winter on or about December 1st. On the whole the season has been somewhat below the average so far as total volume of cut is concerned—the loss of a month's time on account of a strike early in the year being the reason for the greater part of the fall-short.

A feature of the situation just now is the marked stimulation in the spruce lath trade. Indications point emphatically to the conclusion that the highest mark in prices has not yet been reached. Although the demand is strong and is day by day showing more eagerness, it is not expected that the remarkable figures of last year will be touched, but it is thought probable that figures considerably higher than those now prevalent will reign in the immediate future.

Locally, lath are very scarce, practically all the manufacturers of this section being shipped up in this line. Local dealers are anxious to buy, but comparatively few lath are offering. Two and one-half millions would easily cover the quantity of stock at the local mills and of these a very important part will go to fill contracts made earlier in the year.

Upon such small quantities as might be purchased, the inquirer would be quoted $3.00 per thousand, f. o. b. St. John, for non-dutiable goods and $2.75 for dutiable.

The cedar shingle trade is marked by little or no change either in prices or general conditions. As the cold weather approaches, the demand grows somewhat slower, a circumstance which is quite natural and to be expected at this time of year.

Local stocks of high grades are light, two and one-quarter millions would be the outside figure to be used in specifying the quantity of "Extras" and "Clears". Non-dutiable goods in this line are particularly scarce. For the low grades, the demand is very slack and stocks are consequently increasing materially. Three millions would be in the vicinity of the proper figure to designate the total. Nearly all the "2nd Clears", "Extra No. 1's" and "No. 1's" manufactured at the local mills are disposed of in the Provinces and the current prices are $1.75, $1.15 and 95 cents per thousand, respectively, f.o.b. St. John. On the high grades, an inquiry would bring the following quotations: Non-dutiable "Extras", $2.95; non-dutiable "Clears", $2.-45 f.o.b. St. John, while for the same brands in dutiable goods, $2.65 and $2.15 would be the figures.

Freight rates by schooner to the westward are: New York City, lath, 70 cents; Boston, shingles, 30 cents.

BRITISH COLUMBIA OPERATIONS.

The Porto Rico Lumber Company have approximately 4,000,000 feet of logs already for their next season's run. An effort will be made to get about half these logs down to the mill this fall for early spring cutting. Work has been going along steadily all summer taking out logs and building a large dam on Lamb creek. Up this creek the company have timber limits to the extent of 10,000 acres, and it is estimated they have about 15 years cutting.

Returns of log scaling for the month of October as complied by Mr. Andrew Haslam, Supervisor of Log-Scaling, show that during the month 35,329,890 feet of logs were scaled. For the month of September the total was 28,413,467 feet. More logs were taken out of the woods during September, but millions of feet were held in storage in the North, and have only just come upon the market.

Jos. Chew's shingle mill on False Creek, Vancouver, was completely destroyed by fire on October 25. Mr. Chew has another shingle mill in course of erection on the opposite side of False Creek.

STOCKS AND PRICES.

On October 30th the Long Lumber Company shipped from Novar, Ont., car No. 35,996 containing 26,780 feet 1" and 2" hemlock. This is a record carload.

A rise of practically $1.00 per thousand took place on November 1st in the local price of lumber in Victoria. This brings the price up to practically the same as the prevailing prices in Vancouver city, namely, $16.00 per M on rough lumber.

Up to October 31st of this year the total receipts of lumber at Tonawanda were approximately 375,000,000 feet, as against 391,-000,000 feet for the corresponding period of last year, a decrease for this year of 16,000,000 feet. The receipts at Buffalo were 168,000,000 feet, as against 133,000,000 feet last year.

James Cowan, Winnipeg, Man., who has several large contracts on the Canadian Northern Railway construction, has just closed the largest tie and timber contract with the company that was ever awarded to one man in this country. This contract calls for the delivery of 1,000,000 ties, 6,000,000 feet of logs, and 300,000 feet of piling, to be delivered on the Canadian Northern Railway before spring. Mr. Cowan will take out the ties and timber in the country around Mistateur, in Saskatchewan, just beyond the north-western corner of Manitoba.

THE BARBADOS MARKET.

There has been no arrival of lumber during the fortnight, says S. P. Musson, Son & Company, and late receipts have been pretty well used up. The spruce ex "Drusie" to which we alluded in our last, was sold at a round price of $20.60, as it consisted principally of second quality, and there is no doubt that a couple of cargoes of shipping would be readily taken by dealers at high prices in the present condition of the market. The same remarks are applicable to white pine, of which there is a very small stock in the lumber yards. Receipts of shingles ex "Drusie" consisted of 185,000 Long Gaspe, some of which, being of exceptionally fine quality, were sold at $7.28, while the balance realized $6.27 and $6. A small lot of 15,000 Cedar Laying was sold ex same vessel at $1.93, while we obtained $2.05 for 100,-000 of this description ex "Oruro" from St. John, N.B. Stocks of these latter are rather heavy, and there is a fair supply of Long Gaspe at market.

The final details in connection with the purchase of plant and timber limits of the Nanaimo Lumber Company, Nanaimo, B. C., were completed and the deal closed on November first. The purchasers are a syndicate consisting of ex-Mayor Arbuhnot, of Winnipeg, James Savage and Mr. McGavin, also of Winnipeg. These gentlemen intend forming a joint stock

company, to be known as the Red Fir Lumber Company, and their newly acquired possessions will be turned over to the new company. They also purpose buying some Mountainl umber plant which will also be transferred to the Red Fir Lumber Company. At the Nauaimo plant the new company intend making some extensive improvements and additions, including the erection of a new planing mill plant and a new sash and door factory, to replace the old one. They will also start additional logging camps and have their own tug boats, barges, etc., for the transportation of logs and lumber. The total purchase price of the Nanaimo plant and limits, including all lumber and logs on hand at the time of purchase, was $185,000.

SAW MILL, SITUATED ON SIDING OF T. B & O. Railway. Capacity 9,000 ft per day In good running order. Also six bush lots more or less heavily timbered, a large quantity of lath material on lots. Good reasons for selling. If purchased immediately could buy a large quantity of logs for next season's cut. Apply Box 8, Highland Grove, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

A gentleman who recently visited a number of the mills in Western Ontario in search of pine and hemlock reports that very little unsold lumber is to be found at manufacturing points, and it is a very difficult matter to buy anything. The market has been almost bare of the lower grades for some weeks, and it is a question where the lumber is to come from for the spring requirements. Prices are now the highest yet reached, pine mill culls being held at $18 at the mill for 10 and 12 inch, 10 to 16 feet. The lower grades are showing the most strength, quotations being practically nominal. Hemlock is selling as high as $20 at the mill for 20-foot stock. Nothing is plentiful, but there are probably larger offerings of hemlock sidings than any other material. Hardwoods are meeting with a good demand and stocks are lighter than one year ago, but it has taken a long time to market the burdensome load which manufacturers and dealers were carrying. Soft elm is a little dull, but maple, birch and basswood are moving in some volume.

The scarcity of white pine lath has quickened the demand for 32 inch. No. 1 pine in that size is worth $2.50 at the mill, and No. 1 hemlock, same size, $1.75 to $1.85.

BRITISH COLUMBIA.

A heavy snowstorm in the Northwest has caused a partial cessation of building operations and curtailed the consumption of lumber This will be welcomed by the mills, which are far behind with orders. Prices are very strong and likely to advance further. The log situation is the firmest ever known on the Coast and bids fair to continue for several months. The only possible solution for the abnormally high logs prices lies almost entirely with the mills, through curtailing the output. Curtailment must inevitably take place at all points dependent upon independent loggers. The ability of loggers to furnish additional logs is taxed to the utmost. It is not a question of price but the ability to secure men and equipment. Fir logs may be quoted at from $8.50 to $11.00 per M according to quality, delivered at mill; cedar $7.50 to $11.00, and spruce $8.00 to $11.00.

UNITED STATES.

The November demand for lumber has been very good, but the movement has been greatly hampered by the car shortage. The mills will go into the winter with a smaller stock of white pine, spruce, hemlock and hardwoods than last year, while there is some reason to expect a larger consumption unless unless the weather should prove very severe. The outlook, based on a study of conditions, is for firm prices, with possibly an advance in some lines. Box lumber, which is in unusually active demand, may be forced higher, notwithstanding that white pine mill culls are now selling in Bos on on a basis o $21. Dimension stock is also scarce and

may advance further. The spruce market has remained about stationary. Frames are held at $23 to $25 in Boston, but for prompt delivery buyers have been willing to pay an advance of $1. Random has gained about 50 cents a thousand. There is a ready sale for hardwoods. Basswood in the lower grades never experienced a stronger demand than at the present time, and it is moving freely wherever stocks can be secured. The upper grades are by no means neglected. Maple and birch are moving in considerable volume, while ash is showing some dullness.

GREAT BRITAIN.

There is very little life to the British timber market, for which the present state of the money market is responsible in part at least. The wintering stocks are not heavy but unless the consumption improves, they will be quite ample to meet the demand. Spruce is a littler weaker. At a recent auction sale at London second quality spruce 12 and 13 feet in length brought £10 per standard of 1980 feet, but £9 5s was the best that could be obtained for 11-foot lengths. For third quality 3 x 7 inch, 9 to 14 feet, £8 5s was realized, and for 3 x 11 inch fifth quality, £7 15s. A quantity of first class birch was offered at this sale, which brought from 52s 6d per load of 50 cubic feet for 12 to 16 inch to 65s for 18 inch and up. These figures show a decline as compared with previous sales and indicate that there has as yet been no improvement in the birch market.

STOCKS AND PRICES.

In the Boston market spruce lath are firm at $4.50 to $4.75 for 1⅝ inch and $4.25 for 1½ inch. New York quotations are lower, being $4 for 1½ inch. Some mixed lath have sold there lately at $3.80, but such lots have usually included a percentage of hemlock or a larger percentage than usual of the 1⅜ inch size, which are produced from the edgings of 3 inch deals.

The Northern Construction Company have been awarded the contract to take out one and a quarter million ties between Fort Francis and Port Arthur for the Canadian Northern Railway. Of these 250,000 are to be delivered this winter.

The steamer "Nemea", from St. John, N.B., bound for Manchester, England, for Harrison, Robertson & Company, with a cargo of lumber, was abandoned at sea about 200 miles from the west coast of Ireland.

The Peter McLaren Lumber Company, of Blairmore, Alberta, are preparing for a busy season in the woods this winter and if the weather is favorable will make the largest cut of logs this season in the history of the company. Several camps have been established in the woods and in the neighborhood of 200 men will be employed.

THE SHINGLE SITUATION.

Indications are that there will be a very complete shut-down of the shingle mills of Washington and Oregon during the coming winter. It is understood that an agreement has been reached between the operators of the combination and the straight mills which will cut off the manufacture of shingles for a considerable part of the winter. The manufacturers of British Columbia shingles are being urged to join in the movement, but it is not yet known what action they are likely to take. It has been demonstrated that even when the demand for shingles is at the best, the capacity of the mills is more than sufficient to supply the demand, and unless there is some curtailment, the market becomes congested. There is practically no change in the shingle market. The amount of stock in transit is low. Washington red cedars are bringing $3.45 and $2.86 for Stars, Chicago delivery. The shortage of Coast shingles has given a lift to white cedars, which are selling freely, prices on Extras being $3.25 at the mill, or $3.50 from Chicago yards. New Brunswick cedars are finding a ready sale in Boston at $3.60 for Extras and $3.10 for Clears. It is understood that the Eastern cedar shingles are likely to be controlled this winter by a few large operators, though one or two wholesale houses have bought quite heavily and contracted for the product of a number of small mills for many months in advance.

THE RECORD CAR LOAD.

SCOTSTOWN, QUE., Nov. 17th, 1906.
Editor CANADA LUMBERMAN, Toronto, Ont.

DEAR SIR:—We notice in your edition of the 14th inst. reference to a record car load of lumber shipped by the Long Lumber Company from Novar, Ont. Our company shipped on the 12th of July, 1905, in Big Four No. 3598, 27,971 feet of 1 inch random spruce in the rough, consigned to Taylor, Scott & Company, of Toronto.

Yours truly,
GREAT NORTHERN LUMBER CO., Limited.

THE BARBADOS MARKET.

We quote as follows from the last report of S. P. Musson, Son & Company: "The only arrival during the fortnight is the schooner "Eduardo", from Liverpool, N.S., with 150,000 feet white pine, which had some time ago been sold to arrive. This cargo goes into but few hands and being a small lot will soon be used up. The market is almost bare of both white pine and spruce, and there is no doubt that several cargoes would be readily taken at high prices, as the demand is always good at this time of the year. A small lot of 36,000 feet of spruce came down per S.S. "Orinoco" from Halifax, imported by a dealer for his own requirements. Shingles of all kinds are in fair supply, but further receipts if not heavy would still meet with a ready sale. There has not been any arrival of these during the fortnight."

PIT PROPS.

Mr. J. B. Jackson, Canadian Commercial Agent at Leeds, Eng., says that there is an opening in England for shipments of pit props from Canada. Hull's timber trade with the Baltic is seriously dislocated by Russia's internal affairs, and local importers are finding difficulty

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

RED CEDAR SHINGLE SPECIAL

We are Agents for the Hadden Shingle Co., of Cloverdale, B. C., manufacturers of high grade Red Cedar Shingles.

HARDWOODS

WE FURNISH COLUMNS IN ANY SIZE OR LENGTH

in obtaing regular shipments of pit props. Whilst Canadian prices are dearer than those asked by Baltic shippers when the trade is in a normal condition, yet the present circumstances offer no alternative but to obtain supplies from Canada. The props should be free from bark and of good sound quality, and must be shipped in regular monthly quantities from November, 1906, to May, 1907.

Prices are asked at 72 lineal feet, c.i.f. Hull, and the props must be cut to the following special lengths, which is an example of what one firm requires immediately:—

7 inches diameter top—
10,000 7 feet 6 inches long.
12,000 8 feet long.
5,000 9 feet long.
8,000 7 feet 6 inches long.
8,000 8 feet long.
4,000 9 feet long.
8 inches diameter top—
2,000 7 feet 6 inches long.
3,000 8 feet long.
1,000 9 feet long.

TIMBER LIMIT TRANSACTIONS.

C. W. Elderkin, of Advocate, N.S., has disposod of 20,000 acres of timber lands in Nova Scotia to J. Newton Pugsley for $90,000.

G. W. Boake, of Toronto, is reported to have purchased from Andrew Boyd, of Bracebridge, Ont., a timber limit in the Parry Sound district covering 15,000 acres in the townships of Hagerman, Burpee and Ferguson, the purchase price named being $60,000.

David Laird, Indian Commissioner, Winnipeg, is asking for tenders by December 5th for the timber damaged by fire on Indian Reserve No. 10 on the Wanipigow river.

The Royal Paper Mills Company, East Angus, Que., are reported to have sold their timber limit and mills to George Vandyke, of Boston, for $1,000,000.

Some basswood and elm lath is now offering in Ontario, the price ranging from $3 to $3.50 for No. 1.

THE BRITISH LUMBER MARKET.

The monthly timber circular of Churchill & Sim, dated November 2nd, says: October has been a month of very large importation, of dear money, and of dropping prices on the London market. It has also been a month of considerable trade, as, although the dock deliveries are 1,100 standards short of those of the same month last yeer, the over-side deliveries are 3,100 standards greater, leaving a credit balance of 2,000 standards in favour of the month just ended. The dock stock has, nevertheless, accumulated freely, and is now some 5,000 standards larger than it was last year. In the meantime Swedish shippers have paid no attention whatever to any weakness here, but have cleared off the balance of their available supplies at the fullest rates of the season to country and Continental markets. Russian shippers have made concessions only for goods already chartered for London, which have mostly been sold at very moderate cost freight and insurance prices. There is every indication that shippers will ask and obtain for next year the highest rates current this season and upwards, so that stock in London should be good holding in the meantime, although the great scarcity and the high price of money makes this difficult. The position is that at the rates to which the London market has now fallen lumber can be bought at well under the cost of anything that is at all likely to be brought in either this year or next.

The importation of pine deals into London during October has been quite a small one, and under the influence of this continuously light supply and of the small dock stock prices have begun to move ahead again. The demand is, of course, still very restricted, and must be so at the present level of cost. Spruce deals have arrived in about normal quantities from the St. Lawrence, but are short from New Brunswick. The inclination towards better prices for them has been very faint, but it has been just discernible. Of oak, elm, and ash timber there is no superfluity on the London market, and retail business is possible at improving prices. Of birch there is still too much here, the market is slow and overdone, and wants a rest from importations for some months to come. From the St. Lawrence the import has been: Pine deals, 754,000 pieces, against 648,000 pieces in 1905; Spruce deals, 1,592,000 pieces, against 1,572,000; Birch planks, 191,000 pieces, against 145,000 pieces in 1905. From New Brunswick and Nova Scotia: Pine deals, 2,000 pieces, against none in 1905; Spruce deals, 286,000 pieces, against 484,000 pieces; Birch planks, 224,000 pieces, against 239,000.

The Board of Trade returns show the following import of timber up to October 31st of the past two years.

LARGE QUANTITY 4/4 GOOD LOG RUN Basswood; a quantity of Soft Elm cut 1-1/8" and 1-½". Also Birch Lumber in all grades. THOS. OUELLETTE LUMBER CO., 85 Home Bank Bldg., Detroit, Mich.

CURRENT TRADE CONDITIONS.

ONTARIO.

The closing days of November find the lumber market in a very prosperous condition, with more business offering than can be taken care of. All grades of pine and hemlock are in good demand. Mill run pine which could be bought a month ago at $22 is now held at $24, and the end is not yet. Unless indications are misleading, there will be a further advance in some grades before next spring. The high price of white pine has encouraged the use of hemlock, which is being largely used for building purposes. Building lumber of all kinds is moving actively, as the weather has been such as to cause no interruption to outdoor work. British buyers have been sounding the Ottawa Valley manufacturers, but we have not learned of any transactions. The production of deals next year is likely to be smaller than ever. Some good sales of hardwoods have recently been made in the Ottawa Valley, but stock is much more plentiful than in pine and hemlock.

EASTERN CANADA.

The lumber market is usually quiet at this season of the year. Most of the larger mills are now closed down for the winter and attention is directed to the stock on hand. This is comparatively light, as is shown by the estimate of 4,000,000 feet of spruce deals at the St. John mills. The shipments to Great Britian by the regular liners during the winter months are therefore likely to be below the average. A circumstance which is contributing towards a firm lumber market is the unfavorable conditions for work in the woods. The weather has been mild with very little snow, and the roads are in an almost impassable condition.

The lath market is steady. The production during the winter months will be largely round wood lath, and if offerings should prove heavy, it may result in a greater difference between the price of round wood and slab lath.

UNITED STATES.

The manufacturing season for white pine is practically closed. The mills have an average stock of lumber, which would have been short but for the fact that shipments for the past few weeks have not been as large as anticipated, chiefly owing to the serious nature of the car shortage. Prices at manufacturing points are firm and conditions are such that an advance might be made on some lines, but it is probable that conservatism will prevail in this connection. Southern pine is somewhat irregular. Prices of high grade finishing lumber and flooring have weakened a trifle, but this is offset by the firmness and excellent demand for dimension and common inch lumber. Hemlock continues active and is selling in Chicago for $17 for cargo stock and $19 for car-loads. The activity in hardwoods is quite pronounced. In the Wisconsin district, for instance, the market has absorbed almost the entire supply of basswood excepting that which is under contract direct with consumers. In the Saginaw

Valley basswood is selling at $24, birch at $20 to $26, soft elm at $23 to $26, and maple at $16 to $18. The demand for shingles and lath is good, while the supply is light.

GREAT BRITAIN.

The British market is still very uncertain. Spruce has shown some weakness owing to rumors of heavy winter shipments, but in view of the small stocks held on this side, there does not seem to be any reason for uneasiness on this score. Some 3 x 9 inch third quality spruce deals were sold recently in London at $9 and a small lot of 3 x 9 inch fifth quality at £7 10s. The latest c.i.f. sales, however, have been on the basis of £7 15s to £8, or practically 5s below values ruling about two months ago. Dealers who are well informed are looking for some recovery during the winter months, when the extent of the shipments can be definitely determined. Birch planks, which have been exceptionally weak for the past six months, are showing signs of stiffening and a recovery of moderate proportions may be looked for in the near future. The consumption is better and likely to continue to show improvement.

BRITISH COLUMBIA CONDITIONS.

Speaking of the condition of logging in British Columbia at the present time, Mr. Frank Paterson, of the Paterson Timber Company, said: "It looks as if there is going to be a great scarcity of logs for the next three months. It was expected that the Northwest and Eastern orders would have fallen off considerably in October and November, but there is more from there, in the way of timbers especially, than the mills can handle, owing to the scarcity of timber logs. If the present bad weather continues throughout December and January, some of the mills may have to face a compulsory shutdown, as the logging camps are not getting in half time, while the mills are running full time.

I do not think that the prices of lumber and logs can go much higher, unless it be in the larger grades of timber, which are at present selling from $3.00 to $4.00 per thousand below what they should be. The Pacific coast is the only place on the continent where large timbers can be obtained and the demand for them is so great that prices will certainly advance.

The outlook for the lumber business for the year 1907 it seems to me is bright indeed, and prices will likely remain stiff thoughout the year. No hope can be held out to Eastern buyers that they will be able to buy at cut prices; in fact, they may have to have their rush orders filled at an advance over the present prices.

"Many new logging camps are going for 1907 and limits on the water-front, containing comparatively small quantities of timber which previously it did not pay to work, can be opened if the present prices of logs continue, and the larger areas of timber limits are not likely to advance in prices for some years."

NEW BRUNSWICK LETTER.

Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., NOV. 19TH, 1906.

The lumber manufacturing season in this vicinity is fast drawing to a close; the first week in December will see most of the larger mills closed down for the winter. So far the weather has been very favorable for sawing, owing to the continued lack of frost.

Reports from up-river districts tell of much difficulty in logging on account of the continued warm weather. Frost is badly needed in that direction; at present many of the roads are impassable because of mud. Men are also very scarce and in some cases as high as $35.00 per month is being paid to competent choppers.

The St. John river has been very high during the last few weeks and some of the logs are running which were hung up last spring in the vicinity of Grand Falls. As rafting operations are finished for this season, these logs will be held at the Fredericton booms (if the water is of sufficient volume to bring them thus far) until next spring, when they will be available very early. This circumstance will no doubt have a direct effect upon the price of "bank" logs. These logs, cut along the banks in the down-river counties and therefore available as soon as the ice is out, have brought, for several years past, in the vicinity of $12.00 per thousand feet for spruce deal logs. The probabilities are that next year no such price will be obtainable; $11.00 is much more likely to be the figure.

Little is being done in spruce deals for export to Great Britain. Indications point to the conclusion that stocks at the local mills will be materially lighter when closing-down time this year than has been the case for several years past; 4,000,000 superficial feet to 4,250,000 superficial feet would be the proper figure to designate the quantity, which is divided among seven or eight manufacturers. Owing to these circumstances, the supposition is natural that shipments of spruce deals by the winter liners will be lighter than usual during the coming winter. While many small lots are forwarded by rail from inland points, the bulk of these shipments by the liners are made up of the product of mills in St. John and the immediate vicinity.

With stocks as designated above and the knowledge that during the winter months and the early spring but little will be done in this section in manufacturing, the prospects are that New Brunswick spruce deals will not figure conspicuously in shipping circles during the winter.

With few transactions being made in this line, it is difficult to name a figure that would apply generally, but it is safe to say that an inquirer for "English" spruce deals, in a specification containing 50 per cent 7's and 8's, 35 per cent 9's and 15 per cent 11's and wides, would be quoted not lower than $14.00 per thousand superficial feet, f.o.b. steamer St. John, (two-thirds price for fourths and ends.)

The Alex. Gibson Company, Marysville, N. B., shipped 22,000,000 feet of lumber to England this year.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., November 19th, 1906.—Shingle manufacturers, who hold weekly meetings, are seriously considering closing down for a period. "The matter has been under consideration for some time," Ald. E. H. Heaps of the Heaps Lumber Company stated this morning, "but no definite action has yet been decided upon. What is proposed is that the close-down shall be from about December 22nd to the end of January, when the business will be the slackest. The season is about over now, and things generally are quiet in the shingle part of the industry. Shipments of red cedars are going to the United States and Ontario, but nothing out of the ordinary. Bolts are still scarce and going up, and $5 is not an unusual price by any means."

Advertisements are being sent out to papers in the various lumbering centres of Ontario for 1,000 loggers. Raw material for the lumber mills here is difficult to get, and there is demand for all the logs that can be taken out.

L. A. Lewis, general manager of the Brunette Sawmills at New Westminster, says: "There has been a remarkably large increase of lumber output on the Fraser river recently, and the present output would be still larger if the mills were not handicapped by a shortage of labor. The demand on the lumber mills is so great that the local needs cannot be readily met, and this also hampers the building movement. Every mill on the river has orders for months ahead."

There is almost a famine in logs at present. Boisterous November weather and scarcity of men have caused this, and as a result the price has advanced. Fir logs are now selling at $10.50 to $12.50; spruce, $10.50 to $12; and cedar from $7 to $9. These figures are considered abnormally high when compared with the old prices of a year or two ago, and it may be that before fine weather again sets in at the latter end of the winter further increases may be made. October was a record month for log production, the amount scaled being 37,048,495 feet. This large amount is accounted for by the shipment of logs from storage which had been held in the north. This augmentation of supply cannot be expected this month, and it is expected that the output will be considerably lower than in October.

The demand for standing timber is very great, and the supply is hardly sufficient for the number of buyers offering. It is said that the demand for lumber is slackening off, but if so, it is with new orders, for many of the mills are still behind with orders booked months ago. Another indication that business is not slow is that stocks are not beginning to pile up yet. Prices are firm, and will be so long as logs are so scarce and so high.

R. S. P. Smyth, of Quebec, is visiting the interior of the province. He is looking for desirable timber.

The formation of the Bowman Sine Lumber Company, with head offices at Lacombe, Alberta, indicates the trend of the business. With the advent of lumber manufacturers from the south, they are selling without the assistance of the middleman retailer. This company will operate lumber yards at Lacombe and Stettler, Alta., and has at his head S. H. Bowman, president of the Bowman Lumber Company, having mills at Revelstoke and Comaplix.

SHINGLE MILLS AGREEMENT.

On November 19th a meeting of the shingle manufacturers in Vancouver was held for the purpose of discussing the situation for next season, and although there was no definite action taken in regard to the selling arrangement for another year, the opinion was freely expressed that it would be continued and stronger than ever, with every mill of consequence in line.

A meeting will be held on December 3 next, for the purpose of deciding this question, and the question of closing down for a month or six weeks from Christmas.

The great point made by the industry in bringing about the selling arrangement by which all the mills dispose of their product through two selling companies is that it prevents that curse to the trade, overproduction. If the mills were run to their limit they could at any time, at a short notice, glut the market and ruin prices. By the present system, where each mill is fairly alotted its cut for the season's Canadian trade, overproduction and price-smashing is impossible.

At the beginning of last year the mills signed up for two years, and the arrangement could not be broken unless by the wish and on the request of 25 per cent. of the members. As this request has not been made, it is a foregone conclusion that the arrangement will be continued, and under much better auspices, as it is said that those few mills who did not sign up last year are prepared to do so this year.

TIMBER LIMIT TRANSACTIONS.

Wm. Potter & Son, of Tottenham, Ont., recently purchased the timber on the Coffey farm near Penville for $15,500. A few days ago they resold the timber to a Quebec firm for $25,000, clearing nearly $10,000 on the deal.

Practically all the timber in the Capilano Valley of British Columbia, from a point near the Big Pool for a distance of six miles upstream, has been sold to American capitalists, who will in the spring commence to log it. The vendors are Farrell & Tregent and William Macpherson, and the buyers W. M. Frizell, George Felker, C. S. Maskell and S. Graham of Bellingham.

LOG PRICES STILL HIGHER.

VANCOUVER, B. C., Nov. 23rd, 1906.—Logs have been very scarce during the past few days and many of the mills have started on their reserve supply. At $12.50 a thousand it was thought that the top notch price had been reached, but $15 is now quoted. Even at this figure the supply is quite inadequate for the demand.

The Scott Lumber Company, of Fredericton, N.B., expect that their season's cut at the Victoria mill will total 11,000,000 feet.

The Temiskaming & Northern Ontario Railway Commission have awarded John Cahill, of Bonfield, Ont., the contract for 275,000 railway ties, to be used in the construction of branch lines.

SHINGLE PRICES ADVANCED.

At a meeting of the Coast shingle manufacturers held at Vancouver, B.C., on Monday, December 3rd, it was decided to make an advance in shingle prices. The increase is fifteen cents on rail shipments and twenty-five cents on the coastwise trade.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber orders are still plentiful, although somewhat less than during the fall months. "We will welcome a quieter period, which will enable us to reduce the number of orders on our books," said a prominent wholesaler, who added that the season had been the most active he had ever experienced. The factory demand has of late been quite a factor and would seem to indicate that consumers did not provide largely for their requirements when prices were lower. Toronto's building permits for the season have exceeded $12,000,000, which means a large consumption of lumber by that industry. The contract for next year's supply of lumber for the Corporation of Toronto was awarded last week at prices much higher than those at which the contract was placed a year ago. Below are some of the figures :

	1905.	1906.
Pine, 12x12 in., 12 ft.....	$24 00	$27.50
Pine, 12x12 in., 24 ft.. ...	30.00	35.00
Hemlock, 12x12 in., 12 ft..	16.50	21.75
Hemlock, 12x12 in., 20 ft..	20.50	26.00

The present range of prices, it will be seen, is high, but there is a steadiness in values which is likely to continue in any case until the cut of 1907 comes onto the market. Of the course of prices after that time it is too early to speak, but it may be pointed out that the cost of logging this winter is estimated to be 10 to 15 per cent. higher than last winter, which has encouraged some buyers to contract for lumber at prevailing prices.

WESTERN CANADA.

There has been some falling off in the demand for lumber throughout Western Canada, but it has not been sufficient to enable the mills to accumulate any stocks of consequence. The log scarcity in British Columbia has caused the closing down of some mills. Fir logs have been bought at $15 per thousand feet, and the high price has not seemed to stimulate production as much as might be expected, and now unfavorable weather will interfere with operations. We will be greatly surprised, however, if log prices should advance much further, as the lumber manufacturers will no doubt endeavor to keep lumber prices within reasonable bounds. Production during the winter months will probably be carried on more vigorously than usual in order to accumulate a supply of lumber for the spring trade, and a number of new mills which are now nearing completion will also be a factor in the situation. Building operations in Winnipeg continue on a very large scale and there is a very urgent demand for finishing material.

As announced elsewhere, British Columbia shingles were advanced on December 3rd fifteen cents for rail trade and twenty-five cents for coastwise trade.

UNITED STATES.

There is no indication of weakness in the white pine market. On

the contrary, the manufacturers in the neighborhood of Minneapolis are disposed to make some further advances and are refusing to consider offers for lumber for delivery after the first of the year except on the basis of the new list. It appears that stocks at the close of the year are likely to be below the average, although perhaps heavier than at the close of 1905, when the quantity on hand was the smallest in fifteen years. Stocks at Eastern wholesale centres are about normal. The Tonawandas will go into the winter season with perhaps 300,000,000 feet. A shortage may develop in the lower grades of white pine, for which there has all season been an abnormal demand.

Less firmness is shown by southern pine, and east of the Mississippi river there has been an actual weakening of prices. The situation in respect to this class of lumber is not altogether satisfactory, as in some sections there has been a considerable falling off in the demand. The consumption of hardwoods is on a large scale. In Wisconsin the supply is light in all kinds of lumber except birch, of which there is probably 100,000,000 feet of dry stock on hand. This is moving very actively and is being substituted for basswood and other hardwoods which are scarce.

GREAT BRITAIN.

The word "dullness" fittingly describes the condition of the lumber trade in Great Britain. The deliveries from stock on hand again show a diminution as compared with the previous week, for which unfavorable weather has been in part responsible. The c. i. f. prices in spruce are a shade easier on account of recent heavy arrivals, but it is not anticipated that there will be a further decline. Buyers are restricting their orders, however, and do not as yet seem to realize that in order to secure the lumber they will have to pay higher prices. The stock of spruce deals at Liverpool is only 13,450 standards, or less than 27,000,000 feet, as compared with 20,830 standards at the same time last year. White pine prices are firm and importers are holding out for full prices on account of the probability of smaller shipments next year.

STOCKS AND PRICES.

The Pigeon River Lumber Company, Port Arthur, Ont., expect to log about 10,000,000 feet of pine in Cook county, Minnesota. Most of the logs will be hauled out over the line of the Port Arthur, Duluth and Western road, which is owned by the Canadian Northern.

It is estimated that 60,000,000 feet of logs will be taken out this winter by firms located at Prince Albert, Sask. About half of this cut will be made by the British Columbia General Contracting Company, who have undertaken to get out 28,000,000, said to be the largest logging contract ever let east of the Rocky mountains.

The production of logs in Ontario this winter will, under favorable conditions, probably equal that of last year. The Saginaw Lumber & Salt Company will take out about 30,000,000 feet; Loveland & Stone, at Cutler, about the same quantity; the Moulthrop Lumber Company, at John Island, 20,000,000 feet; Eddy Bros., at Blind River, 30,000,000; the Michigan Land & Lumber Company, Blind River, about 20,000,000; Holland & Graves, Byng Inlet, probably 60,000,000 feet, and the Spanish River Lumber Company, Spanish River, about 20,000,000 feet.

SCARCITY AND HIGH COST OF LOGS.

The following statements are credited to Mr. E. J. Palmer, manager of the Victoria Lumber and Manufacturing Company, Chemainus, B. C.:

"We shall cut this year about 70,000,000 feet of lumber, our mill's capacity being that much or more. We are cutting mostly from our own limits, and our lumber is nearly all exported. Our contracts are such that we must at times have logs to meet them promptly. During the present season we have imported logs from Bellingham at a cost of $13.10 per thousand feet laid down at Chemainus. Of course, on our own limits we can produce them for less money, but the scarcity of loggers has greatly handicapped us. And $3.00 to $4.50 per day, which is regarded as very high pay for such work, does not guarantee that a camp will be supplied with labor steadily. For the past season we have had at times five or six donkey engines laying idle. Our limits are, however, in good condition, and what we do not cut off now we will have for future work."

Mr. Palmer stated that men with whom he had made contracts for logs could not in many cases supply the quantity agreed upon, on account of the scarcity of labor, instancing one case where he had contracted for 6,000,000 feet of logs but had only received 1,000,000 instead of the amount agreed upon.

THE BARBADOS MARKET.

Uuder date of November 17th Messrs. S. P. Musson, Son & Company say:

"The only arrival during the fortnight is the schooner "Edde Theriault," from Bear River, N. S., with 214,000 feet of white pine, which was sold at $31.60 for merchantable and $24.60 for second quality. With such light arrivals our market keeps but barely supplied, and further receipts of white pine should bring similar prices. In spruce we have no receipts to note, but we learn that a cargo of about 400,000 feet has been sold to the trade to arrive at $26.25, and with the demand for this class of lumber which is usual at this time, and the absence of stocks of all kinds, there is still a good opening for other cargoes at about similar rates. No arrivals of shingles of any description have taken place, and sales have somewhat fallen off, owing to the dry weather which has prevailed since the middle of last month. Stocks of all kinds are fairly heavy, and unless a better demand springs up, we shall probably see lower prices obtained for next arrivals."

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

RED CEDAR SHINGLE SPECIAL

We are Agents for the Hadden Shingle Co., of Cloverdale, B. C., manufacturers of high grade Red Cedar Shingles.

HARDWOODS

We have a stock of hardwood, which we will cut to order, in Red and White Oak, Soft Maple, Black and White Ash, Basswood d Soft Elm.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN).

OTTAWA, DECEMBER 1.—A close inquiry into birch and basswood transactions shows that prices have been reported somewhat above the actual figures at which sales took place. A very big sale of birch has has just been made to an Ottawa Valley wholesale dealer at $15.50 per thousand f. o. b. at the mill. The large quantity had something to do with bringing the figure down below the average quotations. The quality of birch, however, was exceptionally good. The current prices of birch f.o.b. Ottawa are from $18 to $20. A large sale of basswood amounting to 135,000 feet was made last week at $17 a thousand f.o.b. at the mill. Most of the sales are at from $18 to $20 a thousand f.o.b. Ottawa.

The demand for birch is very keen in the Ottawa Valley. W. B. Bartram & Company, who make birch a specialty, have had orders for 250 or 300 car loads since September and are busy shipping. The trade is very active and in hardwoods especially increased sales are being made to the United States. Manufacturers are becoming more careful in treatment of lumber and a large quantity of hardwood lines is coming out so good that the exacting American buyer is glad to pick them up. There is a strong indication of a scarcity of several kinds of lumber if buying continues active during the winter. An open season with plenty of building would find stocks in Otttwa quite inadequate. Some offers for shipments to the British market have come from firms established here but none were high enough. Perhaps a better figure will be tendered before long. It is learned from Dobell, Beckett & Company that their buying will be started about the first of December.

W. H. Kelly, of Buckingham, purposes re-opening his mill in February with 150 men, about double the staff which he has employed in the past. The buoyant state of the market creates a demand that warrants the extra production. Mr. Kelly expects to cut until December, 1907. He is carrying on extensive operations on the Du Lievre in taking out pine, spruce, hemlock, and basswood. The mill is operated by steam and 10,000 logs have already been hauled in preparatory for the opening of work.

The James MacLaren Company, who had to close down early in September on account of the strike, is operating with 175 men. The preliminary trial arising out of three fatalities in the strike riot on October 8th began in Buckingham Monday.

As the autumn advances the water is sinking in all the streams of the Ottawa Valley. Lumbermen have many complaints about logs being detained and pulp manufacturers are even in a worse state. The dearth or rain since midsummer has had a disastrous effect. Mr. J. R. Booth's mill has not been in full operation for two months and the pulp mill which was closed to save power for the lumber mill has not yet been started. At present Mr. Booth is giving most attention to his new paper mill which he hopes to start about the 1st of January. The latest information about the effect of low water on the lumber cut shows that only MacLachan Bros. of Arnprior and the W. C. Edwards Company of Rockland had an average output of lumber. The saw mill owners who suffered from the shrinkage of the rivers are even more numerous than those mentioned in the last letter. They include: Hawkesbury Lumber Company, Fraser & Company of Deschenes, Gillies Bros. of Braeside, Colonial Company of Pembroke, Shepard & Morse, and J. R. Booth, both of Ottawa. The Hawkesbury Lumber Company closed its mill for the season a few days ago and is devoting all its energies to extensive shanty operations.

"Wanted and For Sale" advertisements in the CANADA LUMBERMAN always bring results.

TIMBER LIMIT TRANSACTIONS.

D. Woolsey, T. Kilpatrick, R. Howson and G. S. McCarter, of Revelstoke, B. C., and George P. Wells, of Nelson, B.C., recently completed the sale to St. Paul capitalists of thirty-four square miles of timber lands on Cherry Creek, east of Vernon. The tract was about three months ago located by Mr. Woolsey and Mr. S. Hill and is one of the finest in the interior of British Columbia, being estimated to carry seven hundred million feet of cedar, fir, and white pine of excellent quantity.

QUEBEC TERMS OF PAYMENT.

The Quebec shippers of lumber to Great Britain have decided that in consequence of the altered method of payment in Canada, the future payments on all c. i. f. and f. o. b. contracts for goods shipped from the St. Lawrence shall be at 90 days instead of 120 days as heretofore.

LUMBER AT BOSTON.

The Boston market, says the New York Lumber Trade Journal, is fairly active in some lines while in others trading is of a limited character. Spruce prices are very well held with the exception of random. The latter is in rather large offering and prices vary considerably. Spruce boards are in good demand and prices are fairly steady. Offerings of frames for prompt shipment are not large and where a buyer insists that frames be shipped at once he finds he is obliged to pay a slight advance over prices for future delivery. Dealers are now largely dependent upon the winter mills for supplies. Frames are quoted at $23 and $25.

Hemlock boards are in very good call. The market for hardwoods does not show any great activity, although a fair volume of new business is reported.

PARTIES IN THE EASTERN STATES WHO use large quantities of Birch and other Canada Hardwoods to correspond with the advertiser, with a view of buying from first hands. Box 430, CANADA LUMBERMAN, Toronto.

TIMBER AT QUEBEC.

Following is a comparative statement for three years of timber, etc., measured and culled at Quebec up to December 5th, as reported by the Supervisor of Cullers:

	1904 C. Feet	1905 C. Feet	1906 C. Feet
Waney White Pine	2,256,360	1,210,900	676,600
White Pine	240,160	137,440	76,720
Red Pine	15,920	1,200	13,400
Oak	328,160	193,920	578,120
Elm	262,800	484,720	602,160
Ash	14,640	10,440	8,880
Butternut	40	120	....
Tamarac	40	....	....
Birch and Maple	115,920	207,640	158,400

CURRENT TRADE CONDITIONS.

ONTARIO

No important changes in lumber prices are looked for during the early winter season and at the present time the market is quite featureless. Most of the white pine and hemlock lumber has passed out of first hands. The element of strength which has characterized the trade of the fall months has become more pronounced each week, creating a certain amount of business between dealers. The demand continues very heavy for hemlock and the lower grades of pine, and there is also a better feeling in respect to the higher qualities. British shippers have been negotiating for the deal production of the Ottawa Valley mills, but the increased prices asked by the manufacturers have so far prevented the closing of contracts. Logging operations have been carried on under favorable conditions in most localities with the exception of the scarcity of labor, but this has now been relieved to some extent and the production promises to be about equal to that of last year. The cost of producing logs will be from ten to fifteen per cent. greater, which increase is likely to be reflected in lumber prices.

B. C. shingles for Ontario delivery are now quoted at $3.40 for XXX and $3.62 for XXXX.

UNITED STATES.

It is not expected that lumber prices will more than hold their own at this season of the year, when the demand usually slackens. It may be said, however, that during the past few weeks northern pine has made a general advance, ranging from 50 cents to $2 per thousand feet. Buyers who have sounded the market report that there is no indication of weakness and that higher prices are likely to prevail for next year's production. No. 2 boards, eight and ten inch, are bringing $25 to $25.50 at Chicago, which is the highest notch yet touched. Hemlock prices are equally firm, although the supply is more plentiful, making it possible to fill orders more promptly. The outlook is for an average consumption of pine and hemlock during the winter months unless severe weather should seriously interfere with outdoor operations. Hard-

woods are meeting with a heavy inquiry, but there is still a fairly large stock of maple, birch and elm. Stocks are in strong hands and present prices are likely to be maintained.

The curtailment in the output of red cedar shingles is having its effect on the market. The demand is good but shipping is slow on account of the car shortage. The supply of lath has increased perceptibly and conditions are favorable for still higher prices.

GREAT BRITAIN.

The demand for lumber in Great Britain is still quiet, and buyers are indisposed to close contracts for future requirements. The high bank rate is no doubt a factor in the situation, and in addition the stocks of European deals at London and some other points is somewhat larger than at the same time last year. Under the conditions it has been found difficult to advance prices, with the result that little business has as yet been closed, and until either the buyer or seller is willing to grant some concessions, little activity need be expected. At the last auction sale 3 x 11 inch unassorted spruce from Halifax, N. S., sold at £8 5s per standard, and a small quantity of 2 x 3 inch hemlock at £4 per standard. There has been no improvement in birch, which is still heavily stocked. The highest price realized at the last public sale was 40s per load of 50 cubic feet, while timber under 16 inches sold as low as 35s.

INCREASED COST OF SHINGLES.

As mentioned in our last issue, the price of British Columbia cedar shingles was advanced on the 3rd inst. 15 cents per thousand for the rail trade and 25 cents per thousand for the coastwise trade. This advance in price is, we believe, fully justified. There are several reasons which warrant it. First, there is the unprecedented high price of logs and shingle bolts on the coast. This is caused, largely, by the higher wages paid to men in the woods, and the scarcity of men even at the increased wage; also the high price of other materials that go to make up the cost of producing the shingle.

Then the wages at the mills are continually increasing, and good men there, too, are hard to get and keep. Further, in the good times the men are more or less indifferent about retaining their jobs, and their consequent carelessness results in a deterioration of fully ten per cent. in their efficiency.

Added to this is the constant loss of capital through mills being destroyed by fire—a danger which is ever present at the door of the sawmill operator, so that in a period of ten or twenty years the manufacturers find they have not made anything like just returns for their investment, risk and worry.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN).

OTTAWA, December 10, 1906.—A very firm market for every sort of lumber is what the dealers report. There is less bustle in shipping since the closing of the mills, but still not enough cars can be secured to supply the demand. In the last few days the car problem has not been quite so bad, however, and manufacturers believe the end of that trouble is near at hand. The Canadian agents of British importers cannot yet report any purchases of next season's cut, though they have approached some of the lumbermen. A leading manufacturer asserts that the market is rising constantly and the British buyers have not yet come near the figures asked by the Ottawa lumber manufacturers.

The outlook is that a great advance will be made over last year's figures, for manufacturers are independent on account of the high prices offered in the United States. Pine and spruce stocks are low and prices are firm.

When J. R. Booth's lumber mill closed near the end of November he was able to start the pulp mill which had been idle a couple of months owing to lack of power. Anchor ice is still a hindrance to steady work, but Mr. Booth will not try to fight it this season. The most satisfactory plan is found to be closing the mill completely until the obstacles move away. He has started operations in the new paper mill, running part of the machinery.

Mr. James Reid, M. P. for Restigouche, N. B., who is an extensive lumber manufacturer, has just returned from the Old Country and is assuming his duties in the House of Commons. He informs the CANADA LUMBERMAN that the past season was a record one for large production and high prices in the Province of New Brunswick. The next season he believes will be better. The United States buyers are taking immense quantities of shingles and lath and the English market cannot be over-supplied with the larger lumber.

The preliminary inquest arising out of the strike riot in the James MacLaren mill at Buckingham, Que., had just begun before Judge Choquette of Montreal when Mr. Albert MacLaren, president of the company, was discharged, he being among those arraigned for manslaughter. The decision in the case of Alexander MacLaren has not yet been given. Mr. J. E. Vallillee, the company's manager, was tried for neglecting to read the Riot Act in the capacity of Mayor of the town, but the Crown withdrew the charge against him after hearing some of the evidence. The Mayor has since taken action against Yvon Lamontague, the union men's counsel, for alleged defamation of character and sworn out a warrant against Cyril Tourangeau on the ground that he committed perjury in swearing that Mr. Vallillee was with the police during the affray. Six strikers have been committed for trial on the charges of manslaughter and riotous conduct and are out on $1,200 bail each. The final trials will take place at the next session of the Court of King's Bench, which will be held shortly before spring.

In the House of Commons the other day Hon. William Patterson, minister of customs, gave the following importations of lumber and timber admitted free of duty during the year which ended the 30th of June: Pitch pine planks and boards,

HEMLOCK SPECIAL

We are prepared to fill, on short notice, bills in Hemlock, in all lengths 10 to 24 feet. Stock sizes now ready.

Total	128,365,789
Shipments, season 1905	134,376,283
Shipments, season 1906	128,365,789
Decrease, 1906	6,010,494

HIGH FREIGHT RATES.

Lumber freight rates between Oregon and Washington ports and California ports have advanced to $9 per thousand feet, with a fair prospect for an additional dollar being added before the turn of the year. Such exorbitant freight rates of course are quite burdensome to the consumer, but until there is a slackening in the demand for lumber or an increase in the tonnage available, there will be no relief. Deep water freights are abnormally low all over the world, on account of an over-supply of tonnage. As a result says the Portland Oregonian, there is an abundance of first class foreign shipping in all Pacific coast ports as well as elsewhere which is now idle and can be bought at very low figures. A large amount of this tonnage could be used to great advantage in our coast-wise trade at this time, but, owing to the antiquated restrictions of our absurd navigation laws, our capitalists are prevented from purchasing it, as American registry and the right to engage in the coasting trade is forbidden by our laws.

As an illustration of the practical workings of this policy, the case of the British steamship Duneric, now in port, is interesting. Sailing under a foreign flag, this vessel cannot load outward at Portland for a coastwise port. She has accordingly been chartered to go to British Columbia and load lumber for San Francisco at $6 per thousand feet, or $3 per thousand less than the rate paid by the shippers on the American side of the line. It, of course, does not follow that the California consumer will secure his lumber $3 per thousand feet cheaper, for, while theoretically he profits by the opening of a wider field of supply, most of the advantage of a cheaper freight is offset by the tariff of $2 per thousand feet which the considerate government levies against Canadian lumber.

THE GLASGOW MARKET.

The following particulars of the Glasgow market are furnished by Edmiston & Mitchells in their monthly circular of November 30th:

"Business during the past month has been unusually quiet, owing largely to the unfortunate strike in the shipbuilding trade, and though that has now been amicably adjusted, it has not so far assisted matters much, and the prevailing impression seems to be that no great improvement need be looked for this year.

The November import has been on the whole very moderate, and as the St. Lawrence shipments may now be said to be at an end, it is possible to form some idea of the unsold stock of Quebec goods held in the various public yards. That the stock of 2nd, 3rd and 4th pine deals will be unprecedently light is certain, but there is likely to be an ample supply of the 1st pine deals and sidings to fill the market's requirements. The stock of spruce is moderate, but red pine deals are sufficient for the poor demand.

As to Quebec log timber, there will be a considerable reduction from last year in all items, except probably elm and birch.

The position as regards prices is very firm all around, and everything points to their being maintained throughout the winter; indeed, it only requires a more active demand to immediately bring about a tendency to higher values.

There has been a fair import and a moderate demand for American hardwoods during the past month, but prices have not moved appreciably, and the higher grades of pop lar and oak are now so dear that consumption has been considerably checked of late.

WHITE PINE.—There has been no import during the month, and the only sale which transpired consisted of 120 logs large deckwood to one of the local shipbuilders. There has been little or no demand for square timber. Stocks are moderate and values steady.

OAK.—Business during the month has been very quiet, and no transactions of any importance are reported. The stock on hand to carry over the close season is very moderate, and on this account values are very firm.

ELM.—Any business passing has been of a purely retail nature, and little impression has been made on stocks, which are fully ample for the market's prospective requirements.

QUEBEC BIRCH.—The import during November has been of a trifling character. The stock of logs is being gradually reduced, but there is still a considerable quantity unsold on hand, and sales have only been made by making concessions in price. Shippers have been already quoting for next year's delivery but so far no business has transpired in logs There is more enquiry for Quebec planks for next season's shipment.

N. B. BIRCH.—A few retail sales are reported from time to time of 15-inch average logs, but the demand is slow and prices are easy. In planks some small sales have been made at as low as £7 15s per standard yarded. The stock on hand unsold is still considerable.

ASH.—A few small lots of logs and planks arrived during the month, mostly of indifferent quality, some of which were sold from the quay and some stored. For the most part prices were unsatisfactory, but perhaps were ample for the quality.

THE RECORD CAR LOAD.

FASSETT, QUE., Dec. 8, 1906.

Editor CANADA LUMBERMAN:

Dear Sir,—To help the record car load business along a little, we would like to add Pennsylvania car No. 55927, on which we loaded 30,781 feet of 2 x 6 spruce for Ottawa on the third of this month.

Yours truly,

HASKELL LUMBER COMPANY, LTD.

TIMBER LIMIT TRANSACTIONS.

Arkansas newspapers last week reported the sale of about 30,000 acres of hardwood lands in White county, that state, to A. C McComb, of Oshkosh, Wis., through Cameron Brown, of London, Ont. Over half of these lands were owned by a group of Canadians who had held them since 1873. The consideration was in the neighborhood of $250,000. The Searcy, Arkansas, Citizen, commenting on the sale, says: "This large purchase, following closely after the Stecher sale of 15,000 acres for $150,000, indicates that timber men everywhere are alive to the great resources of Arkansas' richest county. All available timber lands are being rapidly bought up and prices appear to be steadily increasing."

CURRENT TRADE CONDITIONS.

ONTARIO

Not much new business is being placed at the present time, but the mills are still busy filling orders. Stocks are considerably broken and some difficulty is being experienced on that account. The tone of the market is exceptionally strong, with indications that there will be no weakening during the winter months. Contracts for next season's production are now receiving consideration, and we understand that a few of the mills have already sold at an advace over the prices at which the past year's cut was disposed of. Dealers are showing considerable eagerness to close contracts, but the manufacturers are disposed to wait until the extent of the log production can be more accurately estimated. Offers have been made varying from two to four dollars higher than the ruling prices for the 1906 cut. Even this has not been sufficient to tempt the manufacturers to sell, wnich is evidence that no decline in prices is anticipated. Enquiries for red pine appear to be getting more numerous, and, with no break in the general lumber market, stock is likely to find a ready sale. There is a good consumption of hardwoods for factory purposes, and if the log production this winter should be on conservative lines, as now seems probable, present prices should improve somewhat.

EASTERN CANADA.

Firmness characterizes the lumber market of Eastern Canada. In Montreal the demand for building material has been so heavy that the stocks in retail yards are badly broken, and during the winter months it is probable that advances will be made on certain items which are found to be generally scarce. The outlook for New Brunswick and Nova Scotia spruce is considered good. One large firm have advised us that they have already received orders which will cover to a large extent their entire cut for next season. Spruce is not high, and considering the cost of logging, present prices should at least be maintained. New Brunswick shingles are not showing much activity, although sales are still being made for Boston delivery on the basis of $3.60 for Extras.

Earlier in the season the weather was not favorable for logging operations, but the recent cold weather, accompanied by snow, has made conditions for both skidding and hauling about perfect. Present indications are that the production of logs in new Brunswick and Nova Scotia will be slightly less than last season.

WESTERN CANADA.

Unfavorable weather has checked the consumption of lumber in western Canada, but the situation in respect to prices is still very strong. The manufacturers of British Columbia have just decided upon a further advance owing to the great scarcity and excessive cost of logs. The ruling price for fir logs is $13 and as high as $15 has been paid,

which makes it absolutely necessary to advance lumber prices if the manufacturer is to show a profit on his operations. Shingle bolts are also scarce and it is understood that most of the shingle mills on the Coast will shut down shortly for a period of a month or six weeks. As a similar shut down has been decided upon by the Washington mills, the production of shingles will be greatly curtailed and still higher prices may result.

UNITED STATES.

Notwithstanding that this is the quiet season, lumber prices continue to hold strong and in some instances have been advanced. The white pine manufacturers of Minnesota, for instance, have recommended the following advances: 2x10 and 2x12, 50 cents; 2x14, $1.50. All 4-inch boards, 50 cents; all 6-inch boards, Nos. 1, 2 and 3, $1. Eight-inch, 10-inch and 12-inch boards, No. 1, 50 cents. Wide No. 1 boards, $2. Eight-inch No. 2, $1; 10-inch No. 2, $1. Twelve-inch No. 2, $150. Wide No. 2, $2. Eight-inch No. 3, 10-inch No. 3, 12-inch No. 3 and wide No. 3, $1. No. 4 boards, 50 cents.

The demand for box material is quite urgent, which has brought about an advance of about $1 per thousand. Buffalo and Tonawanda dealers are carrying about the same amount of stock as last winter. They report some buying for January shipment, but there is a disposition to defer purchases until after the turn of the year. The demand for spruce is not as active as a few weeks ago, but prices are firm and likely to remain around the present basis for the next few weeks. The hardwood trade shows continued strength. In Wisconsin and Michigan the heaviest call is for birch and basswood, followed by maple and elm. The Hardwood Mauufacturers' Association of the United States have recommended a new list, showing a number of advances, in which log run soft elm is placed at $22.50 for one-inch and $24 for 1¼ and 1½-inch; log run soft maple, $22 for one-inch and $24 for 1¼ to 2-inch; and No. 1 common basswood, $25 for one-inch, $27 for 1¼ and 1½-inch, and $28 for 2-inch.

GREAT BRITAIN

The British lumber market is steady but very uninteresting, as the financial stringency has eliminated for the present and buying beyond actual requirements. Consumption is also unsatisfactory and importers are consequently not anxious to increase their stocks. It is fortunate that the imports for the past season were light, as supplies are now about as large as the market can stand. The stock of Quebec pine deals at Liverpool, Birkenhead and Garston is 9,920 standards, compared with 14,150 standards a year ago. This is a substantial decrease, but on the other hand the stock of New Brunswick spruce deals is larger by 4,000 standards. The market for birch is still weak and until the present accumulation is considerably reduced no decided change may be expected. The figures concerning the stock on hand are conclusive evidence in this respect. The stock of birch logs at Liverpool is 108,000 cubic cubic feet, compared with 8,000 feet a year ago, and of birch planks 158,000 cubic feet against 32,000 cubic feet a year ago. Manchester has a stock of 162,000 cubic feet of Birch planks, while a year ago it was only 18,000 cubic feet. The price for Quebec birch, as quoted by Alfred Dobell & Company, is 1s. 8d. to 2s. 2d. per cubic foot.

STOCKS AND PRICES.

The Moulthrop Lumber Company, of John Island, Ont., are reported to have sold one-half of their cut of next season.

Buffalo received to the end of November of this year 185,758,000 feet of lumber, against 157,331,000 feet to same date last season by lake. Shingle receipts were 239,520,000, and 279,415,000 respectively.

COOPERAGE STOCK.

Business during October and November, says the Sutherland-Innes Company, of Chatham, Ont., has brightened up considerably, and there has been considerable demand for all classes of cooperage stock. There was quite a little spurt in October in apple barrel stock, but it is now over, the freeze at the end of October having hurt the apples that were still unpicked to such an extent that there are only very few sections where they are being barreled.

Both flour barrel and sugar barrel stock is in good demand, with very little offered on the market. High-grade stock is especially hard to obtain, and there seems to be very little on hand to offer. No. 2 staves are also in fair demand, much better than they have been through the preceding months of the year.

The demand for hoops has naturally slackened off somewhat on account of the apple barrel stock demand being over; but still there is a fairly good demand for hoops, and at prices that are remunerative to the manufacturers.

No. 1 heading is particularly scarce, and there does not appear to be enough to satisfy the demand. The lower grades of heading are also in fairly good demand, and there is not such a scarcity as there is in No. 1 stock.

Take it all around, stocks at the different mills are lighter than they have been for two years, and there will be no relief until the new stock comes in in the spring, with the exception of hoops, which will be made more or less during the winter.

It is not likely that any of the mills will stock up heavily this winter to make cooperage stock, but those who are equipped for lumbering will only run cooperage stock as a side line, unless they can obtain very much higher prices than they have done for some time past, as lumber brings a good deal more money.

Tight barrel stock of all kinds continues in excellent demand, and stock is very light. The export demand is especially heavy on account of the good wine crop in Europe, and this will likely continue for some time.

On the whole the outlook for more reasonable prices in cooperage

WE beg to announce to the trade that we have been appointed Canadian Agents for

stock is better than it has been for two years, and, provided that the demand keeps up manufacturers will be able to place their outputs next season at fairly remunerative prices.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., December 10th, 1906.—"Conditions in the lumber industry are serious just now," was the remark this morning of a well-known local millman. "In shingles, bolts are so scarce that the prices are soaring, and as high as $5.50 is being paid. There is no established price, for if they are wanted badly a man has to pay. Because of the various conditions, scarcity of labor, being one, the mills will all close from December 22nd until the end of January. The shingle mills on the other side of the line will be closed for even a longer period.

"Prices of shingles, too, have been raised 15 cents all round. This makes the XXX brand $2.20. The prices are now about on a par with those prevailing in Washington state.

"In the lumber part of the industry, it is a question what we are going to do about logs. The regular price now is $13 per thousand, while $10 was thought high less than a year ago. I know instances of where $15 has been paid. Of course, there is but one sequel to this, and that is an increase in the lumber prices. With logs at even $13 it is not a profitable business to be supplying rough lumber at $16, and when the Association meets on Thursday afternoon next an advance will be the most important subject discussed. It will very probably be made."

A feature of the export trade in lumber just now is the quantity which is being shipped to San Francisco. It is also an indication of the great demand when Puget Sound mills cannot supply what is required. The steamer Bessie Dollar is taking three million feet from Chemainus, and the steamer Duneric will arrive this week to load a million and a quarter feet at the Hastings mill.

Mr. Palmer, manager of the Victoria Lumber and Manufacturing Co., at Chemainus, states that about 70,000,000 feet was cut at his establishment this year, most of which was exported. During the season he has had to import logs from Bellingham at a cost of $13.10 per thousand laid down at Chemainus, but the greatest handicap was the scarcity of loggers. Owing to this reason, contracts for logs, for the mill could not be filled. Owing to the high price of logs, there was little profit in lumber, and his company has not paid a dividend in its fifteen years of operations at Chemainus. Of course, its interests have largely been increased during that time.

D. B. Brooks, M. J. Scanlon, of Minneapolis, and W. H. McWilliams, of Winnipeg, of the Brooks-Scanlon Lumber Company, are in the city to-day. Mr. Scanlon stated to your correspondent that they were out to buy some desirable mill property. The Rat Portage Company's mill at Harrison has been under their consideration, and since arriving in the city on Friday evening they had been looking at the mill of the Pacific Coast Lumber Company in Vancouver. He stated that no deal had yet been completed.

An instance of the extention of the operations of the large American companies which have lately come to British Columbia is the purchase of 22,000 acres of timber near Vernon by the Elk River Lumber and Manufacturing Company, of Fernie. The company will build a mill on the main line of the C. P. R., near Sicamous to cut this timber.

The B. F. Graham Lumber Company, composed of New Mexico and California capitalists, will build a mill at Port Renfrew, Vancouver Island, which will cut for export.

PRICES OF B. C. LUMBER INCREASE

On the 13th inst. prices of British Columbia Lumber were advanced from two to three dollars per thousand. The cause assigned for the advance is the scarcity of logs, the scarcity and high price of labor for the camps.

HARDWOODS ARE STRONG.

The trade in hardwood is fairly satisfactory, says the Hardwood Record, with light stocks of dry lumber in dealers' hands and a much firmer range of prices than obtained earlier in the season. Not a great deal of ash is produced here this year and it has commanded a ready sale. Maple is doing better. During the early months either two much maple was produced or there was not enough of it wanted, and it was the weakest commodity in the hardwood lsit. But later in the season it brightened up and it is now in greater favor. Beech has done well and is quoted about $1.00 a thousand better than during the early months. There is also a better movement in birch, which was neglected early in the year. There is a good call for basswood and prices have materially improved. There is every prospect of a diminution of the output of Michigan and Wisconsin hardwoods during the coming winter and, as it is well known, dry stock on hand being short, there will be a scramble for maple, birch, elm and beech before there is any new stock on the market. Generally speaking the entire hardwood lumber situation is strong.

TIMBER LIMIT TRANSACTIONS.

It is learned that the purchaser of the timber limit sold recently by William Potter & Sons, of Tottenham, Ont., was J. H. Kratz, of Vineland. The timber is situated about four miles north of Schomberg, and is known as the Coffey Oak bush. It contains about ninety acres, on which it is estimated there is 600,000 feet of white oak, 600,000 ft. rock elm, 300,000 ft. of white pine, and 500,000 feet of mixed timber, a total of 2,000,000 feet. The purchaser intends putting a mill on the property and manufacturing the timber.

A timber deal is in prospect which will probably mean the establishment of still another saw mill for the west coast of Vancouver Island—at Sooke. Seattle capitalists are seeking to purchase from the C. P. R. eleven miles of timber limits on the Sooke River. The deal would have been completed some time ago but for a disagreement with regard to the purchasers' rights on the Sooke River, where it runs through the property. The capitalists, if the negotiations are successfully concluded, will run their logs on the Sooke River and it is stated their intention is to erect a sawmill at the village of Sooke or thereabouts.

B. C. MILLS CHANGE OWNERS

The Pacific Coast Lumber Co. of Vancouver, has been purchased by a local syndicate which includes Mayor Buscombe of Vancouver. Mr. Geo. McCormick, former mananger of this mill, has in company with several other Vancouver and New Westminster gentlemen, purchased the plant of the Canadian Pacific Lumber Co. at Port Moody.

B. C. SHINGLE MILLS TO CLOSE DOWN

It has been unanimously decided by about 50 per cent. of the shingle manufacturers of the coast to close down on the 22nd of December and to remain closed for about six weeks in order to give opportunity for the necessary repairs etc.

It is likely that all of the shingle manufacturers will follow suit.

DRY LUMBER FOR SALE—BIRCH, BASSwood, Elm, Ash and Maple. J. WHITESIDE, Huntsville, Ont.

TO LUMBER MANUFACTURERS.

Lumber manufacturers throughout the Dominion have received a request from the publishers of this journal for information respecting the past year's operations, to enable us to compile our annual review of the lumber trade to be published in the February number. Many manufacturers have already responded, and it is hoped that those who have neglected to do so will forward the information upon reading this reminder. If any manufacturers failed to receive a circular, kindly consider this an invitation to send us particulars of your output and any other information pertinent to the year's operations.

CURRENT TRADE CONDITIONS.

ONTARIO.

Wide fluctuations in prices of lumber are not expected at this season of the year, when the consumption is usually light. The activity which has been so pronounced all year is still in evidence, however, as a quantity of stock has yet to be shipped out. A visitor to the mills in Western Ontario will find that most of the lumber has passed out of first hands, so that present negotiations pertain in large measure to the cut of 1907. Prices, we believe, will be considerably higher than those at which the 1906 production was sold. We know of sales of white pine at an advance of ten per cent., while some manufacturers are even asking an increase of twenty per cent. Buyers are showing more anxiety to acquire stocks than was evinced a year ago, notwithstanding the high prices. We are told of the refusal of an offer of $19 per thousand for saw logs delivered on the Georgian Bay, which would indicate that the owner had confidence in his ability to sell at a higher figure. A price in the neighborhood of $20 for logs, even if of superior quality, means very high-priced lumber.

Hardwoods are steady, with an average consumption for finishing

purposes. The outlook for prices seems good, as stocks are materially lighter than at the close of 1905. The input of hardwood logs will of course depend largely upon the quantity of snow and duration of sleighing.

EASTERN CANADA.

The Eastern trade has now settled down to a winter basis. The consumption of lumber locally is very good, but shipments to the United States are falling off, while the export trade to Great Britain is confined to the regular liners from St. John and Halifax. Considerable attention is now being given to next year's prices and we learn from Quebec that there has been an advance in white pine, oak, elm and ash timber. For first class Ottawa waney pine, 18 inch average, 62 to 68 cents is asked, and for Michigan and Ohio oak 55 to 60 cents. Birch prices are lower on account of the weakness of this class of timber in the British market, the ruling prices being 18 to 20 cents per cubic foot for 14 inch and 26 to 29 cents for 16 inch. There is much uncertainty as to the prices which will rule next season for spruce deals, but in view of the high cost of production, a strong effort will no doubt be made to hold prices at the present basis, and if the British market should improve, an advance would seem to be in order. New Brunswick shingles are quiet, selling on the basis of $3.50 $3.60 for Extras, Boston delivery.

WESTERN CANADA.

At the regular meeting of the British Columbia Lumber and Shingle Manufacturers' Association on December 13th the prices of lumber were advanced $1 on rougher grades to $3 on better. This puts rough lumber at the record price of $17 per thousand. Prices will remain firm until spring, if no other increases are made. Scarcity of logs is the principal cause of the advance and at the present time there is no indication that the log famine is near an end.

UNITED STATES.

The position of the lumber market is strong, with the current demand well distributed. There is a natural disposition at this season of the year to defer purchases until after the holidays, but notwithstanding this fact, considerable business is being booked. While white pine prices are doubtless high, there are no indications at present of any decline, and if for any reason the log supply should be short, there would undoubtedly be a further advance in prices. Some of the largest dealers and consumers are therefore willing to cover their requirements at present prices, with the result that no small percentage of the cut of next year has already been contracted for. Trade at Buffalo and Tonawanda is good, with an improved demand for cutting-up grades. The scarcity of the lower grades of pine has forced the substitution of hemlock, which continues to exhibit remarkable firmness. Trade in spruce is not active but prices are steady. It is claimed that the cut of spruce logs this winter will be lighter than usual on account of the scarcity of woodsmen in that territory.

The shingle market is in a very healthy condition. Buffalo and Tonawanda have a light supply of red cedar, and there is therefore a ready market for white cedar and white pine, while some hemlock shingles have recently found buyers.

GREAT BRITAIN.

Lumber stocks in Great Britain have accumulated somewhat during the past three months, and the year is drawing to a close with the supply rather heavy when one considers the light consumption. The importation from Russia, Finland, and Norway has been large, the stock of foreign deals in the public docks at London being 2,452,000 pieces, against 1,720,000 pieces a year ago. The statistical position of pine and spruce deals is more favorable, but the market for these has been affected by the heavy stock of foreign lumber. Importers have not yet closed contracts for next year's requirements, although it seems to be generally admitted that prices are likely to be higher. The high bank rate, however, is an adverse influence on business, indicating as it does a scarcity of money. Shippers are finding it very difficult to induce importers to consider offers of birch, as the business during the past year was very unsatisfactory and early buyers were as a rule heavy losers. Birch prices may recede a little further, but the person who buys at present values and carries the stock will likely be able to make a good profit in the transaction.

STOCKS AND PRICES.

George H. Belton, of London Ont., has secured the contract for the lumber required for the new storage building for the McClary Manufacturing Company. The order is for 1,200,000 feet, and we understand will include a considerable quantity of Southern lumber.

A. Bruce Smith, Manager Grand Trunk Pacific Telegraphs, Montreal, will receive tenders up to December 31st for the delivery of 10,000 green cedar telegraphs poles or any portion thereof, 8,000 to be 25 feet long and 2,000 30 feet long. The poles must be seven inches diameter at small end, without bark, and delivery must be made not later than May 1, 1907.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN).

OTTAWA, December 24th.—There has been an exceedingly keen demand for low grades of pine during the last few weeks. The stock of 1-inch mill culls and shipping culls is exceedingly scarce. Purchasers have not been able to secure as large orders in these lines as they desired. The closing of the mills had considerable to do with stimulating the demand. Some dealers are refusing to dispose of their supplies, preferring to hold the lumber for the regular trade. In addition to the low stocks, car shortage is discouraging foreign shipments. The prices in pine, especially the low grades, are firmer than they

WE beg to announce to the trade that we have been appointed Canadian Agents for

have been for many months. There are no easy bargains at all for the buyers. Manufacturers express the opinion that quotations are likely to advance a little before Spring, but that a decline may come then.

Birch is in good demand and there is a fair supply in the Ottawa Valley. While a few sales have taken place at low figures, most manufacturers are able to get exceptionally good prices for their stock. The Hurdman & Elmitt Company have an excellent lot of dry birch at Maniwaki, Que., ready for immediate shipment. This is quoted at from $18 to $22 a thousand. It is the mill run with the mill culls out and is rich in firsts and seconds. Sales are being made considerably lower than this, but the stock is probably inferior.

Lath is reported scarce, though the high price which has ruled for a long time is not yet surpassed. Buyers have difficulty in getting the best shingles, but there is a good supply of XX 18-inch.

J. R. Booth will resume sawing in a few days. The mill will be supplied with logs brought down by train from Madawaska district. The water power has improved sufficiently at the Chaudiere to enable Mr. Booth to operate his pulp mill, and as soon as the machinery is made to work satisfactorily, his paper mill which adjoins the lumber yard will be running.

It is learned from the Upper Ottawa Improvement Company that there are more logs in the river than this time last year. The manufacturers along the Ottawa will have more old material on hand when the spring opens than they had in the past. About the middle of January a new steamer will be delivered at Pembroke for the use of this company, and another one will be delivered about the middle of February. These are small vessels and are being manufactured in Toronto, to help with the drive next season.

There is an active demand for shanty teams in Ottawa. On December 27th the Turner Lumber Company will take away forty teams to Georgian Bay. The wages are from $2 to $2.50, transportation paid both ways. The Parry Sound Lumber Company and Holland & Graves are also securing horses in Ottawa. Owing to the high price of hay—$18 a ton—in Ottawa there is a desire to get the horses away, if possible. Lumbermen find the expense of feeding the horses a heavy addition to the cost of shanty operations. With the exception of a few loaders the Ottawa Valley firms are amply supplied with men.

ONTARIO LOGGING OPERATIONS.

A subscriber of the CANADA LUMBERMAN writes as follows :—

"In conversation with lumbermen from the north, they tell me that there is 18 inches of snow at the Soo, and the thermometer has been 28° below ; in the Lake Superior region two feet, and in some places three feet of snow. There are plenly of men now and no difficulty in getting all the help needed. Everything is in good shape and ready to commence hauling as soon as they get up the quantity of logs. Sawlogs will be high this coming season. I know of $19.00 per thousand delivered in Georgian Bay being refused, and I would not be surprised to see logs selling for $21.00 to $22.00 per thousand for real good stock, on the Georgian Bay. Prospects for getting out the stocks are bright, and every one is feeling good."

The Pembroke Lumber Company, Pembroke, Ont., expect to deliver to their mill next season 20,000,000 feet of pine, spruce and hemlock. They have considerable dimension timber coming in early from their Petewawa limits.

The Miramichi Lumber Company, which took control of the William Richards property on the Miramichi, in New Brunswick, will take out about thirty-five million feet of logs this winter.

CONCATENATION AT NELSON, B. C.

A Hoo-Hoo concatenation will be at Nelson, B. C., on January 16th, 1907, which promises to be one of the largest meetings ever known on the Pacific Coast. The committee are making strenuous efforts to make it a howling success, and a large number of "kittens" are expected. Vicegerent Snark J. D. Moody, of Vancouver, will have charge of the affair, fuller particulars of which will appear in the January monthly edition of the CANADA LUMBERMAN. It is expected that the railroads will grant a return rate of a fare and a third.

RAILROAD TIES.

The Menominee, Mich., correspondent of the American Lumberman thus refers to the market for railroad ties: "Because of the strong demand for railroad ties, the railroad companies that depend upon this region for at least a portion of their supplies have been compelled to raise their bids twice this season until at present the prices prevailing for both cedar and hemlock ties are higher than at any previous time in the history of the logging industry of the Lake Superior region. One corporation, which is purchasing only the very highest grade of cedar for shipment to outside points on its system, is paying as high as 49 cents each for ties. Other companies are paying 30 and 35 cents. Last year 22 cents was considered a good price. Lake Superior ties are shipped to every state in the Union and even into Mexico."

THE BARBADOS MARKET.

Under date of December 1st, Messrs. S. P. Musson, Son & Company say: The steamer "Olenda" from Halifax, N. S., brought down about 150,000 feet of white pine and spruce to various consignees and dealers, of which 19,000 feet of white pine was sold at $27.50 round, and 35,000 feet of white pine and 13,000 feet of spruce at $23.50 round, for both descriptions. Besides this the schooner "Arrow," from Liverpool, N. S., arrived this week with 212,000 feet white pine and spruce, which had been sold some time earlier. These arrivals have filled pressing requirements, and dealers are not anxious to lay in further supplies at the high rates that have lately obtained, but with the crop season near at hand, there is no doubt that the demand for lumber must keep up, and there is still room for a few more cargoes of both white pine and spruce, which should realize good prices. No receipts of shingles to note, and market remains as last advised

the Berlin Paper Company, have purchased the Breakey syndicate timber limits at La Tuque, Que., for a quarter of a million dollars, and the La Tuque water power and other property. It is understood that they will erect large pulp and paper mills, and that the company will be known as the Quebec Industrial Company, with Herbert J. Brown, of Portland, Me., as president.

O. L. Boynton, manager, and F. B. Lynch, secretary, of the Elk Lumber Company, Fernie, B. C., returned recently from the upper Okanagan country, where they purchased a tract of 26,000 acres of good timber, which it is estimated will run a billion feet. The timber is located on Cherry Creek, a branch of the Spallumacheen river.
